

Reliable 300-420 Dumps Pdf - 300-420 Valid Test Question

What's more, part of that TorrentValid 300-420 dumps now are free: https://drive.google.com/open?id=1JSODewJC_mULviGRE1J8U0Z37K12Fau_

TorrentValid's Designing Cisco Enterprise Networks (300-420) exam questions contain Cisco 300-420 real questions and answers that have been compiled and verified by Cisco specialists in the field. This demonstrates that the real questions and answers in the Designing Cisco Enterprise Networks (300-420) material are legitimate for the Designing Cisco Enterprise Networks (300-420) practice exam. The Cisco 300-420 practice questions are intended to help you easily and confidently clear the Designing Cisco Enterprise Networks (300-420).

Cisco 300-420 (Designing Cisco Enterprise Networks) Exam is a certification exam that validates the knowledge and skills of IT professionals in designing enterprise networks using Cisco technologies. 300-420 exam is aimed at network designers, architects, and engineers who are responsible for designing and implementing complex enterprise networks. 300-420 exam is part of the Cisco Certified Design Professional (CCDP) certification program and is a prerequisite for earning the CCDP certification.

Cisco 300-420: Job roles associated with CCNP Enterprise certification

After successfully completing the 300-420 and 350-401 exams, you will become eligible for getting the CCNP Enterprise certificate. This option is highly beneficial, especially in terms of employment opportunities. There are several positions that you can apply for after obtaining this certification. Some of these job roles include the following:

- Network Specialist;
- Systems Engineer;
- VoIP Engineer;
- Advanced Technician;
- Network Engineer;
- Network Analyst;

With Cisco CCNP Enterprise on your resume, you can also count on good wages. According to surveys, the annual average salary of a Network Administrator is \$67,002; the average income of a Network Engineer is 111,335 per year, while a Data Center Technician can earn an average of \$110,901 per annum. If you are not convinced that obtaining this professional-level certificate is worth the effort, then you should consider the financial and career advantages that come with it.

Cisco 300-420 Certification Exam is a comprehensive test that covers a broad range of topics related to designing enterprise networks. 300-420 exam focuses on network design principles and concepts, including advanced addressing and routing solutions, advanced enterprise campus networks, WAN, security, and network services. 300-420 exam also tests the candidate's knowledge of network virtualization technologies, network automation, and network programmability.

Cisco 300-420 Valid Test Question - 300-420 Valid Dumps Sheet

In fact, on one side, our 300-420 training braidumps can help you pass the exam and win the certification. On the othe side, i think it is even more important, that you can apply what you have learned on our 300-420 Practice Guide into practices. Your speed of finishing the task will be greatly elevated. Everting will take positive changes because of our 300-420 exam materials. Please cheer up for yourself.

Cisco Designing Cisco Enterprise Networks Sample Questions (Q301-Q306):

NEW QUESTION # 301

An architect must design an IPv6 migration solution for a corporation with remote offices to support:

- The customer has IPv4 peering with their service provider.
- IPv6 users need access to IPv4 and IPv6 resources.
- Existing content providers will migrate to IPv6 in the next two years.
- Users will be migrated in a phase-by-phase approach.

Which migration solution must the architect choose?

- A. NAT46
- **B. dual-stack**
- C. NAT64
- D. tunneling

Answer: B

NEW QUESTION # 302

Refer to the exhibit. An architect must design a solution to connect the two ASs. To optimize bandwidth, the design will implement load sharing between router R6 and router R4. Which solution should the design include?

- A. Use update-source to specify the Loopback interface.
- B. Use next-hop-serf attributes only for routes that are learned from eBGP peers.
- **C. Use maximum-paths to install multiple paths in the routing table.**
- D. Configure the eBGP TTL to support eBGP multihop.

Answer: C

NEW QUESTION # 303

Which NETCONF operation creates filtering that is specific to the session notifications?

- A. <commit>
- B. <notification>
- C. <logging>
- **D. <create-subscription>**

Answer: D

NEW QUESTION # 304

Refer to the exhibit.

The failover time of ISP-2 is significantly shorter than ISP-1 when an interface on the ISP router toward the campus network fails. Which solution minimizes the downtime to the sub-second?

- **A. BFD**
- B. Aggressive timers
- C. Graceful-restart
- D. Next-hop address tracking

Answer: A

Explanation

NEW QUESTION # 305

- Answer: D**
