Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q78-Q83):

NEW QUESTION # 78
An employee at your company does not need access to their Workspace account while they are on leave for a year When they return you need to ensure they have access to their account and that all their data and current emails remain intact Also their shared documents must be available to other users You must accomplish this goal in the most cost-effective way What should you do?

- A. Remove the user license in the Admin console
- B. Delete the user after copying their emails and reassigning their documents to their manager
- C. Suspend their account in the Admin console
- D. Assign an Archive User license

Answer: C

Explanation:
Access the Admin Console: Sign in to your Google Admin console.
Navigate to Users: Click on "Directory" and then "Users."
Find the User Account: Locate the user who is going on leave.
Suspend Account: Click on the user's name to open their account details, then click "Suspend user." Confirm Suspension: Confirm the suspension, which retains all data and settings while disabling access to the account.
Shared Documents: Ensure that their shared documents remain accessible to other users without any interruptions.

Google Workspace Admin Help: Suspend a user

NEW QUESTION # 79
Your global marketing team has over 500 employees. They recently started working with Google Analytics and want to move to managed accounts You decide to use Google Cloud Directory Sync (GCDS) to sync users from your current identity provider Your organization currently has no Google Workspace licenses linked to the Admin console You run GCDS for the first time and receive the following error. "Domain user limit reached " You need to identify and fix the problem What should you do?

- A. Update the delete limits of GCDS and try again
- B. Wait 48 hours until the domain is fully provisioned
- C. Check if GCDS has the correct permissions to run a sync on your domain
- D. Ensure that there is a subscription available and enough licenses to sync the new users

Answer: D

Explanation:
* Verify License Availability: Check the number of available licenses in your Google Workspace subscription.
* Purchase Additional Licenses: If necessary, purchase additional licenses to cover the number of users you plan to sync.
* Configure GCDS: Ensure that Google Cloud Directory Sync (GCDS) is properly configured to sync users from your identity provider.
* Run GCDS: Run the GCDS sync again to sync the new users now that sufficient licenses are available.

NEW QUESTION # 80

A new user at your organization is unable to access Google Meet. You have verified that the user's account is active and the correct licenses are assigned. You need to resolve the access issue. What should you do?

- A. Check the user's browser settings to ensure that Meet is not blocked.
- B. Restart the user's computer to refresh their network connection.
- C. Instruct the user to clear their browser's cache and cookies.
- D. Verify that Meet is enabled as a service for the user's account in the Admin console.

Answer: D

Explanation:
To resolve access issues with Google Meet, it's important to verify that Google Meet is enabled as a service for the user's account in the Admin console. Sometimes, individual services may be disabled for specific users or organizational units, even if the user has the correct license assigned. Ensuring that Google Meet is enabled for the user's account will grant them the necessary access to the service.

NEW QUESTION # 81

Your company is transitioning to Google Workspace from legacy communication and collaboration applications. User accounts are managed in Active Directory and synced to Google Workspace by using Google Cloud Directory Sync (GCDS). Your company is implementing a new security policy for all accounts that requires complex passwords. Passwords must be at least 20 characters long, contain 3 symbols, 4 numbers, and 2 capital letters.
You need to enforce the new password policy in Google Workspace. What should you do?

- A. Share the instructions for changing a Google account password with your users. Monitor password strength in the Google Admin console as users change their passwords.
- B. Create a password policy in Active Directory. Install Password Sync on the global catalog servers for Active Directory and require a password change for your users.
- C. Enable strong password enforcement and require a minimum length of 20 characters at the top-level organizational unit.
- D. Create a password policy in Active Directory. Enable password synchronization in GCDS.

Answer: D

Explanation:
Since user accounts are managed in Active Directory (AD) and synced to Google Workspace via Google Cloud Directory Sync (GCDS), the best approach to enforce the new password policy is to create the password policy within Active Directory and then enable password synchronization in GCDS. This ensures that the complex password requirements are enforced within AD, and when passwords are updated, they will be synchronized with Google Workspace, maintaining consistency across both systems.

NEW QUESTION # 82

Your organization has implemented Single Sign-On (SSO) for the multiple cloud-based services it utilizes. During authentication, one service indicates that access to the SSO provider cannot be accessed due to invalid information.
What should you do?

- A. Verify the Audience Element in the SAML Response matches the Assertion Consumer Service (ACS) URL.
- B. Verify the NameID Element in the SAML Response matches the Assertion Consumer Service (ACS) URL.
- C. Verify the Recipient attribute in the SAML Response matches the Assertion Consumer Service (ACS) URL.
- D. Verify the Subject attribute in the SAML Response matches the Assertion Consumer Service (ACS) URL.

Answer: A
