Minimum CloudSec-Pro Pass Score - Valid CloudSec-Pro Exam Prep

The pass rate is 98.85% for CloudSec-Pro training materials. If you choose us, we can ensure you pass the exam just one time. We are pass guarantee and money back guarantee. If you fail to pass the exam, we will refund your money to your payment account. Moreover, CloudSec-Pro exam dumps are high quality, because we have experienced experts to compile them. We offer you free update for 365 days, and our system will send the latest version for CloudSec-Pro Training Materials automatically. We have online chat service, if you have any questions about CloudSec-Pro exam materials, just contact us.

Palo Alto Networks Cloud Security Professional Sample Questions (Q205-Q210):

NEW QUESTION # 205
What factor is not used in calculating the net effective permissions for a resource in AWS?

- A. AWS service control policies (SCPs)
- B. Permission boundaries
- C. IPTables firewall rule
- D. AWS 1AM policy

Answer: C

Explanation:
In the context of calculating net effective permissions for a resource in AWS, IPTables firewall rule is not used. Net effective

permissions in AWS are determined by evaluating various AWS-specific mechanisms such as IAM policies, permission boundaries, and service control policies (SCPs). IAM policies define what actions are allowed or denied for various AWS resources. Permission boundaries provide a way to delegate administration for IAM entities, setting the maximum permissions that an IAM entity can have. SCPs are part of AWS Organizations and allow for central control over the maximum available permissions for all accounts within an organization. IPTables, on the other hand, is a Linux-based application for setting up firewall rules on individual hosts and is not directly related to AWS resource permissions. Therefore, IPTables firewall rules are not considered when calculating net effective permissions in AWS, making option C the correct answer.

NEW QUESTION # 206
Which two elements are included in the audit trail section of the asset detail view? (Choose two).

- A. Overview
- B. Configuration changes
- C. Alert and vulnerability events
- D. Findings

Answer: B,C

Explanation:
The audit trail section of an asset's detail view in Prisma Cloud typically includes a log of configuration changes and alert and vulnerability events associated with the asset. These elements are crucial for tracking the history of modifications to an asset's configuration and the security incidents that have affected it. This information is instrumental in understanding the security posture of the asset over time and in conducting thorough investigations after a security event has been detected.

NEW QUESTION # 207
Which option identifies the Prisma Cloud Compute Edition?

- A. Package installed with APT
- B. Downloadable, self-hosted software
- C. Software-as-a-Service (SaaS)
- D. Plugin to Prisma Cloud

Answer: B

Explanation:
The Prisma Cloud Compute Edition is identified as B. Downloadable, self-hosted software. This option indicates that Prisma Cloud Compute Edition is a solution that organizations can deploy within their own infrastructure, providing them with control over the installation, configuration, and management of the security platform.

NEW QUESTION # 208
Which API calls can scan an image named myimage: latest with twistcli and then retrieve the results from Console?

- A. $ twistcli images scan \--address \--user \--password \--console \myimage: latest
- B. $ twistcli images scan \--address \--user \--password \myimage: latest
- C. $ twistcli images scan \--address \--user \--password \--verbose \myimage: latest
- D. $ twistcli images scan \--address \--user \--password \--details \myimage: latest

Answer: D

Explanation:
You can have twistcli generate a detailed report for each scan. The following procedure shows you how to scan an image with twistcli, and then retrieve the results from Console.

NEW QUESTION # 209

A customer's Security Operations Center (SOC) team wants to receive alerts from Prisma Cloud via email once a day about all policies that have a violation, rather than receiving an alert every time a new violation occurs.
Which alert rule configuration meets this requirement?

- A. Configure an alert rule. Under the "Policies" tab, select "All Policies." In the "Set Alert Notifications" tab, select "Email > Recurring," set to repeat every 1 day, and then enable "Email."
- B. Configure an alert rule. Under the "Policies" tab, select "High Risk Severity Policies." In the "Set Alert Notifications" tab, select "Email > Recurring," set to repeat every 1 day, and enable "Email."
- C. Set up email integrations under the "Integrations" tab in "Settings" and create a notification template.
- D. Configure an alert rule with all the defaults except selecting email within the "Alert Notifications" tab and specifying recipient.

Answer: A

Explanation:
To receive daily email alerts for all policy violations, the SOC team should configure an alert rule that encompasses all policies and sets the notification frequency to once per day. This can be achieved by:
* Navigating to the "Policies" tab within the alert rule configuration and selecting "All Policies" to ensure that the rule applies to every policy.
* Moving to the "Set Alert Notifications" tab and choosing the "Email" notification method.
* Setting the notification to "Recurring" with a frequency of every 1 day.
* Enabling the email notification by specifying the recipient's email address.
This configuration ensures that the SOC team will receive a consolidated email once a day that includes information on all policies that have been violated, rather than receiving multiple alerts throughout the day as new violations occur. It allows the team to review the compliance status efficiently and prioritize their response accordingly.

NEW QUESTION # 210

......

Our CloudSec-Pro study materials can help you pass test faster. You can take advantage of the certification. Many people improve their ability to perform more efficiently in their daily work with the help of our CloudSec-Pro exam questions and you can be as good as they are. The moment you choose to go with our CloudSec-Pro Study Materials, your dream will be more clearly presented to you. Next, through my introduction, I hope you can have a deeper understanding of our CloudSec-Pro learning quiz. We really hope that our CloudSec-Pro study materials will give you the help to pass the exam.
