DumpStillValid is a website to achieve dreams of many IT people. DumpStillValid provide candidates participating in the IT certification exams the information they want to help them pass the exam. Do you still worry about passing Cisco certification 300-620 exam? Have you thought about purchasing an Cisco certification 300-620 exam counseling sessions to assist you? DumpStillValid can provide you with this convenience. DumpStillValid's training materials can help you pass the certification exam. DumpStillValid's exercises are almost similar to real exams. With DumpStillValid's accurate Cisco Certification 300-620 Exam practice questions and answers, you can pass Cisco certification 300-620 exam with a high score.

Our product boosts three versions which include PDF version, PC version and APP online version. The Implementing Cisco Application Centric Infrastructure test guide is highly efficient and the forms of the answers and questions are the same. Different version boosts their own feature and using method, and the client can choose the most convenient method. For example, PDF format of 300-620 guide torrent is printable and boosts instant access to download. You can learn at any time, and you can update the 300-620 Exam Questions freely in any day of one year. It provides free PDF demo. You can learn the APP online version of 300-620 guide torrent in your computer, cellphone, laptop or other set. Every version has their advantages so you can choose the most suitable method of Implementing Cisco Application Centric Infrastructure test guide to prepare the exam. Believe us that we can bring you the service of high quality and make you satisfied.

Valid 300-620 Test Cost - Latest 300-620 Test Vce

The PDF version of the DumpStillValid Cisco 300-620 prep material is easily accessible. This format is ideal for someone who is constantly on the move, as you can prepare for your Implementing Cisco Application Centric Infrastructure (300-620) exam whether you are using your smartphone, tablet, or laptop. You can study anywhere, at any time, without having to worry about installing anything. Furthermore, you can study with a hard copy by printing all of your Implementing Cisco Application Centric Infrastructure (300-620) PDF questions. We offer regular updates in PDF format to improve Implementing Cisco Application Centric Infrastructure (300-620) questions according to changes in the exam.

Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q290-Q295):

NEW QUESTION # 290

An engineer wants to filter the System Faults page and view only the active faults that are present in the Cisco ACI fabric. Which two lifecycle stages must be selected for filtering? (Choose two.)

- A. Soaking
- B. Soaking, Clearing
- C. Raised, Clearing
- D. Raised
- E. Retaining

Answer: C,D

Explanation:

To filter the System Faults page and view only the active faults present in the Cisco ACI fabric, the two lifecycle stages that must be selected for filtering are:

Raised (Option A): This stage indicates that the fault is currently active and has been raised.

Raised, Clearing (Option D): This combination indicates that the fault is active but is in the process of being cleared.

NEW QUESTION # 291

What does a bridge domain represent?

- A. Layer 3 cloud
- B. physical domain
- C. tenant
- D. Layer 2 forwarding construct

Answer: D

Explanation:

Section: ACI Fabric Infrastructure

Explanation/Reference: https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/2-x/L2_config/b_Cisco_APIC_Layer_2_Configuration_Guide/b_Cisco_APIC_Layer_2_Configuration_Guide_chapter_010.html

NEW QUESTION # 292

An engineer is implementing Cisco ACI at a large platform-as-a-service provider using APIC controllers, 9396PX leaf switches, and 9336PQ spine switches. The leaf switch ports are configured as IEEE 802.1p ports. Where does the traffic exit from the EPG in IEEE 802.1p mode in this configuration?

- A. from leaf ports tagged as VLAN 4094
- B. from leaf ports untagged
- C. from leaf ports tagged as VLAN 1
- D. from leaf ports tagged as VLAN 0

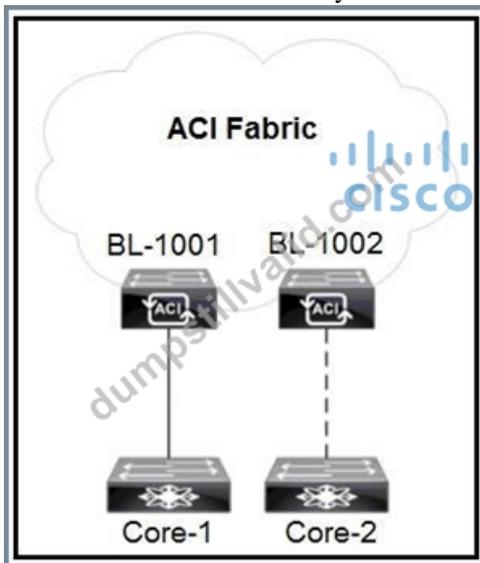

Answer: D

Explanation:

Section: ACI Fabric Infrastructure

NEW QUESTION # 293

Refer to the exhibit. A tenant is configured with a single L3Out and a single-homed link to the core router called Core-1. An engineer must add a second link to the L3Out that connects to the Core-2 router. Which action allows traffic from Core-2 to BL-1002 to have the same connectivity as the traffic from Core-1 to BL-1001?

