

# New Cyber AB CMMC-CCA Test Objectives - New CMMC-CCA Test Camp

P.S. Free 2026 Cyber AB CMMC-CCA dumps are available on Google Drive shared by Pass4guide: [https://drive.google.com/open?id=1DBPbHh3zjkk1OnlcGQw4d9t\\_-w7CA7u-](https://drive.google.com/open?id=1DBPbHh3zjkk1OnlcGQw4d9t_-w7CA7u-)

One year of free Cyber AB CMMC-CCA test questions updates are included in the SnowPro Core Certification test CMMC-CCA quiz package. This means that if any changes are made to the Certified CMMC Assessor (CCA) Exam (CMMC-CCA) exam, you will be able to obtain the updated Cyber AB CMMC-CCA Test Questions preparation immediately. This is a great method to keep up to date on the latest Certified CMMC Assessor (CCA) Exam (CMMC-CCA) questions information and ensure you pass the Certified CMMC Assessor (CCA) Exam (CMMC-CCA) with ease.

## Cyber AB CMMC-CCA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Evaluating Organizations Seeking Certification (OSC) against CMMC Level 2 Requirements: This section of the exam measures skills of cybersecurity assessors and focuses on evaluating the environments of organizations seeking certification at CMMC Level 2. It covers understanding differences between logical and physical settings, recognizing constraints in cloud, hybrid, on-premises, single, and multi-site environments, and knowing what environmental exclusions apply for Level 2 assessments.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>CMMC Assessment Process (CAP): This section of the exam measures skills of compliance professionals and tests knowledge of the full assessment lifecycle. It covers the steps needed to plan, prepare, conduct, and report on a CMMC Level 2 assessment, including the phases of execution and how to document and follow up on findings in alignment with DoD and CMMC-AB expectations.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>CMMC Level 2 Assessment Scoping: This section of the exam measures skills of cybersecurity assessors and revolves around determining the proper scope of a CMMC assessment. It involves analyzing and categorizing Controlled Unclassified Information (CUI) assets, interpreting the Level 2 scoping guidelines, and making accurate judgments in scenario-based exercises to define what assets and systems fall within assessment boundaries.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Assessing CMMC Level 2 Practices: This section of the exam measures skills of cybersecurity assessors in evaluating whether organizations meet the required practices of CMMC Level 2. It emphasizes applying CMMC model constructs, understanding model levels, domains, and implementation, and using evidence to determine compliance with established cybersecurity practices.</li> </ul>

**New CMMC-CCA Test Camp, CMMC-CCA Valid Vce**

Even you have no basic knowledge about the CMMC-CCA study materials. You still can pass the exam with our help. The key point is that you are serious on our CMMC-CCA exam questions and not just kidding. Our CMMC-CCA practice engine can offer you the most professional guidance, which is helpful for your gaining the certificate. And our CMMC-CCA learning guide contains the most useful content and keypoints which will come up in the real exam.

## Cyber AB Certified CMMC Assessor (CCA) Exam Sample Questions (Q90-Q95):

### NEW QUESTION # 90

While reviewing CA.L2-3.12.3: Security Control Monitoring, the CCA notices that the assessment period is defined as one year. An OSC's SSP states that under CA.L2-3.12.3, security controls are monitored using the same one-year periodicity to ensure the continued effectiveness of the controls. The assessor understands that some CMMC practices can reference other practices for the entirety of their implementation. Is the OSC's implementation under CA.L2-3.12.3: Security Control Monitoring acceptable?

- A. Yes, as long as CA.L2-3.12.1 has been scored as MET, they do need to be monitored.
- B. Yes, a one-year period for security control monitoring is acceptable.
- C. No, even when referencing other practices more description is always needed.
- D. No, monitoring must be conducted on an ongoing basis to ensure continued effectiveness.

**Answer: D**

Explanation:

The requirement for CA.L2-3.12.3 - Security Control Monitoring mandates monitoring to be performed on an ongoing basis to ensure the continued effectiveness of the controls. This is not satisfied by a yearly review alone.

CA.L2-3.12.3 Security Control Monitoring - Monitor security controls on an ongoing basis to ensure the continued effectiveness of the controls.

The OSC's statement in their SSP that monitoring occurs on a one-year periodic basis fails to meet this requirement, because the term "ongoing basis" implies continual or recurring monitoring activities that occur throughout the system's lifecycle-not a single annual review.

Therefore, the assessor must determine that the OSC's implementation is not acceptable.

Reference: CMMC 2.0, Level 2 Practice CA.L2-3.12.3 (CMMC Assessment Guide - Level 2, Official CCA material).

### NEW QUESTION # 91

An OSC is preparing for assessment. Which item of evidence would show the OSC's efforts to restrict physical access within the OSC's environment?

- A. Documented OSC procedures
- B. Network architecture drawings
- C. Switch configuration files
- D. VPN configuration

**Answer: A**

Explanation:

\* Applicable Requirement: PE.L2-3.10.1 - "Limit physical access to organizational information systems, equipment, and the respective operating environments to authorized individuals."

\* Why D is Correct: Documented procedures describing physical access restrictions (badge policies, visitor management, locked server rooms, guard post orders) serve as primary evidence that access is managed and enforced. Assessors can then corroborate via interviews and observation.

