

# New 1Z0-1072-25 Real Test - Exam 1Z0-1072-25 Actual Tests

BTW, DOWNLOAD part of Exams-boost 1Z0-1072-25 dumps from Cloud Storage: [https://drive.google.com/open?id=1JdvTIXCLA\\_NR3OeQyGFVzTK3GyGsuunj](https://drive.google.com/open?id=1JdvTIXCLA_NR3OeQyGFVzTK3GyGsuunj)

when you buy our 1Z0-1072-25 simulating exam, our website will use professional technology to encrypt the privacy of every user to prevent hackers from stealing. We believe that business can last only if we fully consider it for our customers, so we will never do anything that will damage our reputation. Hope you can give our 1Z0-1072-25 Exam Questions full trust, we will not disappoint you. And with our 1Z0-1072-25 study materials, you are bound to pass the exam.

## Oracle 1Z0-1072-25 Exam Syllabus Topics:

| Topic   | Details   |
|---------|---|
| Topic 1 | <ul style="list-style-type: none"> <li>• <b>Networking:</b> Targeting network architects designing secure cloud architectures, this domain focuses on Virtual Cloud Network (VCN) implementation, including subnet design, IP address management, and routing through gateways (NAT, service, internet). It assesses expertise in VPN</li> <li>• FastConnect deployment, DNS configuration, load balancer setup, and advanced tools like Network Path Analyzer for troubleshooting latency or connectivity issues.</li> </ul> |
| Topic 2 | <ul style="list-style-type: none"> <li>• <b>Compute:</b> This section measures skills of cloud architects responsible for designing scalable and resilient infrastructure, covering compute instance configuration, autoscaling policies, and OS management. It evaluates understanding of OCI compute image options, infrastructure maintenance processes, and strategies for optimizing instance performance across availability domains.</li> </ul>  |
| Topic 3 | <ul style="list-style-type: none"> <li>• <b>Storage:</b> Designed for storage administrators managing enterprise data solutions, this section tests proficiency in deploying Block</li> <li>• File</li> <li>• Object Storage with lifecycle management, cross-region replication, and tiered storage strategies. It includes configuring volume groups, snapshots, versioning, and security controls while analyzing storage performance metrics and cost optimization techniques.</li> </ul>                                 |
| Topic 4 | <ul style="list-style-type: none"> <li>• <b>Identity and Access Management (IAM):</b> This domain validates skills of security architects implementing granular access controls, emphasizing IAM policy creation, compartment organization, and dynamic group configuration. It covers identity domain management, network source restrictions, and tag-based access mechanisms to enforce least-privilege principles across OCI resources</li> </ul>   |

**2026 1Z0-1072-25: Oracle Cloud Infrastructure 2025 Architect Associate**

## Realistic New Real Test 100% Pass Quiz

Our company is a professional certificate study materials provider. We have occupied in this field for years, we are in the leading position of providing exam materials. 1Z0-1072-25 training materials of us is high-quality and accurate, for we have a profession team to verify and update the 1Z0-1072-25 answers and questions. We have received many good feedbacks from our customers for helping pass the exam successfully. Furthermore, we provide you free update for one year after purchasing 1Z0-1072-25 exam dumps from us.

### Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q34-Q39):

#### NEW QUESTION # 34

Which statement is NOT true about the Oracle Cloud Infrastructure (OCI) Object Storage service?

- A. Object Versioning is enabled at the namespace level.
- B. Immutable option for data stored in Object Storage can be set via retention rules.
- **C. Object Storage resources can be shared across tenancies.**
- D. Object lifecycle rules can be used to archive or delete objects.

**Answer: C**

Explanation:

Oracle Cloud Infrastructure (OCI) Object Storage is a scalable, highly durable service that allows you to store any type of data in a secure and cost-effective manner. The correct and incorrect statements regarding OCI Object Storage are as follows:

A . Immutable Option: You can indeed set an immutable option for data in Object Storage using retention rules. This feature ensures that once data is written, it cannot be modified or deleted until the retention period expires, making it ideal for regulatory compliance.

C . Object Lifecycle Rules: Object lifecycle policies allow you to automate the archiving or deletion of objects based on their age or other criteria, helping manage storage costs and data retention efficiently.

D . Object Versioning: Versioning is enabled at the bucket level, not the namespace level. However, once enabled for a bucket, it helps retain, retrieve, and restore every version of every object stored in that bucket.

