Valid FCSS_SASE_AD-24 Exam Experience | FCSS_SASE_AD-24 Test Pdf

BONUS!!! Download part of Prep4sureGuide FCSS_SASE_AD-24 dumps for free: https://drive.google.com/open?id=1MomG3hsM4bm7UHW5gm5diUjaQYABRbkK

The FCSS_SASE_AD-24 certificate is hard to get. If you really crave for it, our FCSS_SASE_AD-24 guide practice is your best choice. We know it is hard for you to make decisions. You will feel sorry if you give up trying. Also, the good chance will slip away if you keep standing still. Our price is reasonable and inexpensive. You totally can afford for our FCSS_SASE_AD-24 Preparation engine. And we give some discounts from time to time, so you can buy at a more favorable price.

Although the Fortinet FCSS_SASE_AD-24 exam prep is of great importance, you do not need to be over concerned about it. With scientific review and arrangement from professional experts as your backup, and the most accurate and high quality content of our Fortinet FCSS_SASE_AD-24 Study Materials, you will cope with it like a piece of cake. So Fortinet FCSS_SASE_AD-24 learning questions will be your indispensable practice materials during your way to success.

Fortinet FCSS_SASE_AD-24 Test Pdf - FCSS_SASE_AD-24 Latest Training

Regular practice can give you the skills and confidence needed to perform well on your FCSS_SASE_AD-24 exam. By practicing your FCSS - FortiSASE 24 Administrator (FCSS_SASE_AD-24) exam regularly, you can increase your chances of success and make sure that all of your hard work pays off when it comes time to take the test. We understand that every FCSS - FortiSASE 24 Administrator (FCSS_SASE_AD-24) exam taker has different preferences. To make sure that our Fortinet FCSS_SASE_AD-24 preparation material is accessible to everyone, we made it available in three different formats.

Fortinet FCSS_SASE_AD-24 Exam Syllabus Topics:

Topic	Details
Topic 1	• SIA, SSA, and SPA" This section focuses on the skills of Security Administrators in designing security profiles for content inspection and deploying SD-WAN and Zero Trust Network Access (ZTNA) using SASE. Understanding these concepts is crucial for securing access to applications and data across the network.

Topic 2	• SASE Deployment: This domain assesses the capabilities of Cloud Security Architects in deploying SASE solutions. It includes implementing various user onboarding methods, configuring administration settings, and applying security posture checks and compliance rules to ensure a secure environment.
Topic 3	• Analytics: This domain evaluates the skills of Data Analysts in utilizing analytics within FortiSASE. It involves identifying potential security threats using traffic logs, configuring dashboards and logging settings, and analyzing reports for user traffic and security issues to enhance overall security posture.
Topic 4	• SASE Architecture and Components: This section measures the skills of Network Security Engineers and covers the architecture and components of FortiSASE. It includes integrating FortiSASE into a hybrid network, identifying its components, and constructing deployment cases to effectively implement SASE solutions.

Fortinet FCSS - FortiSASE 24 Administrator Sample Questions (Q28-Q33):

NEW QUESTION # 28
Which role does FortiSASE play in supporting zero trust network access (ZTNA) principles?

- A. It integrates with software-defined network (SDN) solutions.
- B. It can identify attributes on the endpoint for security posture check.
- C. It enables VPN connections for remote employees.
- D. It offers hardware-based firewalls for network segmentation.

Answer: B

Explanation:
FortiSASE supports zero trust network access (ZTNA) principles by identifying attributes on the endpoint for security posture checks. ZTNA principles require continuous verification of user and device credentials, as well as their security posture, before granting access to network resources.
Security Posture Check:
FortiSASE can evaluate the security posture of endpoints by checking for compliance with security policies, such as antivirus status, patch levels, and configuration settings. This ensures that only compliant and secure devices are granted access to the network.
Zero Trust Network Access (ZTNA):
ZTNA is based on the principle of "never trust, always verify," which requires continuous assessment of user and device trustworthiness.
FortiSASE plays a crucial role in implementing ZTNA by performing these security posture checks and enforcing access control policies.

NEW QUESTION # 29
When you configure FortiSASE Secure Private Access (SPA) with SD-WAN integration, you must establish a routing adjacency between FortiSASE and the FortiGate SD-WAN hub. Which routing protocol must you use?

- A. OSPF
- B. BGP
- C. IS-IS
- D. EIGRP

Answer: B

Explanation:
When configuring FortiSASE Secure Private Access (SPA) with SD-WAN integration, establishing a routing adjacency between FortiSASE and the FortiGate SD-WAN hub requires the use of the Border Gateway Protocol (BGP).
BGP (Border Gateway Protocol):
BGP is widely used for establishing routing adjacencies between different networks, particularly in SD-WAN environments.
It provides scalability and flexibility in managing dynamic routing between FortiSASE and the FortiGate SD-WAN hub.
Routing Adjacency:
BGP enables the exchange of routing information between FortiSASE and the FortiGate SD- WAN hub. This ensures optimal routing paths and efficient traffic management across the hybrid network.

NEW QUESTION # 30
Which role does FortiSASE play in supporting zero trust network access (ZTNA) principles9

- A. It integrates with software-defined network (SDN) solutions.
- B. It can identify attributes on the endpoint for security posture check.
- C. It enables VPN connections for remote employees.
- D. It offers hardware-based firewalls for network segmentation.

