It is a software application which can be installed and it stimulates the real exam's environment and atmosphere. It builds the users' confidence and the users can practice and learn our AP-222 learning guide at any time.

Salesforce Public Sector Solutions Accredited Professional Sample Questions (Q65-Q70):

NEW QUESTION # 65

A government agency wants to automate the validation of an applicant's date of birth from a driver's license or passport. Which features are required to automate the validation of the date of birth?

- A. Attachments
- **B. Intelligent Form Reader**
- C. Files
- D. Content

Answer: B

Explanation:

Intelligent Form Reader is a feature that can be used to automate the validation of an applicant's date of birth from a driver's license or passport. Intelligent Form Reader is a component of OmniStudio, which is part of Public Sector Solutions. It allows users to upload documents or images and extract data from them using optical character recognition (OCR) or artificial intelligence (AI). It can also validate the extracted data against Salesforce records or external sources. Reference:

[id=psc_admin_setup_intelligent_form_reader.htm&type=5&language=en_US](https://help.salesforce.com/s/articleView?id=psc_admin_setup_intelligent_form_reader.htm&type=5&language=en_US)

NEW QUESTION # 66

A Public Sector Organization (PSO) is currently managing an ongoing emergency by utilizing Emergency Response Management. The PSO would like to .. further insights and use their data in Salesforce to help them analyze their data and understand where they need to increase their focus.

What are two preconfigured Dashboards available in the Emergency Response Management package that the Technical Consultant can recommend to the PSO for rapid rollout?

- A. Emergency Requests Overview
- B. Visits
- **C. Emergency Hotspots**
- **D. Global Emergency View**

Answer: C,D

Explanation:

For a Public Sector Organization utilizing Emergency Response Management within Salesforce, the preconfigured dashboards like Global Emergency View and Emergency Hotspots are invaluable tools. The Global Emergency View dashboard provides a comprehensive overview of emergency incidents globally, enabling the organization to monitor situations across different regions. The Emergency Hotspots dashboard focuses on identifying and visualizing areas with high levels of emergency activity, helping the organization to pinpoint where resources and attention are most needed. These dashboards, available within the Emergency Response Management package, facilitate rapid deployment and immediate insights into ongoing emergencies, supporting effective and data-driven response strategies.

NEW QUESTION # 67

A public sector agency is looking to digitize its operations for Emergency Response. As the technical consultant on the project, the expectations are to roll out a public facing portal that allows citizens to submit a simple emergency request with some basic information.

Which two are the correct approaches a consultant should take to meet these objectives?

- A. Build a digital experience site using the Help Center template based on the agency's requirement
- **B. Leverage prebuilt Emergency Service Request flow.**
- **C. Build a digital experience site using pre-configured emergency response management (ERM) specific template**
- D. Create a custom Case Record Type and leverage a prebuilt Contact Support Form

Answer: B,C

Explanation:

Building a digital experience site using pre-configured emergency response management (ERM) specific template and leveraging prebuilt Emergency Service Request flow are two correct approaches to meet the objectives of providing a way for citizens to submit a simple emergency request with some basic information.

The ERM specific template is a prebuilt template that comes with Community Response for Public Sector, which is a prebuilt app that comes with Public Sector Solutions. It can help public sector agencies to create and manage emergency response programs and services, and enable citizens to access resources and submit requests. The Emergency Service Request flow is a prebuilt flow that comes with the ERM specific template.

It can allow citizens to submit a simple emergency request with some basic information, such as their name, contact details, location, and service type. Reference: https://help.salesforce.com/s/articleView?id=psc_admin_setup_community_response.htm&type=5&language=en_US

NEW QUESTION # 68

A government agency recently implemented Inspections Management, but the internal users want an easier way to generate Visits. Currently, the users must navigate to the Related List tab on an Application, scroll to the Visits* related list and click 'New.' The users also have to manually fill all of the fields when creating the Visit record. What is the recommended approach for creating a better user experience when creating a Visit?

- A. Change the Business License Application and Individual Application pages to have a single related list of Visits on the right panel.
- B. Advise the government agency that the current method is the best option available without custom code, which they should avoid wherever possible.
- C. Create a new Action on the Business License Application and Individual Application objects to create a Visit record with Predefined Field Values.
- **D. Create a Screen Flow with the required fields to create a Visit record and add the button to launch the flow on the page layout.**

Answer: D

Explanation:

Creating a Screen Flow or creating a new Action are two possible approaches for creating a better user experience when creating a Visit. A Screen Flow is a type of flow that can create an interactive user interface to display information or collect data from users. A Screen Flow can have the required fields to create a Visit record and it can be launched by a button on the page layout. An Action is a type of button that can perform tasks such as creating or updating records. An Action can have Predefined Field Values that can automatically populate fields when creating a Visit record. NEW QUESTION # 69

The Department of Disaster Assistance is implementing Grants Management using Public Sector Solutions. One of the pain points in the current process is that every grant application reviewer follows a different business process to review the applications received. A solution has been engaged to standardize this process using the Public Sector Solution toolkit. What should be the best solution to achieve this task?

- A. Develop a standard set of processes/guides to coach the reviewers and ask them to follow them without fail.
- B. Use a screen flow on Accounts to define due diligence steps, related tasks, and documents to collect.
- **C. Use Action Plans on Accounts to define due diligence steps, related tasks, and documents to collect.**
- D. Create a guided omniscrypt guided process to define due diligence steps, related tasks, and documents to collect.

Answer: C

Explanation:

Using Action Plans on Accounts to define due diligence steps, related tasks, and documents to collect is the best solution to standardize the business process for reviewing grant applications. Action Plans are a feature of Public Sector Solutions that can help public sector agencies to create and manage tasks and subtasks for different types of records, such as accounts or cases. Action Plans can be used to define due diligence steps, such as verifying eligibility or checking references, related tasks, such as sending emails or making calls, and documents to collect, such as financial statements or tax returns. Action Plans can also be applied to grant applications using the Account object, which is a standard object that can store information about grant applicants or recipients.