\* Why Other Options Are Insufficient:

\* A (VPN configuration): Relates to remote logical access, not physical security.

\* B (Switch configs): Technical network controls, not physical access.

\* C (Architecture drawings): Show logical/system design, not physical entry restrictions.

References (CCA Official Sources):

\* NIST SP 800-171 Rev. 2 - PE.L2-3.10.1

\* NIST SP 800-171A - PE.L2-3.10.1 Assessment Objectives

\* CMMC Assessment Guide - Level 2 - Physical Protection Evidence Guidance

### NEW QUESTION # 92

SecureNet is a mid-sized company that designs and manufactures access control systems for government buildings. These systems utilize Internet of Things (IoT) devices embedded within the access control panels for real-time remote monitoring. SecureNet is undergoing a CMMC Level 2 assessment to comply with new government contracting requirements. During the scope validation stage, the Certified CMMC Assessor (CCA) will review SecureNet's proposed assessment scope with the IT team. The scope includes all servers, workstations, and laptops within SecureNet's network. However, there is no mention of the IoT devices within the access control panels. Which of the following asset categories is most likely to encompass the in-scope IoT devices used in SecureNet's access control systems?

- A. Hardware Assets
- B. Contractor Risk Managed Asset (CRMA)
- **C. Specialized Assets**
- D. Security Protection Asset (SPA)

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation:

IoT devices in access control panels are Specialized Assets per the CMMC Assessment Scope - Level 2, as they are non-standard equipment tied to contract performance. They may process or transmit CUI-related data (e.g., security monitoring), making them in scope, but they don't inherently provide security functions (Option A) or fit as CRMAs (Option D). "Hardware Assets" (Option C) is not a CMMC category. B is correct, and the IoT devices should be added to the scope.

Reference:

CMMC Assessment Scope - Level 2, Section 2.3.4 (Specialized Assets), p. 6: "IoT devices are Specialized Assets."

### NEW QUESTION # 93

You are the Lead Assessor for a CMMC Assessment engagement with an OSC for CMMC Level 2. The OSC has provided you with their proposed CMMC Assessment Scope, which includes a network schematic diagram, their SSP, relevant policies, and organizational charts. During your review of the documentation, you notice they have excluded a subsidiary company's network and assets from the proposed CMMC Assessment Scope despite the subsidiary being involved in handling CUI related to federal contracts. If the OSC insists on excluding the subsidiary's network and assets from the CMMC Assessment Scope despite your recommendation to include them, what should you do?

- A. Proceed with the Assessment based on the OSC's proposed scope, as the OSC has the final authority to determine the scope.
- B. Escalate the issue to the CMMC Accreditation Body for further guidance and resolution.
- **C. Terminate the Assessment engagement and take further steps to resolve the disagreements.**
- D. Include the subsidiary's network and assets in the CMMC Assessment Scope without the OSC's consent, as the Lead Assessor has the final authority to determine the scope.

**Answer: C**

Explanation:

Comprehensive and Detailed in Depth Explanation:

The CAP requires that disagreements over the CMMC Assessment Scope be resolved before proceeding, and if unresolvable, the Lead Assessor should terminate the engagement. Excluding CUI-handling assets like the subsidiary's network invalidates the scope, and proceeding (Option C) or forcing inclusion (Option D) violates CAP guidelines. Escalation to Cyber AB (Option B) is not a specified step unless further guidance is needed post-termination. Option A is the correct action per CAP.

Extract from Official Document (CAP v1.0):

\* Section 1.4 - Define Assessment Scope (pg. 13): "If disagreement regarding the CMMC Assessment Scope cannot be resolved with the OSC, the Lead Assessor shall terminate the Assessment engagement." References:

CMMC Assessment Process (CAP) v1.0, Section 1.4.

### NEW QUESTION # 94

While examining controls on the use of portable storage devices, an assessor conducts an interview with a mid-level internal system administrator. The administrator describes the process to check out portable storage devices, which includes a user emailing IT staff directly, verifying that the media classification label matches the data classification, and limiting use of the device to a specified external system.

What is a MISSING element for the assessment of AC.L2-3.1.21: Portable Storage Use?

- A. Method of destruction of portable storage devices
- B. A directory of personnel background checks to be consulted prior to device checkout
- C. An inventory of portable storage devices provided by the National Security Agency
- **D. Recorded management authorization for the use of portable storage devices**

**Answer: D**

Explanation:

AC.L2-3.1.21 requires that the use of portable storage devices be restricted and explicitly authorized. The described process covers labeling and limiting use but does not include documented management authorization.

Extract:

"Restrict the use of portable storage devices on external systems. Authorization for use must be formally documented and approved by management." Thus, the missing element is recorded management authorization.

Reference: CMMC Assessment Guide - Level 2, AC.L2-3.1.21.

## NEW QUESTION # 95

.....

Appropriately, we can wrap up this post with the way that the test centers around the material that is essential to handily clear your Certified CMMC Assessor (CCA) Exam certification exam. You can trust the material and set aside an edge to zero in on those before you win eventually over the last Certified CMMC Assessor (CCA) Exam (CMMC-CCA) exam dates. To get it, find the source that assists you with getting the right test and spotlight on material agreeable for you for organizing the Certified CMMC Assessor (CCA) Exam exam.