Answer: B

Explanation:
FortiSASE supports zero trust network access (ZTNA) principles by identifying attributes on the endpoint for security posture checks. ZTNA principles require continuous verification of user and device credentials, as well as their security posture, before granting access to network resources.
* Security Posture Check:
* FortiSASE can evaluate the security posture of endpoints by checking for compliance with security policies, such as antivirus status, patch levels, and configuration settings.
* This ensures that only compliant and secure devices are granted access to the network.
* Zero Trust Network Access (ZTNA):
* ZTNA is based on the principle of "never trust, always verify," which requires continuous assessment of user and device trustworthiness.
* FortiSASE plays a crucial role in implementing ZTNA by performing these security posture checks and enforcing access control policies.
References:
FortiOS 7.2 Administration Guide: Provides information on ZTNA and endpoint security posture checks.
FortiSASE 23.2 Documentation: Details on how FortiSASE implements ZTNA principles.

NEW QUESTION # 31
Refer to the exhibit. The daily report for application usage shows an unusually high number of unknown applications by category. What are two possible explanations for this? (Choose two.)

Daily report for application usage
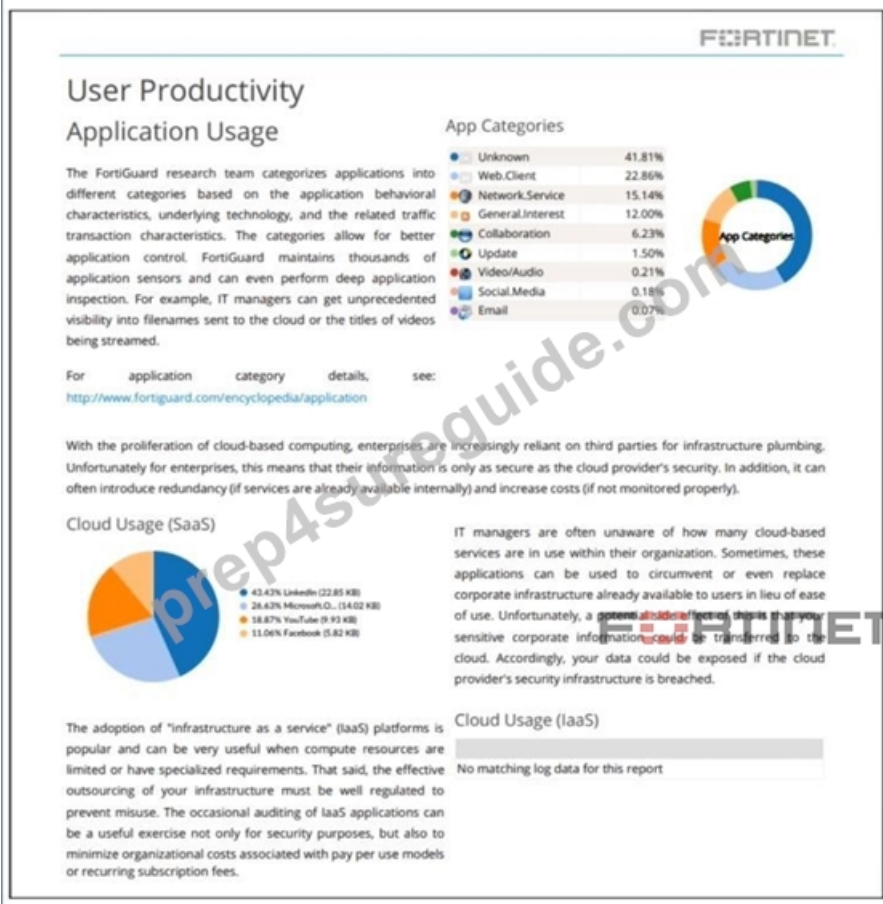

- A. Zero trust network access (ZTNA) tags are not being used to tag the correct users.
- B. Deep inspection is not being used to scan traffic.
- C. The inline-CASB application control profile does not have application categories set to Monitor
- D. Certificate inspection is not being used to scan application traffic.

Answer: B,D

Explanation:
The unusually high number of unknown applications by category in the daily report for application usage can be attributed to the following reasons:
Certificate Inspection is not being used to scan application traffic:
Without certificate inspection, encrypted traffic cannot be adequately analyzed, leading to a higher number of unknown applications.
Certificate inspection allows the FortiSASE to decrypt and inspect HTTPS traffic, identifying applications correctly.
Deep Inspection is not being used to scan traffic:
Deep inspection goes beyond basic traffic analysis, performing thorough examination of packet contents to identify applications accurately.
If deep inspection is not enabled, many applications may go unrecognized and categorized as unknown.

NEW QUESTION # 32
A customer needs to implement device posture checks for their remote endpoints while accessing the protected server. They also want the TCP traffic between the remote endpoints and the protected servers to be processed by FortiGate.
In this scenario, which three setups will achieve the above requirements? (Choose three.)

- A. Configure FortiGate as a zero trust network access (ZTNA) access proxy.
- B. Configure ZTNA servers and ZTNA policies on FortiGate.
- C. Sync ZTNA tags from FortiSASE to FortiGate.
- D. Configure ZTNA tags on FortiGate.
- E. Configure private access policies on FortiSASE with ZTNA.

Answer: A,B,C

Explanation:

NEW QUESTION # 33
......

Begin to learn the FCSS_SASE_AD-24 exam questions and memorize the knowledge given in them. Only ten days is enough to cover up the content and you will feel confident enough that you can answer all FCSS_SASE_AD-24 Questions on the syllabus of FCSS_SASE_AD-24 certificate. Such an easy and innovative study plan is amazingly beneficial for an ultimately brilliant success in exam.
