

# Verified AI-102 Valid Vce | Easy To Study and Pass Exam at first attempt & Authorized AI-102: Designing and Implementing a Microsoft Azure AI Solution

What's more, part of that PracticeMaterial AI-102 dumps now are free: [https://drive.google.com/open?id=1xXQ\\_A1Z4p4k3jRwPiUR8VZ-icfKcafvo](https://drive.google.com/open?id=1xXQ_A1Z4p4k3jRwPiUR8VZ-icfKcafvo)

If you visit our website PracticeMaterial, then you will find that our Microsoft AI-102 practice questions are written in three different versions: PDF version, Soft version and APP version. All types of AI-102 Training Questions are priced favorably on your wishes. Obtaining our Microsoft AI-102 study guide in the palm of your hand, you can achieve a higher rate of success.

You can easily get Microsoft AI-102 certified if you prepare with our Microsoft AI-102 questions. Our product contains everything you need to ace the AI-102 certification exam and become a certified Microsoft professional. So what are you waiting for? Purchase this updated Microsoft AI-102 Exam Practice material today and start your journey to a shining career.

## Test Microsoft AI-102 Dumps Pdf - AI-102 Dumps

Our AI-102 exam questions are of high quality and efficient. We provide the client with the latest materials so that the client can follow the newest trends in theory and practice it so thus the client can pass the exam easily. Don't be hesitated and take action immediately! The study materials what we provide is to boost pass rate and hit rate, you only need little time to prepare and review, and then you can pass the AI-102 Exam. It costs you little time and energy, and you can download the software freely and try out the product before you buy it.

## Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q131-Q136):

### NEW QUESTION # 131

Select the answer that correctly completes the sentence.

Answer Area

 Microsoft

When provisioning an Azure Cosmos DB  , you need to specify which type of API you will use.

account  
container  
database  
item

Answer:

Explanation:

**Answer Area**  Microsoft

When provisioning an Azure Cosmos DB  , you need to specify which type of API you will use.

**NEW QUESTION # 132**

Select the answer that correctly completes the sentence.

**Answer Area**  Microsoft

A JSON document is an example of 

**Answer:**

**Explanation:**

**Answer Area**  Microsoft

A JSON document is an example of 

**Explanation**

**Answer Area**  Microsoft

A JSON document is an example of

**NEW QUESTION # 133**

You have a library that contains thousands of images.

You need to tag the images as photographs, drawings, or clipart.

Which service endpoint and response property should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Service endpoint:

Property:

**Answer:**

**Explanation:**

**Answer Area** 

Service endpoint:

Property:

**Explanation:**

Service endpoint # Computer Vision analyze images

Property # imageType

The task:

"You have a library with thousands of images. You need to tag the images as photographs, drawings, or clipart."

\* Which service endpoint?

\* Computer Vision analyze images # Provides a broad analysis including categories, tags, descriptions, and image type (photo, drawing, clipart). #

\* Computer Vision object detection # Identifies objects (people, cars, animals), not image type.

\* Custom Vision image classification / object detection # Requires custom training, not needed since the built-in Computer Vision service already supports this.

Correct: Computer Vision analyze images

\* Which property?

\* categories # Provides predefined categories (e.g., outdoor, indoor, people), not specifically drawing/clipart/photo.

\* description # Generates captions in natural language, not classification into photo/drawing/clipart.

\* imageType # Identifies if an image is a photograph, line drawing, or clipart. #

\* metadata # Provides size, format, dimensions.

\* objects # Lists detected objects, not image type.

Correct: imageType

The answer:

\* Service endpoint # Computer Vision analyze images

\* Property # imageType

\* Computer Vision Analyze API

\* ImageType property in Computer Vision

### NEW QUESTION # 134

You train an Azure Custom Vision object detection model to identify a company's products by using the Retail domain.

You plan to deploy the model as part of a mobile app for Android phones.

You need to prepare the model for deployment.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Actions

Explanation:

Actions

For deployment to a mobile app (Android), Custom Vision requires a compact domain so the model can be exported and run on-device (e.g., as TensorFlow Lite or ONNX). The model was trained using the Retail domain, which is not an exportable compact domain for object detection. Therefore:

\* Change the model domain to an exportable Object Detection (compact) domain (e.g., General [compact]).

- \* Retrain the model so weights are learned under the new domain-domain changes require retraining.
  - \* Export the model for Android (typically TensorFlow Lite or ONNX) and integrate it into the app. This sequence prepares the model for on-device mobile deployment with minimal extra development.
- References (Microsoft Azure AI Solution)
- \* Custom Vision: Only compact domains support model export for edge/mobile.
  - \* Changing a domain requires retraining the iteration.
  - \* Exporting object detection models supports TensorFlow/TensorFlow Lite/ONNX formats for Android integration.

**NEW QUESTION # 135**

You Have a chatbot that uses the Azure AI Language custom question answering service. The model used by the service was trained by using an internal support FAQ document.

You discover that the chatbot fails to provide correct answers to common questions.

You need to increase the accuracy of the responses provided by the chatbot. The solution must minimize development effort.

Which three actions should you perform in sequence from Language Studio? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

**Explanation:**

**Explanation:**

- \* Open the Review suggestions pane.
- \* Explanation: This step allows you to access suggestions generated by the Azure AI Language service based on user interactions and queries. Reviewing these suggestions helps identify potential improvements or alternative phrasings that can enhance the model's understanding and accuracy with minimal effort.
- \* Review and accept the alternative phrases.
- \* Explanation: After opening the review suggestions pane, you can evaluate and accept alternative phrases or questions that users might have asked. Accepting these updates trains the model to recognize variations in how questions are posed, thereby improving its ability to provide accurate responses without requiring extensive manual retraining.
- \* Enable active learning.

\* Explanation: Enabling active learning allows the model to continuously improve by learning from user interactions and feedback over time. This feature automatically suggests refinements based on real-world usage, minimizing development effort while enhancing the chatbot's accuracy as it adapts to common questions.

These steps are sequenced to progressively improve the chatbot's performance with minimal development effort. Starting with reviewing suggestions leverages existing data, accepting alternative phrases refines the model's understanding, and enabling active learning ensures ongoing improvement, aligning with the goal of increasing accuracy efficiently.

## NEW QUESTION # 136

.....

PracticeMaterial provides actual help candidates pass on the first try, ultimately saving them time and resources. These questions are of the highest quality, ensuring success for those who use them. To achieve success, it's crucial to have access to quality Microsoft AI-102 Exam Dumps and to prepare for the likely questions that will appear on the exam. PracticeMaterial helps candidates overcome any difficulties they may face in exam preparation, with a 24/7 support team ready to assist with any issues that may arise.
