## Test CEM Questions Vce | Reliable CEM Braindumps Sheet

It's not easy for most people to get the CEM guide torrent, but I believe that you can easily and efficiently obtain qualification certificates as long as you choose our products. Interest is the best teacher, so it is only by letting the user have fun in the boring study that they can better put knowledge into their thinking. How perfect CEM Exam Questions are! Maybe you cannot wait to understand our study materials.

## AEE Certified Energy Manager (CEM) Sample Questions (Q30-Q35):

### NEW QUESTION # 30

According to ISO 50001, when performing internal audits on the energy management system in an organization the internal auditor should do which of the following?

SELECT THE CORRECT ANSWER

- A. Assess actual activities as practiced against what the written procedures state
- **B. All of the above**
- C. Look for opportunities for energy improvement and to minimize bureaucracy in the energy management system
- D. Focus on the areas of significant energy use
- E. Review the written procedures related to the area under audit

**Answer: B**

Explanation:

When conducting internal audits of an Energy Management System (EnMS) in accordance with ISO 50001, auditors are expected to perform several key activities to ensure the system's effectiveness and continual improvement. These activities include:

- \* Focus on Areas of Significant Energy Use: Auditors should prioritize auditing areas that have substantial energy consumption, as improvements in these areas can lead to significant energy performance enhancements.
- \* Review Written Procedures Related to the Area Under Audit: A thorough examination of documented procedures ensures that they align with ISO 50001 requirements and organizational practices. This review helps in identifying any discrepancies between documented procedures and actual practices.
- \* Assess Actual Activities Against Written Procedures: Auditors compare on-ground activities with documented procedures to verify compliance and identify deviations. This assessment ensures that operations are performed as intended and in line with established protocols.
- \* Look for Opportunities for Energy Improvement and Minimize Bureaucracy: Identifying opportunities for enhancing energy performance is a core objective of the audit. Auditors should also aim to streamline the EnMS by reducing unnecessary complexities, thereby making it more efficient and user-friendly.

By encompassing all these activities, internal auditors ensure a comprehensive evaluation of the EnMS, leading to effective energy management and continual improvement. Therefore, the correct answer is E. All of the above.

#### NEW QUESTION # 31

A facility replaces a natural gas heating system rated at 10,000 kJ/h and 80% efficiency with an electric heat pump rated at 10,000 kJ/h and a coefficient of performance (COP) of 2.3. Will this project also reduce the annual energy utilization index (EUI) for the facility?

- A. No
- **B. Yes**

**Answer: B**

Explanation:

The Energy Utilization Index (EUI) is measured as total energy consumption per unit area.

Step 1: Compare Energy Inputs for Both Systems

- \* Existing Natural Gas System:
- \* Heating output: 10,000 kJ/h
- \* Efficiency: 80%
- \* Required input energy

□

#### NEW QUESTION # 32

Using the lumen method, calculate the number of luminaires (fixtures) required to light a room to 200 lux.

Each luminaire has 2 fluorescent lamps, 3,000 lumens per lamp. The room is 20 meters by 30 meters. The total light loss factor (LLF) is 0.70 and the luminaire coefficient of utilization (CU) is 0.80.

- **A. 24 luminaires**
- B. 60 luminaires
- C. 36 luminaires
- D. 12 luminaires
- E. 48 luminaires

**Answer: A**

#### NEW QUESTION # 33

You are using a performance contract to finance the added cost of using more-efficient equipment in the construction of a new building. Which of the following International Performance Measurement and Verification Protocol (IPMVP) options would you use to verify annual energy savings?

- A. Option B - Retrofit isolation: all parameter measurement
- B. Option E - Stipulated savings

- C. Option C - Whole facility measurement
- D. Option A - Retrofit isolation: key parameter measurement
- E. Option D - Calibrated simulation

**Answer: C**

#### NEW QUESTION # 34

A compressed air system has a total volume of 247,500 liters. During a 30-minute break in production (air compressor system turned off and no production demand for compressed air), the system pressure drops from 7 bar, gauge (700 kPa, gauge) to 5 bar, gauge (500 kPa, gauge). Calculate the leakage rate in the compressed air system.

- A. 22,750 liters/minute
- B. 8,250 liters/minute
- C. 16,500 liters/minute
- D. 32,000 liters/minute
- E. 48,250 liters/minute

**Answer: C**

#### NEW QUESTION # 35

.....

Do you want to pass your exam by using the least time? CEM exam braindumps of us can do that for you. With skilled professionals to compile and verify, CEM exam dumps of us is high quality and accuracy. You just need to spend 48 to 72 hours on practicing, and you can pass your exam. We are pass guaranteed and money back guaranteed. If you fail to pass the exam, we will give you full refund. Besides, we offer you free demo to have a try before buying CEM Exam Dumps. We also have free update for one year after purchasing.