B . Object Storage Sharing Across Tenancies: This statement is not true. OCI Object Storage buckets and objects are specific to a tenancy and cannot be shared across different tenancies directly. Access to Object Storage resources is controlled within a single tenancy through IAM policies.

Relevant OCI Documentation:

OCI Object Storage Overview

Object Lifecycle Management

These references provide details on how Object Storage functions and the features available.

#### NEW QUESTION # 35

How many capacity reservations would you create to meet the requirement for high availability and distribution across Availability Domains?

- A. Two
- B. Four
- **C. Three**
- D. One

**Answer: C**

Explanation:

In Oracle Cloud Infrastructure (OCI), to ensure high availability and distribution across Availability Domains (ADs), the recommended approach is as follows:

Capacity Reservations for High Availability: To achieve high availability, especially across all three Availability Domains in a region, you should create three capacity reservations. Each reservation corresponds to one AD, ensuring that your instances or resources are evenly distributed and resilient to AD-level failures.

Why Three: This setup provides redundancy and load distribution across the ADs, meeting the high availability requirements.

Relevant OCI Documentation:

Capacity Reservations

This document outlines how to create and manage capacity reservations to meet high availability and fault tolerance requirements.

### NEW QUESTION # 36

How can an organization securely grant a third-party application access to specific OCI resources?

- A. By sharing user credentials for an OCI administrator
- **B. By configuring the application to utilize Instance Principal**
- C. By creating an IAM policy granting full access to the tenancy
- D. By implementing OAuth 2.0 with the application

**Answer: B**

Explanation:

To securely grant a third-party application access to specific Oracle Cloud Infrastructure (OCI) resources, the recommended approach is to configure the application to use Instance Principal. This method allows the application to authenticate directly with OCI services without needing to manage sensitive credentials like passwords or API keys.

Instance Principals: Enable compute instances to directly make API calls against OCI services, inheriting permissions through IAM policies. This setup is more secure than sharing user credentials, as it avoids hardcoding credentials within the application and leverages OCI's native security features.

Oracle Cloud Infrastructure Documentation: Instance Principals

### NEW QUESTION # 37

Which Traffic Management Steering Policy facilitates the distribution of DNS traffic based on the geographical location of end users?

- A. IP Prefix Steering
- B. ASN Steering
- C. Proximity Steering
- **D. Geolocation Steering**

**Answer: D**

Explanation:

Geolocation Steering in OCI's Traffic Management Steering Policy allows you to distribute DNS traffic based on the geographical location of the end users. This method helps direct users to the nearest regional endpoint, optimizing latency and improving user experience.

Use Cases: Geolocation Steering is commonly used to deliver region-specific content, comply with data residency laws, or optimize service performance by directing traffic to the closest available servers.

Reference:

Oracle Cloud Infrastructure Documentation: Traffic Management Steering Policies

### NEW QUESTION # 38

By default, OCI IAM policies follow the principle of least privilege. What does this principle mean in the context of policy creation?

- A. Policies should be identical for all users within a tenancy.
- B. Policies should grant all possible permissions to simplify access control.
- **C. Policies should provide only the minimum set of permissions required for users to perform their tasks effectively.**
- D. Policies should be written in a complex and technical manner to enhance security.

**Answer: C**

Explanation:

The principle of least privilege is a security best practice that dictates that users should only be granted the minimum set of permissions necessary to perform their tasks. This principle helps to minimize the risk of accidental or malicious actions that could compromise security.

IAM Policies in OCI: When creating IAM policies in OCI, you should carefully evaluate the required permissions and only grant those that are absolutely necessary for the users or groups to perform their specific roles. This helps to reduce the attack surface and prevent unauthorized access to sensitive resources.

Oracle Cloud Infrastructure Documentation: Identity and Access Management (IAM) Best Practices

## NEW QUESTION # 39

.....

Preparing with Exams-boost Oracle Cloud Infrastructure 2025 Architect Associate (1Z0-1072-25) practice exam would be the most effective way to get success. Exams-boost would give you access to Oracle Cloud Infrastructure 2025 Architect Associate (1Z0-1072-25) exam questions that are factual and unambiguous, as well as information that is important for the preparation of the 1Z0-1072-25 1Z0-1072-25 exam.
