NCP-BC Dumps Collection | Latest NCP-BC Dumps Ppt

To keep pace with the times, we believe science and technology can enhance the way people study. Especially in such a fast-paced living tempo, we attach great importance to high-efficient learning. Therefore, our NCP-BC study materials base on the past exam papers and the current exam tendency, and design such an effective simulation function to place you in the real exam environment. We promise to provide a high-quality simulation system with advanced NCP-BC Study Materials. With the simulation function, our NCP-BC training guide is easier to understand and pass the NCP-BC exam.

Nutanix NCP-BC Exam Syllabus Topics:

| Topic | Details |
|---------|--|
| Topic 1 | <ul style="list-style-type: none">• Perform Business Continuity & Disaster Recovery (BCDR) Tasks: Covers hands-on execution of DR operations including self-service restores, snapshot recovery, failover tasks, post-failover cleanup, and migrating from legacy protection domains to modern protection policies. |
| Topic 2 | <ul style="list-style-type: none">• Interpret and Configure Business Continuity & Disaster Recovery (BCDR) Requirements: Covers planning and configuring DR solutions by evaluating RPO needs, resource limits, security settings, recovery plans, and network• storage requirements across various Nutanix environments. |
| Topic 3 | <ul style="list-style-type: none">• Test Business Continuity & Disaster Recovery (BCDR) Solutions: Covers validating DR readiness by executing planned and unplanned failovers, testing connectivity and throughput between sites, and verifying recovery plan accuracy. |
| Topic 4 | <ul style="list-style-type: none">• Troubleshoot Business Continuity & Disaster Recovery (BCDR) Failures: Covers diagnosing and resolving DR failures related to network issues, replication errors, third-party backup problems, and misconfigured DR setups. |

Nutanix Certified Professional - Business Continuity (NCP-BC) 7.5 Sample

Questions (Q95-Q100):

NEW QUESTION # 95

A VM is configured with a 5-minute Nearsync RPO. After several hours, replication transitions back to hourly RPO. Alerts indicate the minute schedule cannot be maintained.

What is the most likely root cause?

- A. Only one recovery plan exists.
- B. Reverse synchronization is disabled.
- C. RTT is greater than 5 ms.
- D. Bandwidth is insufficient.

Answer: D

NEW QUESTION # 96

During the Recovery Plan configuration, the administrator maps the "Test Network" setting to the "Production Network" VLAN on the Recovery Site.

What is the expected outcome when the administrator executes a Test Failover for this plan?

- A. The Test VMs will remain turned off, maintaining isolation from all other network traffic automatically.
- B. The Test Failover will fail the validation check because the production network is already in use.
- C. The Test VMs will start, causing IP address conflicts with the live production VMs on the Primary Site.
- D. The Test VMs will turn on, but will be isolated from all other network traffic automatically.

Answer: C

NEW QUESTION # 97

An administrator wants to run a test failover and maps the primary production virtual network to the recovery site production virtual network for the test.

What are the two most likely outcomes? (Choose two.)

- A. Test failover does not require network mapping, so the selection of production or test networks will have no impact.
- B. Using production networks on recovery AZ for test failover provides the most accurate validation.
- C. Test failover can overlap with production networking and can lead to IP conflicts.
- D. It defeats the intended isolation between production and test workflows.

Answer: C,D

NEW QUESTION # 98

Which file system is supported on Linux VMs for Self-Service Restore?

- A. EXT4
- B. NTFS
- C. EXT
- D. VFAT

Answer: A

NEW QUESTION # 99

An organization is implementing a Disaster Recovery solution to protect critical workloads by failing them over to a NC2-on-Azure cluster.

The NC2 environment utilizes Flow Virtual Networking (FVN) for overlay networking. The administrator needs to ensure that when VMs failover to Azure, their IP addresses are predictable and consistent with the application requirements.

Which configuration strategy should the administrator use in the Recovery Plan to achieve predictable IP assignment for the recovered VMs?

- A. Rely on the default behavior where the last octet of the source IP is preserved.
- **B. Configure custom IP mapping to assign specific IP addresses to the VMs.**
- C. Configure In-Guest scripts for NGT to maintain the static IP assignments.
- D. Rely on the IPAM networks of the NC2 cluster to maintain the IP assignments.

Answer: B

NEW QUESTION # 100

.....

To pass Nutanix NCP-BC certification exam seems to be a very difficult task. Having registered NCP-BC test, are you worrying about how to prepare for the exam? If so, please see the following content, I now tell you a shortcut through the NCP-BC Exam. The certification training dumps that can let you pass the test first time have appeared and it is Getcertkey Nutanix NCP-BC exam dumps. If you would like to sail through the test, come on and try it.
