最新的 Workspace Administrator Google-Workspace-Administrator 免費考試真題 (Q11-Q16):

問題 #11

Your company has purchased Gemini licenses for a subset of employees. You need to ensure that only users in the marketing and sales departments have access to Gemini features by using the most efficient approach. What should you do?

- A. Create a script to assign a Gemini license to new users if they are in marketing or sales. Run the script daily.
- B. Assign Gemini licenses to each user in the marketing and sales departments.
- C. Enable Gemini for the entire organization. Instruct users in other departments not to use Gemini.
- **D. Create an organizational unit (OU) for marketing and sales. Assign the Gemini licenses to that OU, and enable Gemini for that OU only.**

答案: D

解題說明:

Creating separate organizational units (OUs) for marketing and sales allows you to apply the Gemini licenses to only those departments. By enabling Gemini for just that OU, you ensure that only the employees in marketing and sales have access to Gemini features, ensuring an efficient and scalable solution. This avoids the need for manual assignment or unnecessary instructions to users in other departments.

問題 #12

The CEO of your company heard about new security and collaboration features and wants to know how to stay up to date. You are responsible for testing and staying up to date with new features, and have been asked to prepare a presentation for management. What should you do?

- A. Create a support ticket for the Google Workspace roadmap, and ask to enable the latest release of Google Workspace.
- **B. Subscribe to the Google Workspace release calendar, and Join the Google Cloud Connect Community.**
- C. Download the Google Workspace roadmap, and work together with a deployment specialist for new features.
- D. Change Google Workspace release track to: Rapid Release for faster access to new features.

答案: B

問題 #13

Your sales team, which is organized as its own organizational unit, is prone to receiving malicious attachments. What action should you take, as an administrator, to apply an additional layer of protection in the admin console for your sales team without disrupting business operation?

- A. Configure an attachment compliance rule to strip any attachments received by users within the sales team organizational unit.
- B. Configure an attachment compliance rule to send any emails with attachments received by users within the sales team organizational unit to an administrator quarantine.
- C. Update the Email Allowlist in the admin console to only include IP addresses of known senders.
- **D. Configure the security sandbox feature on the sales team organizational unit.**

答案: D

解題說明:

Access Admin Console: Log in to the Google Admin console.

Navigate to Security Settings: Go to Security > Sandbox.

Configure Security Sandbox: Enable the security sandbox feature and apply it to the sales team's organizational unit.

Policy Setup: Configure policies to ensure that email attachments received by the sales team are automatically analyzed in the security sandbox.

Monitor and Review: Regularly monitor the sandbox reports and adjust the settings as needed to maintain protection without disrupting business operations.

問題 #14

After a recent transition to Google Workspace, helpdesk has received a high volume of password reset requests and cannot respond in a timely manner. Your manager has asked you to determine how to resolve these requests without relying on additional staff.

What should you do?

- A. Create a custom Apps Script to reset passwords.
- B. Create a Google form to submit reset requests.
- **C. Enable non-admin password recovery.**
- D. Use a third-party tool for password recovery.

答案: C

問題 #15

A user does not follow their usual sign-in pattern and signs in from an unusual location.
What type of alert is triggered by this event?

- A. Leaked password alert.
- **B. Suspicious login activity alert.**
- C. Suspicious mobile activity alert.
- D. User sign-in alert.

答案: B
