## SC-300 Dumps | High-quality Microsoft Identity and Access Administrator 100% Free Test Question

After years of hard work, our SC-300 guide training can take the leading position in the market. Our highly efficient operating system for learning materials has won the praise of many customers. If you are determined to purchase our SC-300 study tool, we can assure you that you can receive an email from our efficient system within 5 to 10 minutes after your payment, which means that you do not need to wait a long time to experience our learning materials. Then you can start learning our SC-300 Exam Questions in preparation for the exam.

Microsoft SC-300 exam is a valuable certification for IT professionals who want to validate their skills in managing identity and access solutions in Microsoft Azure. SC-300 exam covers a range of topics, including access management, identity management, authentication, and authorization. It is recognized by IT professionals and organizations worldwide and is a great way to advance your career in the IT industry. With the increasing demand for cloud-based solutions, the need for robust identity and access management solutions has become more critical than ever, and the Microsoft SC-300 Exam is the perfect way to validate your knowledge and skills in this area.

## Microsoft Identity and Access Administrator Sample Questions (Q252-Q257):

### NEW QUESTION # 252

You have an Azure Active Directory (Azure AD) tenant that contains Azure AD Privileged Identity Management (PIM) role settings for the User administrator role as shown in the following exhibit.

... [ContosoAzureAD](#) > [Identity Governance](#) > [Privileged Identity Management](#) > [ContosoAzureAD](#) > [User Administrator](#) >

### Role setting details - User Administrator

Privileged Identity Management | Azure AD roles

 Edit

#### Activation

SETTING	STATE
Activation maximum duration (hours)	8 hour(s)
Require justification on activation	Yes
Require ticket information on activation	No
On activation, require Azure MFA	Yes
Require approval to activate	Yes
Approvers	None

#### Assignment

SETTING	STATE
Allow permanent eligible assignment	No
Expire eligible assignments after	15 day(s)
Allow permanent active assignment	No
Expire active assignments after	1 month(s)
Require Azure Multi-Factor Authentication on active assignment	No
Require justification on active assignment	No

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

A user who requires access to the User administration role must perform multi-factor authentication (MFA) every [answer choice].

- 8 hours
- 15 days
- 1 month

Before an eligible user can perform a task that requires the User administrator role, the activation must be approved by a [answer choice].

- global administrator only
- global administrator or privileged role administrator
- permanently assigned user administrator
- privileged role administrator only

**Answer:**

**Explanation:**

A user who requires access to the User administration role must perform multi-factor authentication (MFA) every [answer choice].

- 8 hours
- 15 days
- 1 month

Before an eligible user can perform a task that requires the User administrator role, the activation must be approved by a [answer choice].

- global administrator only
- global administrator or privileged role administrator
- permanently assigned user administrator
- privileged role administrator only

**Explanation**

A screenshot of the question and answer choices. The question text is: "A user who requires access to the User administration role must perform multi-factor authentication (MFA) every [answer choice]." The answer choices are: "8 hours", "15 days", and "1 month". The second question text is: "Before an eligible user can perform a task that requires the User administrator role, the activation must be approved by a [answer choice]." The answer choices are: "global administrator only", "global administrator or privileged role administrator", "permanently assigned user administrator", and "privileged role administrator only".

<https://docs.microsoft.com/en-us/azure/active-directory/privileged-identity-management/pim-deployment-plan>

### NEW QUESTION # 253

You have a Microsoft 365 tenant.

You currently allow email clients that use Basic authentication to connect to Microsoft Exchange Online.

You need to ensure that users can connect to Exchange only run email clients that use Modern authentication protocols.

What should you implement?

You need to ensure that use Modern authentication

- A. a compliance policy in Microsoft Endpoint Manager
- B. an application control profile in Microsoft Endpoint Manager
- C. a conditional access policy in Azure Active Directory (Azure AD)
- D. an OAuth policy in Microsoft Cloud App Security

**Answer: C**

### NEW QUESTION # 254

You have an Azure AD tenant that contains the users shown in the following table.

Name	User risk level
User1	Low
User2	Medium
User3	High

You have the Azure AD Identity Protection policies shown in the following table.

Type	Users	User risk	Sign-in risk	Controls
User risk policy	All users	Low and above	Unconfigured	Block access
Sign-in risk policy	All users	Unconfigured	High	Block access

You review the Risky users report and the Risky sign-ins report and perform actions for each user as shown in the following table.

