Microsoft Security, Compliance, and Identity Fundamentals Sample Questions (Q69-Q74):

NEW QUESTION # 69
What should you create to search and export content preserved in an eDiscovery hold?

- A. a case
- B. a Microsoft SharePoint Online site
- C. a Microsoft Exchange Online public folder
- D. Azure Files

Answer: A

Explanation:
In Microsoft Purview eDiscovery, to search, preserve, analyze, and export content, you must first create a case. A case acts as a container for all eDiscovery activities, including placing users and content locations on litigation hold, running content searches, and

exporting results for legal or compliance review.
SCI Extract: "Cases are used in Microsoft Purview eDiscovery (Standard and Premium) to manage, organize, and execute the various tasks associated with identifying and delivering content during an investigation or litigation."

NEW QUESTION # 70

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point

Statements	Yes	No
Enabling multi-factor authentication (MFA) increases the Microsoft Secure Score.	○	○
A higher Microsoft Secure Score means a lower identified risk level in the Microsoft 365 tenant.	○	○
Microsoft Secure Score measures progress in completing actions based on controls that include key regulations and standards for data protection and governance.	○	○

Answer:

Explanation:

Statements	Yes	No
Enabling multi-factor authentication (MFA) increases the Microsoft Secure Score.	☑	○
A higher Microsoft Secure Score means a lower identified risk level in the Microsoft 365 tenant.	☑	○
Microsoft Secure Score measures progress in completing actions based on controls that include key regulations and standards for data protection and governance.	☑	○

NEW QUESTION # 71

What is an assessment in Compliance Manager?

- A. A policy initiative that includes multiple policies.
- B. A dictionary of words that are not allowed in company documents.
- C. Recommended guidance to help organizations align with their corporate standards.
- D. A grouping of controls from a specific regulation, standard or policy.

Answer: C

Explanation:
Explanation
Microsoft Purview Compliance Manager is a feature in the Microsoft Purview compliance portal that helps you manage your organization's compliance requirements with greater ease and convenience. Compliance Manager can help you throughout your compliance journey, from taking inventory of your data protection risks to managing the complexities of implementing controls, staying current with regulations and certifications, and reporting to auditors.
Watch the video below to learn how Compliance Manager can help simplify how your organization manages compliance:
Compliance Manager helps simplify compliance and reduce risk by providing:
Pre-built assessments for common industry and regional standards and regulations, or custom assessments to meet your unique compliance needs (available assessments depend on your licensing agreement; learn more).
Workflow capabilities to help you efficiently complete your risk assessments through a single tool.
Detailed step-by-step guidance on suggested improvement actions to help you comply with the standards and regulations that are most relevant for your organization. For actions that are managed by Microsoft, you'll see implementation details and audit results.
A risk-based compliance score to help you understand your compliance posture by measuring your progress in completing improvement actions.

NEW QUESTION # 72

Match the types of compliance score actions to the appropriate tasks.
To answer. drag the appropriate action type from the column on the left to its task on the right. Each type may be used once. more than once, or not at all.
NOTE: Each correct match is worth one point.

Compliance score action	Answer Area	
Corrective	Action	Use encryption to protect data at rest.
Detective	Action	Actively monitor systems to identify irregularities that might represent risks.
Preventative		

Answer:

Explanation:

Compliance score action	Answer Area	
Corrective	Preventative	Use encryption to protect data at rest.
Detective	Detective	Actively monitor systems to identify irregularities that might represent risks.
Preventative		

NEW QUESTION # 73
To which type of resource can Azure Bastion provide secure access?

- A. Azure SQL Managed Instances
- B. Azure App Service
- C. Azure virtual machines
- D. Azure Files

Answer: C

Explanation:
Azure Bastion is a managed PaaS service that provides secure and seamless RDP/SSH connectivity to your Azure virtual machines directly from the Azure portal over TLS/HTTPS. SCI and Azure security documentation summarize it as eliminating public IP exposure on VMs by using a fully managed bastion host deployed inside your virtual network. Users connect through their browser and the service brokers the RDP or SSH session, which "protects your VMs from exposing RDP/SSH to the Internet." Bastion does not provide access to Azure Files, SQL Managed Instance, or App Service; it is specifically built to secure management access to VMs without requiring a VPN or public endpoints. Therefore, the resource type Azure Bastion securely connects to is Azure virtual machines.

NEW QUESTION # 74
......

We're committed to ensuring you have access to the best possible SC-900 questions. We offer SC-900 dumps in PDF, web-based practice tests, and desktop practice test software.
