

CloudSec-Pro Questions Exam | Valid CloudSec-Pro Test Materials

Whether you are a student or a professional who has already taken part in the work, you must feel the pressure of competition now. However, no matter how fierce the competition is, as long as you have the strength, you can certainly stand out. And our CloudSec-Pro exam questions can help on your way to be successful. Our data shows that 98% to 100% of our worthy customers passed the CloudSec-Pro Exam and got the certification. And we believe you will be the next one as long as you buy our CloudSec-Pro study guide.

You will need to pass the Palo Alto Networks CloudSec-Pro exam to achieve the Palo Alto Networks Cloud Security Professional (CloudSec-Pro) certification. Due to extremely high competition, passing the Palo Alto Networks Cloud Security Professional (CloudSec-Pro) exam is not easy; however, possible. You can use Lead1Pass products to pass the Palo Alto Networks Cloud Security Professional (CloudSec-Pro) exam on the first attempt. The Palo Alto Networks Cloud Security Professional (CloudSec-Pro) practice exam gives you confidence and helps you understand the criteria of the testing authority and pass the Palo Alto Networks Cloud Security Professional (CloudSec-Pro) exam on the first attempt.

>> CloudSec-Pro Questions Exam <<

High Hit Rate Palo Alto Networks Cloud Security Professional Test Torrent Has a High Probability to Pass the Exam

The most notable feature of our CloudSec-Pro learning quiz is that they provide you with the most practical solutions to help you learn the exam points of effortlessly and easily, then mastering the core information of the certification course outline. Their quality of our CloudSec-Pro Study Guide is much higher than the quality of any other materials, and questions and answers of CloudSec-Pro training materials contain information from the best available sources.

Palo Alto Networks Cloud Security Professional Sample Questions (Q22-Q27):

NEW QUESTION # 22

A customer has Defenders connected to Prisma Cloud Enterprise. The Defenders are deployed as a DaemonSet in OpenShift.

How should the administrator get a report of vulnerabilities on hosts?

- **A. Navigate to Monitor > Vulnerabilities > Hosts**
- B. Navigate to Defend > Vulnerabilities > Hosts
- C. Navigate to Defend > Vulnerabilities > VM Images
- D. Navigate to Monitor > Vulnerabilities > CVE Viewer

Answer: A

Explanation:

To view the vulnerabilities identified on a host, navigating to the "Monitor > Vulnerabilities > Hosts" section within the Prisma Cloud Console is the correct approach. This section is specifically designed to provide a comprehensive overview of all detected vulnerabilities within the host environment, offering detailed insights into each vulnerability's nature, severity, and potential impact. This pathway allows users to efficiently assess the security posture of their hosts, prioritize vulnerabilities based on their severity, and take appropriate remediation actions. The "Hosts" section under "Vulnerabilities" is tailored to display vulnerabilities related to host configurations, installed software, and other host-level security concerns, making it the ideal location within the Prisma Cloud Console for this purpose.

NEW QUESTION # 23

What must be created in order to receive notifications about alerts generated when the operator is away from the Prisma Cloud Console?

- A. Offline alert
- B. Alarm rule
- C. Notification rule
- **D. Alert rule**

Answer: D

Explanation:

<https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin/manage-prisma-cloud-alerts/prisma-cloud-alert-notifications>

NEW QUESTION # 24

Which two statements apply to the Defender type Container Defender - Linux?

- **A. It is implemented as runtime protection in the userspace.**
- **B. It is deployed as a container.**
- C. It is deployed as a service.
- D. It is incapable of filesystem runtime defense.

Answer: A,B

Explanation:

The Defender type "Container Defender - Linux" in Prisma Cloud is typically deployed as a container. This deployment method allows the Defender to integrate seamlessly into containerized environments, providing runtime protection and monitoring for container activities. By running as a container, the Container Defender can leverage the native capabilities of the container orchestration platform, such as Kubernetes, to provide security features like threat detection, vulnerability management, and compliance enforcement within the containerized environment. This approach ensures that the security protections are closely aligned with the dynamic and scalable nature of containerized applications.

NEW QUESTION # 25

Which data security default policy is able to scan for vulnerabilities?

- **A. Objects containing Malware**
- B. Objects containing Exploits
- C. Objects containing Vulnerabilities
- D. Objects containing Threats

Answer: A

Explanation:

The data security default policy capable of scanning for vulnerabilities is "Objects containing Malware". In cloud security, malware scanning is an essential feature of CSPM tools that allows for the identification of malicious software within objects stored in the cloud. A policy that scans for objects containing malware ensures that any files or code bases in the cloud environment are examined for potential threats, protecting the cloud resources from being compromised.

NEW QUESTION # 26

What is the default namespace created by Defender DaemonSet during deployment?

- A. Defender
- **B. Twistlock**
- C. Default
- D. Redlock

Answer: B

Explanation:

the default when using the script is twistlock, but you can use whatever you want. https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin-compute/configure/set_diff_paths_daemon_sets

NEW QUESTION # 27

.....

In the Web-Based Palo Alto Networks CloudSec-Pro Practice Exam, the Palo Alto Networks Cloud Security Professional (CloudSec-Pro) exam dumps given are actual and according to the syllabus of the test. This Palo Alto Networks Cloud Security Professional (CloudSec-Pro) practice exam is compatible with all operating systems like Mac, Linux, IOS, Android, and Windows. Likewise, this Palo Alto Networks Cloud Security Professional (CloudSec-Pro) practice test is browser-based so it needs no special installation to function properly. Firefox, Chrome, IE, Opera, Safari, and all the major browsers support this Palo Alto Networks Cloud Security Professional (CloudSec-Pro) practice exam.