User	Action
User1	Confirm user compromised
User2	Confirm sign-in safe
User3	Dismiss user risk
User4	Confirm user compromised

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can sign in by using multi-factor authentication (MFA).	<input type="radio"/>	<input type="radio"/>
User2 can sign in by using multi-factor authentication (MFA).	<input type="radio"/>	<input type="radio"/>
User3 can sign in from an anonymous IP address.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area

Statements	Yes	No
User1 can sign in by using multi-factor authentication (MFA).	<input type="radio"/>	<input checked="" type="radio"/>
User2 can sign in by using multi-factor authentication (MFA).	<input type="radio"/>	<input checked="" type="radio"/>
User3 can sign in from an anonymous IP address.	<input checked="" type="radio"/>	<input type="radio"/>

### NEW QUESTION # 255

You have a Microsoft Entra tenant that contains a group named Group1 and two users named User1 and User2. User1 is a member of Group1.

You register an enterprise application named App1.

You enable self-service application access for App1 and configure the following settings:

Allow users to request access to this application: Yes

To which group should assigned users be added: Group1

Require approval before granting access to this application: Yes

Who is allowed to approve access to this application: User2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
User1 must request access to App1 before they can use the app.	<input type="radio"/>	<input type="radio"/>
If User2 requests access to App1, they will be added to Group1 automatically.	<input type="radio"/>	<input type="radio"/>
User2 can approve App1 requests by using the Microsoft Entra admin center.	<input type="radio"/>	<input type="radio"/>

**Answer:**

**Explanation:**

Statements	Yes	No
User1 must request access to App1 before they can use the app.	<input type="radio"/>	<input checked="" type="radio"/>
If User2 requests access to App1, they will be added to Group1 automatically.	<input checked="" type="radio"/>	<input type="radio"/>
User2 can approve App1 requests by using the Microsoft Entra admin center.	<input checked="" type="radio"/>	<input type="radio"/>

**Explanation:**

User1 must request access to App1 before they can use the app: No

If User2 requests access to App1, they will be added to Group1 automatically: Yes User2 can approve App1 requests by using the Microsoft Entra admin center: Yes Let's break this down step by step based on Microsoft Entra ID self-service application access and the configured settings, as outlined in Microsoft Identity and Access Administrator documentation.

Understanding Self-Service Application Access in Microsoft Entra ID:

Self-service application access in Microsoft Entra ID allows users to request access to applications without needing an administrator to manually assign them. This is configured on a per-application basis.

The settings for App1 are:

Allow users to request access to this application: Yes- Users can request access to App1.

To which group should assigned users be added: Group1- Users who are granted access will be added to Group1, which provides the necessary permissions to use App1.

Require approval before granting access to this application: Yes- Access requests must be approved before the user is added to Group1.

Who is allowed to approve access to this application: User2- User2 is the designated approver for access requests to App1.

Statement 1: User1 must request access to App1 before they can use the app.

Analysis:

User1 is already a member of Group1, as stated in the question.

The self-service settings specify that users who are granted access to App1 will be added to Group1. This implies that membership in Group1 is what grants access to App1.

Since User1 is already a member of Group1, they already have access to App1. In Microsoft Entra ID, if a user is already assigned to an application (either directly or via group membership), they do not need to request access through the self-service process-they can simply use the app.

The self-service access request process is for users who are not yet assigned to the app (i.e., not in Group1).

Since User1 is already in Group1, they do not need to request access.

Conclusion: This statement is No. User1 does not need to request access because they are already a member of Group1 and can use App1 immediately.

Statement 2: If User2 requests access to App1, they will be added to Group1 automatically.

Analysis:

User2 is not a member of Group1 (the question does not state that User2 is in Group1).

The self-service settings allow users to request access to App1, and the setting "To which group should assigned users be added: Group1" means that users who are granted access will be added to Group1.

However, the setting "Require approval before granting access to this application: Yes" means that User2's request must be approved before they are added to Group1. The approver for App1 requests is User2 themselves, which introduces a potential conflict.

In Microsoft Entra ID, if a user is both the requester and the approver, the system typically allows them to approve their own request (unless additional policies prevent this, which is not specified in the question).

Therefore, User2 can request access and approve their own request.

Once the request is approved, User2 will be added to Group1 automatically as per the self-service settings.

The term "automatically" in the statement refers to the process after approval-once approved, the addition to Group1 happens without further manual intervention.

Conclusion:This statement is Yes. If User2 requests access to App1 and approves their own request, they will be added to Group1 automatically.

Statement 3: User2 can approve App1 requests by using the Microsoft Entra admin center.

Analysis:

The self-service settings specify that User2 is the designated approver for access requests to App1.

In Microsoft Entra ID, approvers can manage access requests through the Microsoft Entra admin center (via the "My Access" portal or the "Access Requests" section, depending on their role and permissions).

User2, as the designated approver, will receive a notification (via email or the My Access portal) when a request is made. They can then log into the Microsoft Entra admin center, navigate to the access requests section, and approve or deny the request.

