100% Pass Quiz 2026 Trustable Oracle 1z0-1080-25: Oracle Planning 2025 Implementation Professional Latest Test Pdf

With the rapid development of the world economy and frequent contacts between different countries, the talent competition is increasing day by day, and the employment pressure is also increasing day by day. If you want to get a better job and relieve your employment pressure, it is essential for you to get the 1z0-1080-25 Certification. However, due to the severe employment situation, more and more people have been crazy for passing the 1z0-1080-25 exam by taking examinations, and our 1z0-1080-25 exam questions can help you pass the 1z0-1080-25 exam in the shortest time with a high score.

Oracle Planning 2025 Implementation Professional Sample Questions (Q108-Q113):

NEW QUESTION # 108
Your administrator creates a Pipeline definition to manage metadata, and data for your Planning application.

Which statement about pipelines is true?

- A. Use pipelines to coordinate the running of a series of jobs as a single process.
- B. Quickly drill into data slices that are important to you with pipelines.
- C. Use pipelines as a visible, automated, and repeatable system of record for running an application.
- D. Develop pipelines to guide you through the Planning process.

Answer: A

Explanation:
In Oracle Planning 2024, a Pipeline is a feature that allows administrators to define and automate a sequence of jobs (e.g., data imports, metadata updates, calculations) as a single, coordinated process. Pipelines streamline the management of metadata and data by executing multiple tasks in a specified order, ensuring dependencies are met, and providing a repeatable workflow for maintaining the Planning application.
* A. Develop pipelines to guide you through the Planning process: Incorrect. Pipelines are not a planning guide; they are an automation tool for executing jobs, not a process framework.
* B. Use pipelines as a visible, automated, and repeatable system of record for running an application:
Incorrect. While pipelines are automated and repeatable, they are not a "system of record" for running the entire application-they focus on specific job sequences.
* C. Use pipelines to coordinate the running of a series of jobs as a single process: Correct. This aligns with the Oracle definition of pipelines, which orchestrate multiple jobs (e.g., import data, refresh database) into one executable process.
* D. Quickly drill into data slices that are important to you with pipelines: Incorrect. Pipelines are not designed for data analysis or drilling into data slices; they are for job automation.
The Oracle documentation emphasizes that pipelines are used to manage and execute a series of jobs efficiently, making C the true statement.

NEW QUESTION # 109
If you are using your own chart of accounts and want to use dashboards that graphically depict total results, you must add your accounts as shared members under the appropriate parent. To which four parent members do you add your own chart of accounts as shared members, to include them in predefined dashboards?

- A. OFS_Cash
- B. OFS_Rollup data
- C. OFS_Total Operating Expenses
- D. OFS_Financials Integrations
- E. OFS_Total Cost of Sales
- F. OFS_Total Revenue

Answer: A,C,E,F

NEW QUESTION # 110
Which two statements are true regarding what you can do when configuring insights?

- A. Use prediction results as input for generating insights.
- B. Define insights for up to 1000 data intersections.
- C. Create and edit data views to customize the display on the dashboard.
- D. Select either a single type of insight or multiple types of insights.

Answer: A,D

NEW QUESTION # 111
Which statement describes Strategic Modeling?

- A. It is used to develop driver-based strategic plans and generate core financial statements.
- B. It is used to model the flow of data by defining strategic rules for sharing data between modules.
- C. It is used to quickly model and evaluate financial scenarios, and offers out-of-the-box treasury capabilities.
- D. It is used to strategically manage and analyze finances at any business level with built-in dashboards.

Answer: C

Explanation:

Strategic Modeling in Oracle Planning 2024 is a module designed to enable rapid modeling and evaluation of financial scenarios, such as mergers, acquisitions, or long-term strategic plans. It provides a flexible framework for simulating "what-if" scenarios and includes out-of-the-box treasury capabilities, such as cash flow forecasting, debt scheduling, and interest rate calculations, which are critical for strategic financial planning.

* A. It is used to model the flow of data by defining strategic rules for sharing data between modules:

Incorrect. This describes data integration (e.g., via data maps), not Strategic Modeling, which focuses on scenario analysis.

* B. It is used to develop driver-based strategic plans and generate core financial statements: Incorrect.

While it supports driver-based planning, generating core financial statements is more aligned with the Financials module, not Strategic Modeling's primary focus.

* C. It is used to strategically manage and analyze finances at any business level with built-in dashboards:

Incorrect. This is too broad and aligns more with the overall Planning application, not specifically Strategic Modeling.

* D. It is used to quickly model and evaluate financial scenarios, and offers out-of-the-box treasury capabilities: Correct. This matches the module's purpose of rapid scenario modeling and its treasury- related features.

The Oracle documentation highlights Strategic Modeling's role in scenario analysis and its treasury tools, making D the accurate description.

NEW QUESTION # 112

You need to schedule a weekly data import job. Which two statements are true about scheduling jobs?

- A. You can set to receive notifications when the job has completed.
- B. You can set the daily maintenance time when scheduling cloning environment jobs.
- C. You can schedule an Import Data job to run later at intervals.
- D. You can check the execution status of a job only if it completed.
- E. You can delete that are currently processing.

Answer: A,C

Explanation:

In Oracle Planning 2024, scheduling jobs such as a weekly data import is managed through the Jobs interface, which provides options for automation, monitoring, and notifications. Let's evaluate the provided statements to identify the two that are true:

* A. You can check the execution status of a job only if it completed: This is false. The Jobs console in Oracle EPM allows users to check the status of a job (e.g., Running, Completed, Failed) at any time, not just after completion. Real-time monitoring is a key feature.

* B. You can set the daily maintenance time when scheduling cloning environment jobs: This is false.

Daily maintenance time is a system-wide setting controlled by administrators via Application Settings, not something adjustable when scheduling specific jobs like cloning or data imports.

* C. You can set to receive notifications when the job has completed: This is true. When scheduling a job (e.g., Import Data), users can enable email notifications to be alerted upon job completion, success, or failure, enhancing job management.

* D. You can schedule an Import Data job to run later at intervals: This is true. The scheduling feature supports recurring jobs, such as weekly data imports, allowing users to define the start time and frequency (e.g., daily, weekly) for tasks like importing data from external sources.

* E. You can delete that are currently processing: This is false. Jobs that are currently processing (i.e., in a "Running" state) cannot be deleted until they complete or fail, as per Oracle's job management rules.

Thus, the two true statements are C and D, reflecting the flexibility of scheduling recurring Import Data jobs and receiving completion notifications, both of which are explicitly supported in Oracle Planning 2024.
