XK0-006 test questions: CompTIA Linux+ Certification Exam & XK0-006 pass-king dumps

Getcertkey has designed CompTIA Linux+ Certification Exam which has actual exam Dumps questions, especially for the students who are willing to pass the CompTIA XK0-006 exam for the betterment of their future. The study material is available in three different formats. CompTIA Practice Exam are also available so the students can test their preparation with unlimited tries and pass CompTIA Linux+ Certification Exam (XK0-006) certification exam on the first try.

CompTIA Linux+ Certification Exam Sample Questions (Q31-Q36):

NEW QUESTION # 31
A Linux server is not starting up because files in the /boot/partition are corrupt. After the initial GRUB screen, the following message is displayed:

Probing EDD (edd=off to disable)... ok
uncompression error
--system halted
Which of the following steps should the Linux administrator take to recover the system without destroying the existing installation? (Choose two.)

- A. Reinstall the OS.
- B. Reinstall the kernel packages.
- C. Start up in single-user mode.
- D. Start up the system using rescue boot media.
- E. Replace the hard drive.
- F. Increase the amount of swap memory.

Answer: B,D

Explanation:
Using rescue boot media lets you boot the machine, mount the existing partitions, and access the corrupted /boot files without reinstalling the OS.
Reinstalling the kernel packages restores the missing or corrupt files in /boot (e.g., vmlinuz and initramfs), allowing GRUB to load and uncompress the kernel properly.

NEW QUESTION # 32

A Linux administrator wants to use AI to deploy infrastructure as code. Which of the following is a best practice regarding the use of AI for this task?

- A. Linting generated code
- B. Merging CI/CD pipelines
- C. Generating monolithic code
- D. Using copy and paste when possible

Answer: A

Explanation:
Linting ensures that AI-generated infrastructure-as-code (IaC) follows proper syntax, formatting, and best practices. This helps prevent errors, enforces consistency, and improves security before deployment.

NEW QUESTION # 33

Users connecting to a MySQL database on a Linux system report frequent errors. An administrator reviews the following partial output of the /proc/meminfo and freecommands:

```
              total        used        free
Mem:        1011966      151930      860036
Swap:       1191972     1181716       10256

MemTotal:    1011966 kB
MemFree:
...
SwapTotal:   1191972 kB
SwapFree:      10256 kB
```

Which of the following should the administrator do to ensure that the MySQL service will continue to run even if the system runs out of swap space? (Choose two.)

- A. Issue the mkswap /dev/sda2; swapon -v /dev/sda2 command.
- B. Reload the /etc/fstab file by issuing the mount -a command.(Not sufficient alone)
- C. Issue the sysctl -w vm.overcommit_ratio=100 command.
- D. Issue the dd if=/dev/zero of=/swapfile bs=1024 count=65536 command.
- E. Issue the sysctl -w vm.overconunit_memory=2 command.(Invalid key)
- F. Use disk quotas on the swap space to prevent MySQL from overutilizing the swap partition.

Answer: A,D

Explanation:
Creating a swap file with dd if=/dev/zero of=/swapfile bs=1024 count=65536 allocates additional swap space that MySQL can use when RAM is exhausted.
Formatting and enabling a swap partition with mkswap /dev/sda2; swapon -v /dev/sda2 brings another swap device online, further increasing the system's swap capacity.

NEW QUESTION # 34
Which of the following describes PEP 8?

- A. The style guide for Python code
- B. A package installer for Python
- C. A Python variable holding octal values
- D. Python virtual environments

Answer: A

Explanation:
PEP 8 is the official Python Enhancement Proposal that provides coding style guidelines for writing clean, consistent, and readable Python code.

NEW QUESTION # 35
A Linux user needs to download the latest Debian image from a Docker repository. Which of the following commands makes this task possible?

- A. docker image save debian
- B. docker image pull Debian
- C. docker image init debian
- D. docker image import debian

Answer: B

Explanation:
The docker image pull command downloads an image from a Docker repository (such as Docker Hub). Using docker image pull debian retrieves the latest Debian image.

NEW QUESTION # 36
