最新的100-160認證考試的參考資料

如果你使用了在Fast2test的100-160考古題之後還是在100-160認證考試中失敗了，那麼你可以拿回你當初購買資料時需要的全部費用。這就是Fast2test對廣大考生的承諾。優秀的資料不是只靠說出來的，更要經受得住大家的考驗。Fast2test的資料完全可以經受得住時間的檢驗。Fast2test能有現在的成就都是大家通過實踐得到的成果。因為是真實可靠的，所以Fast2test的資料才能經過這麼長的時間後越來越受到大家的歡迎。

最新的 Cisco CCST 100-160 免費考試真題 (Q359-Q364):

問題 #359

Which of the following is an example of a source of evidence (artifact) in a cybersecurity investigation?

- A. Firewall logs recording network traffic.
- B. Configuration files of network devices.
- C. Security policy documents.
- D. Training materials for security awareness.

答案： A

解題說明：

In a cybersecurity investigation, evidence or artifacts play a crucial role in determining the nature of an incident. Firewall logs recording network traffic can provide valuable information regarding communication between systems, including IP addresses, ports, protocols, and timestamps. Analyzing these logs can help identify potential threats or suspicious activities within a network.

問題 #360

Your company is creating a BYOD policy to allow employees to join their personal smartphones to the company network. Which three requirements are commonly included in a BYOD policy? (Choose 3.)

- A. Synchronization of phone lock screen password with network access password
- B. Installation of secure apps only
- C. Configuration of a strong password
- D. Upgrade of data plan to maximum available
- E. Encryption of stored confidential corporate data
- F. Deletion of all personal data from the phone

答案： B,C,E

解題說明：

The CCST Cybersecurity Study Guide explains that a BYOD policy (Bring Your Own Device) should outline security requirements for personally owned devices connecting to the corporate network. Common requirements include:

Device encryption for stored sensitive corporate data.

Strong password or PIN configuration for device access.

Restriction to secure and approved applications to reduce malware risk.

"BYOD policies typically mandate strong authentication, encryption of sensitive corporate data on personal devices, and installation of secure or approved applications. The goal is to protect corporate information while respecting personal ownership of the device." (CCST Cybersecurity, Endpoint Security Concepts, BYOD Security section, Cisco Networking Academy) A is incorrect: BYOD policies do not require deletion of personal data unless wiping after separation.

B is not a common requirement due to privacy and technical limitations.

E (upgrading data plans) is unrelated to security.

問題 #361

What is the purpose of using an application firewall in a cybersecurity setup?

- A. To block malicious incoming requests and attacks aimed at the application
- B. To increase the speed and performance of applications
- C. To perform vulnerability scanning of applications
- D. To encrypt network traffic between applications

答案： A

解題說明：

An application firewall, also known as a web application firewall (WAF) or application-level firewall, is designed to protect web applications from various attacks, such as cross-site scripting (XSS), SQL injection, and distributed denial-of-service (DDoS) attacks. It analyzes the incoming traffic and blocks malicious requests, protecting the application and its underlying infrastructure. Encryption, speed enhancement, and vulnerability scanning are not primary functions of an application firewall.

問題 #362

Which of the following is an example of a web application vulnerability that can be exploited by an attacker?

- A. Cross-site scripting (XSS)
- B. Buffer overflow
- C. Network latency
- D. Disk fragmentation

答案： A

解題說明:

Cross-site scripting (XSS) is a web application vulnerability where an attacker injects malicious code into a trusted website, which then executes on the victim's browser. This vulnerability can allow attackers to steal sensitive information, perform phishing attacks, or deliver malware. Disk fragmentation, network latency, and buffer overflow are not examples of web application vulnerabilities; they refer to other aspects of computing performance and security.

問題 #363

When ranking risks, which of the following factors should be considered?

- A. The cost associated with mitigating a risk.
- **B. All of the above.**
- C. The potential impact or consequences of a risk.
- D. The likelihood of a risk occurring.

答案: B

解題說明:

When ranking risks, it is important to consider multiple factors including the likelihood of a risk occurring, the potential impact or consequences of the risk, and the cost associated with mitigating the risk. Considering all these factors together helps prioritize the risks and allocate appropriate resources for risk management.

問題 #364

.....

面對競爭激勵的世界，唯有考取和別人不一樣的證照，才可以充實自己，知識就是力量。購買 Cisco 100-160 題庫，可以免費享受一年的更新題庫的售後服務，在購買前享有免費試用部分考題DEMO。我們提供PDF和軟體格式的考題，其中PDF版本可以列印，軟體版的題庫可以模擬真實的 Cisco 的 100-160 考試。正確率100%，考生可以參照最新的 100-160 認證部分考題。

100-160認證題庫: <https://tw.fast2test.com/100-160-premium-file.html>

當 100-160認證題庫 - Cisco Certified Support Technician (CCST) Cybersecurity 考古題被更新時，我們會馬上將最新版的資料發送到你的郵箱，Fast2test的 Cisco的100-160的考題資料是你們成功的源泉，有了這個培訓資料，只會加快你們成功的步伐，讓你們成功的更有自信，也是保證讓你們成功的砒碼，可以保證你第一次參加 100-160 認證考試就以高分順利通過，Cisco 100-160熱門題庫 你有想過選擇一個針對性的培訓嗎，但是要想通過100-160資格認證卻不是一件簡單的事，我們的網站一直是行業的佼佼者，十多年來能夠一直屹立不倒以及不斷發展壯大都是因為Fast2test以其專業性和全面性在業界擁有超好的口碑和滿意度，相信您使用我們的Cisco 100-160考古題一定能幫助您順利通過認證考試，能讓你充滿信心地面對 100-160 認證考試。

李運注意到了這壹點，說是附近，其實也足有十多裏遠，當 Cisco Certified Support Technician (CCST) Cybersecurity 考古題被更新時，我們會馬上將最新版的資料發送到你的郵箱，Fast2test的 Cisco的100-160的考題資料是你們成功的源泉，有了這個培訓資料，只會加快你們成功的步伐，讓你們成功的更有自信，也是保證讓你們成功的砒碼。

確保通過的100-160熱門題庫和資格考試中的領先材料提供者和100%合格率100-160認證題庫

可以保證你第一次參加 100-160 認證考試就以高分順利通過，你有想過選擇一個針對性的培訓嗎，但是要想通過 100-160資格認證卻不是一件簡單的事。
