Prominent Features of {Nutanix} Nutanix NCP-MCA Exam Questions

BONUS!!! Download part of TestInsides NCP-MCA dumps for free: https://drive.google.com/open?id=1tWboYxeIoUyKBCkIRx8-QsG48riOyPSu

Our NCP-MCA practice materials enjoy great popularity in this line. We provide our NCP-MCA practice materials on the superior quality and being confident that they will help you expand your horizon of knowledge of the exam. They are time-tested practice materials, so they are classic. As well as our after-sales services. We can offer further help related with our NCP-MCA practice materials which win us high admiration. By devoting in this area so many years, we are omnipotent to solve the problems about the NCP-MCA practice exam with stalwart confidence. Providing services 24/7 with patient and enthusiastic staff, they are willing to make your process more convenient.

To ensure your 100% satisfaction, NCP-MCA free demo are available for the certification exam you're going to take before you purchased. All our NCP-MCA dumps collection is quite effectively by millions of people that passed NCP-MCA Real Exam and become professionals in IT filed. You will never regret choosing our NCP-MCA test answers as your practice materials because we will show you the most authoritative study guide.

Perfect Learning NCP-MCA Materials, Ensure to pass the NCP-MCA Exam

One major difference which makes the Nutanix NCP-MCA exam dumps different from others is that the exam questions are updated after feedback from more than 90,000 professionals and experts around the globe. In addition, the Nutanix NCP-MCA Exam Questions are very similar to actual Nutanix Certified Professional - Multicloud Automation (NCP-MCA 6.10) NCP-MCA exam questions. Hence, it helps you to achieve a high grade on the very first attempt.

Nutanix Certified Professional - Multicloud Automation (NCP-MCA 6.10) Sample Questions (Q85-Q90):

NEW QUESTION # 85
After an application is no longer needed, a user puts in a ticket to delete the VM. The administrator finds the VM in Prism Central and deletes it, but then realize that it was a Self-Service (formerly Calm) managed VM.
When the administrator attempts the application in Self-Service using the Delete action, it fails because the Substrate cannot be found.
How would the administrator delete the application from management?

- A. Execute the Delete action again, the second run will ignore the error.
- B. In the Audit view of the application, click Retry
- C. Execute the Soft Delete action to ignore the provide substrate.
- D. The platform Sync Service will remove the application.

Answer: C

Explanation:
When a VM managed by Self-Service (formerly Calm) is deleted manually from Prism Central, the associated application in Self-Service cannot be deleted using the standard delete action because the substrate is no longer present. In this scenario, the administrator should use the "Soft Delete" action in Self-Service, which will remove the application from management without requiring the substrate to be present.
Reference:
Nutanix documentation on Soft Delete.
Nutanix Best Practices for Managing Self-Service Applications.

NEW QUESTION # 86
An administrator has run a multi-step Playbook. but sees the Failed status, as shown in the exhibit.
What could be causing the playbook to fail?

- A. IP Address SSH action has a timeout of 5 minutes.
- B. VM action has a timeout of 5 minutes.
- C. PowerShell action has a timeout of 5 minutes.
- D. puppet action has a timeout of 5 minutes.

Answer: A

Explanation:
The image shows a failed status for an SSH_VM_Task, which is manually triggered. Since the task involves SSH, it's likely that the IP Address SSH action has a timeout of 5 minutes, causing the playbook to fail if it cannot complete within this time frame. The IP Address SSH action is used to execute commands on a remote VM using SSH. It requires the IP address, username, password, and command to run as inputs. The timeout parameter specifies how long the action will wait for the command to finish before aborting. If the timeout is too short, the action may fail due to network latency, slow execution, or other factors. Reference: Nutanix Certified Professional - Multicloud Automation (NCP-MCA) 6.5 Exam, page 16, section 1.3.2.2: "Playbooks"
[Nutanix University: NCP-MCA 6.5 Exam Prep - Playbooks], video 4: "Playbooks"

NEW QUESTION # 87
A developer has a Development Blueprint that performs the following high level items:
Creates a Windows and Ubuntu Server.
Installs IIS on Windows
Installs MySQL on Ubuntu
As part of Development, there is a need for an Operator to restart IIS Services for troubleshooting purposes.
How should the developer add this functionality to the Blueprint?

- A. Add a Delay Task in the Restart Action of the Windows/IIS Service.
- B. Add an Execute Task in the Restart Action of the Windows/IIS Service.
- C. Add an Execute Task in the Restart Action of the Application Profile.
- D. Create an Endpoint for the IIS server and a Runbook that restarts the service.

Answer: B

Explanation:
The Restart Action of a Service allows the developer to define custom tasks that will be executed when the service is restarted. An Execute Task can run any script or command on the target VM, such as restarting the IIS service. This way, the Operator can use the Self-Service Portal to restart the service without logging into the VM or using another tool.

NEW QUESTION # 88
A blueprint service needs to use scaling. The requirements are:
Windows 2019 VM (12 vCPU, 24 GB memory, 500 GB volume)
Minimum VMs needed at any time and at time of deployment is 2 VMs
VMs should not exceed the project quota of 100 vCPUs or 300 GB of memory There are no other services in use within the project Which scaling VM replica settings meet all requirements?

- A. MIN: 2, MAX: 10, Default: 1
- B. MIN: 2, MAX: 11, Default: 2
- C. MIN: 2, MAX: 7, Default: 2
- D. MIN: 2, MAX: 8, Default: 1

Answer: C

Explanation:
Scaling VM replica settings allow you to specify the minimum, maximum, and default number of VMs that can be created from a blueprint service. The minimum and default values must be equal to or greater than the number of VMs needed at any time and at time of deployment, which is 2 in this case. The maximum value must be equal to or less than the project quota divided by the VM resources, which is $100/12 = 8$ for vCPUs and $300/24 = 12$ for memory. The lowest of these two values is the limit for the maximum value, which is 8.
Therefore, the only option that meets all the requirements is B. MIN: 2, MAX: 7, Default: 2.

Given a scenario, create a blueprint to deploy infrastructure and applications using Self-Service

NEW QUESTION # 89
An administrator has performed a self-Service (formerly Calm) upgrade from version 3.3 to 3.6. After performing the upgrade, the administrator has noticed all the Policy Engine scheduled jobs are failing and this alert is being presented in PC.
What should the administrator do to resolve the alert?

- A. Reboot policy Engine VM.
- B. Upgrade Engine using YUM Update.
- C. Upgrade Policy Engine using LCM.
- D. Upgrade Policy Engine using APT update.

Answer: C

Explanation:
After upgrading Self-Service (formerly Calm) from version 3.3 to 3.6, the administrator noticed that Policy Engine scheduled jobs were failing and an alert was being presented in Prism Central. This issue is likely due to a version mismatch between the upgraded components. The recommended solution is to use Lifecycle Manager (LCM) to upgrade the Policy Engine to ensure compatibility with the new version of Self-Service.
Reference:
Nutanix documentation on Upgrading Components with LCM.
Nutanix Best Practices for Managing Upgrades.

NEW QUESTION # 90

......

The software version of the NCP-MCA exam reference guide is very practical. This version has helped a lot of customers pass their exam successfully in a short time. The most important function of the software version is to help all customers simulate the real examination environment. If you choose the software version of the NCP-MCA Test Dump from our company as your study tool, you can have the right to feel the real examination environment. In addition, the software version is not limited to the number of the computer. So hurry to buy the NCP-MCA study question from our company.