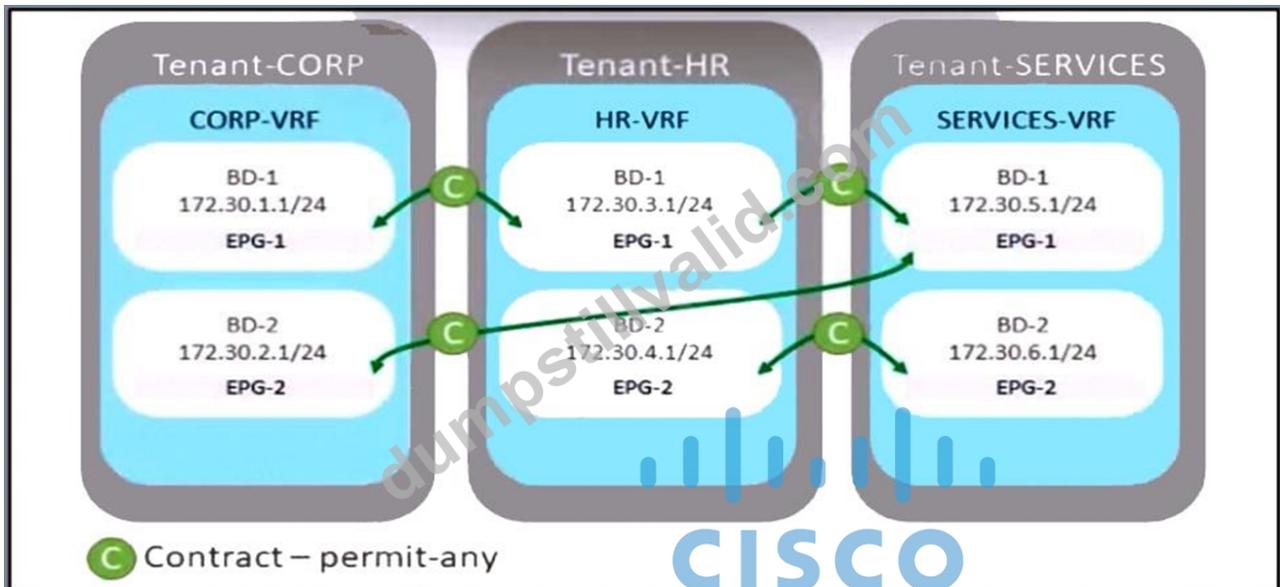

- A. Add a second subnet to the external EPG to the existing L3Out.
- B. Add a second interface to the external domain to the existing L3Out.

- C. Add a second path to the logical interface profile of the existing L3Out.
- D. Add a second OSPF interface profile to the logical interface profile.

Answer: C

NEW QUESTION # 294

Refer to the exhibit.

Refer to the exhibit. A company merges three of its departments: CORP, HR, and SERVICES. Currently, the connectivity between departments is achieved by using VRF route leaking. The requirement is to redesign the Cisco ACI networking architecture to communicate between EPGs and BDs from any tenant without configuring contracts or VRF route leaking. Which configuration meets these criteria?

- A. Implement an unenforced VRF in the common tenant and map all required BDs to it.
- B. Configure an unenforced VRF in the user tenant and map all required EPGs to it.
- C. Implement an enforced VRF in the common tenant and map all required BDs to it.
- D. Configure an enforced VRF in the user tenant and map all required EPGs to it.

Answer: A

Explanation:

To enable communication between EPGs and BDs from any tenant without the need for contracts or VRF route leaking, the best approach is to implement an unenforced VRF within the common tenant. By doing so, all bridge domains that are associated with this VRF will be able to communicate with each other without additional configurations. This method simplifies the network architecture and reduces the complexity associated with contract management and VRF route leaking.