Even though User2 is not explicitly an admin, the fact that they are designated as the approver for App1 requests grants them the ability to approve requests through the Microsoft Entra admin center.

Conclusion:This statement is Yes. User2 can approve App1 requests using the Microsoft Entra admin center.

Additional Considerations:

If User2 were not allowed to approve their own request (e.g., due to a separation of duties policy), Statement 2 might be affected. However, Microsoft Entra ID does not enforce such a restriction by default, and the question does not specify any additional policies.

The Microsoft Entra admin center is the primary interface for managing access requests, but users can also approve requests via email links or the My Access portal. The statement specifically mentions the admin center, which is a valid method.

Conclusion:

Statement 1:No- User1 does not need to request access since they are already in Group1.

Statement 2:Yes- User2 will be added to Group1 automatically after their request is approved (by themselves).

Statement 3:Yes- User2 can approve requests using the Microsoft Entra admin center.

## NEW QUESTION # 256

You need to configure app registration in Azure AD to meet the delegation requirements.

What should you do? To answer, select the appropriate options in the answer area.

NOTE:Each correct selection is worth one point.

Azure AD tenant-level setting to modify:

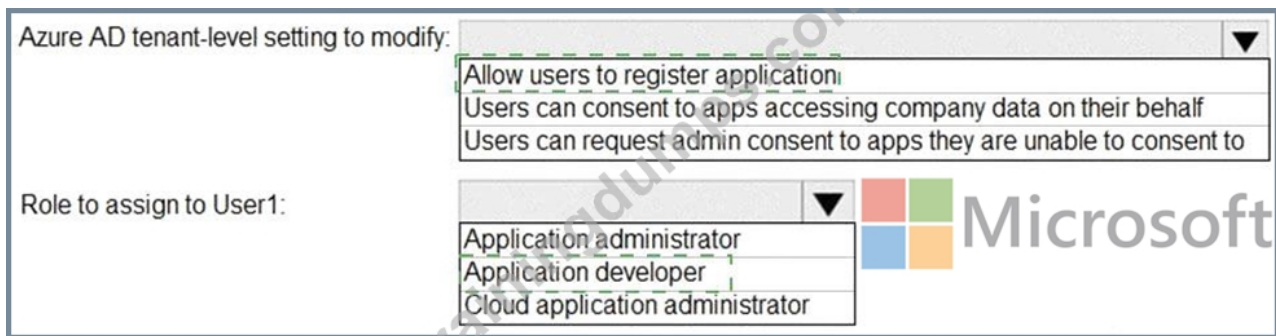

- Allow users to register application
- Users can consent to apps accessing company data on their behalf
- Users can request admin consent to apps they are unable to consent to

Role to assign to User1:

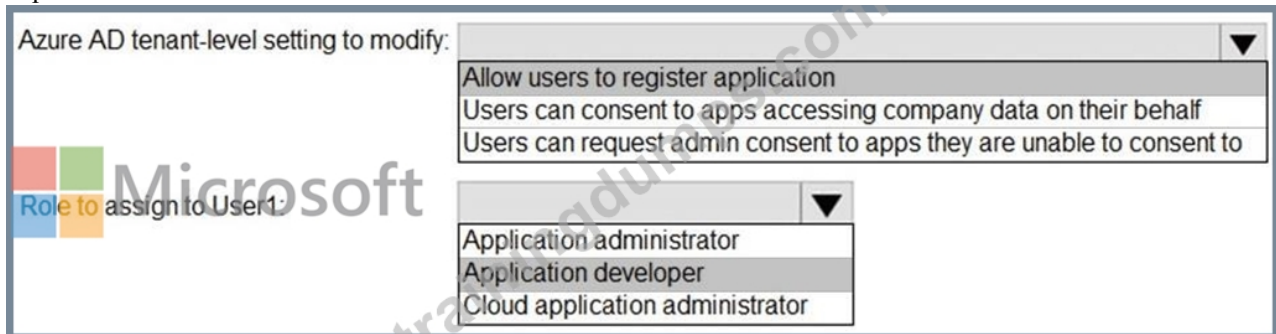

- Application administrator
- Application developer
- Cloud application administrator

Answer:

Explanation:

## NEW QUESTION # 257

.....

The pass rate is 98.75%, and we can ensure you pass the exam successfully if you buying SC-300 exam braindumps from us. Most candidates can pass the exam just one time. And we ensure you that if you can't pass the exam, you just need to send us the failure scanned, we will refund your money. We can ensure you that your money can receive rewards. In addition, we have three versions for SC-300 Training Materials, and you can buy the most suitable in accordance with your own needs.
