最新的 Scaled Agile Framework SAFe-RTE 免費考試真題 (Q190-Q195):

問題 #190

Which activity takes place during Team Breakout #2 on the second day of Program In-crement (PI) Planning?

- A. All Feature delivery and dependencies are visualized on the program board
- B. Business Owners assign business value without team discussion so they can normalize business value across all teams on the Agile Release Train
- C. The RTE modifies the PI Iteration schedule, if needed, based on the scope of high priority Features
- D. The Release Train Engineer (RTE) combines all Team PI Objectives into Program PI Objectives

答案： A

解題說明：

During Team Breakout #2 on the second day of Program Increment (PI) Planning, teams continue their planning and make the necessary adjustments. This includes visualizing all Feature delivery and dependencies on the program board. The program board is a crucial tool in SAFe's PI Planning process as it provides a visual representation of the plan, showing how Features flow through Iterations and highlighting any dependencies and risks. This visualization helps teams and stakeholders understand the delivery forecast and align on the execution plan.

問題 #191

Which two roles should facilitate an ART sync? (Choose two.)

- A. Product Owner
- B. Scrum Master
- C. Release Train Engineer
- D. Product Management
- E. Epic Owner

答案： A,D

問題 #193

What does an ART planning board support?

- A. Problem-solving
- B. Business Value assignment
- C. Feature delivery
- D. ART predictability

答案： C

解題說明：

An ART planning board supports Feature delivery. It is used during PI Planning and throughout the PI to visualize and manage the delivery of Features, including tracking dependencies and integration points between teams, thereby facilitating coordinated effort across the ART.

問題 #194

The Release Train Engineer (RTE) learns the teams feel the business value does not reflect the effort and progress. What are two ways the RTE can provide a better understanding of what the teams have created? (Choose two.)
