最新的 Salesforce Accredited Professional AP-219 免費考試真題 (Q55-Q60):

問題 #55

What type of relationship exists between FulfillmentOrder and Location?

- A. Many-to-One Lookup(Location) Fulfilled from Location Id
- B. One-to-Many Lookup (Location) FulfilledFrom Location Id
- C. Junction (Many to Many)
- D. One-to-One Lookup (Location) FulfilledFrom Location

答案: A

解題說明:

The type of relationship that exists between FulfillmentOrder and Location is Many-to-One Lookup (Location) FulfilledFrom Location Id. A Lookupfield is a type of custom field that creates a relationship between two objects, but does not support rollup summary fields. A Many-to-One relationship means that many child records can be related to one parent record, but not vice versa. In this case, a FulfillmentOrder has a Lookup field named FulfilledFrom Location Id that references a Location record. A Location is a record that represents a physical location from which order product items are fulfilled, such as warehouses and retail stores. A Location can have many FulfillmentOrders associated with it, but a FulfillmentOrder can only have one Location. Verified Reference: https://help.salesforce.com/s/articleView?id=sf.custom_field_types.htm&type=5https://help.salesforce.com/s/articleView?id=sf.order_management_location.htm&type=5

問題 #56

Which set of conditions is required for an Order Summary object to be created?

- A. An Order is created, its status is set to Draft, Create OrderSummaryFlow is installed and Create OrderSummary Flow is activated.
- B. An Order is created, its status is set to Activated. Create OrderSummary Flow is installed and Create OrderSummary Flow is activated.
- C. An Order is created, its status is set to Activated. Create OrderSummary Flow is installed and the Create OrderSummary Process is installed.
- D. An Order is created, the Create Order Summary Process is installed and the Create Order Summary Process is active

答案: D

解題說明:

The Order Summary object is a custom object that stores information about an order, such as the total amount, the number of items, and the fulfillment status. The Order Summary object is created by a process called Create Order Summary Process, which runs whenever an order is created or updated. The process calls a flow called Create OrderSummary Flow, which calculates the order summary fields and creates or updates the order summary record. The process and the flow are part of the Order Management package and must be installed and activated for the order summary object to be created. Reference: Order Management Lifecycle, Order Management Objects, Configure Order Management Flows

問題 #57

The Ensure Funds process works on which set of Order Items?

- A. All Items within a delivery group

- B. Only the items passed into the Ensure Funds method
- C. Only the items on the Fulfillment Order passed into the Ensure Funds method
- D. All Sales Order Items
- E. Only the items with a status of Waiting Payment

答案： B

解題說明：

The Ensure Funds process works on only the items passed into the Ensure Funds method. This method is a flow core action that verifies that there are enough funds available for each Order Item passed into it, and updates their payment status accordingly. The administrator can pass any Order Items into this method, regardless of their status or delivery group. Verified

問題 #58

An administrator is looking for payment information about a returned item on an Order Summary. Which object should the administrator look at?

- A. Return
- B. Credit Memo
- C. Return Order Summary
- D. Invoice

答案： B

解題說明：

The object that the administrator should look at to find payment information about a returned item on an Order Summary is Credit Memo. A Credit Memo is a record that represents a refund or credit issued to a customer for a returned item. A Credit Memo has a lookup relationship to both Order Summary and Return Order objects, and it contains information such as the credit amount, status, payment method, etc. Verified Reference:https://help.salesforce.com/s/articleView?id=sf.order_management_credit_memo.htm&type=5

id=sf.order_management_credit_memo.htm&type=5

問題 #59

A customer orders a product through B2C Commerce but changes the quantity ordered after the Order Summary record is created in Order Management. Later, the customer returns one of the products. Which objects will be created in Order Management?

- A. A Change Order object and Cancel Order Object
- B. A Return Order object and Change Order object
- C. A Cancel Order object and Return Order object
- D. The Order Summary object and Change Order object

答案： B

解題說明：

The objects that will be created in Order Management when a customer orders a product through B2C Commerce but changes the quantity ordered after the Order Summary record is created in Order Management, and then returns one of the products are:

A Return Order object. A Return Order is a record that represents a return request for an order or part of an order. A Return Order has a lookup relationship to both Order Summary and Change Order objects, and it contains information such as the return reason, status, date, etc.

A Change Order object. A Change Order is a record that represents a change request for an order or part of an order. A Change Order has a lookup relationship to the Order Summary object, and it contains information such as the change type, status, date, etc.
