**Talend-Core-Developer Actual Questions, Valid Dumps Talend-Core-Developer Pdf**

Are you preparing for taking the Talend Core Certified Developer Exam (Talend-Core-Developer) certification exam? We understand that passing the Talend-Core-Developer exam with ease is your goal. However, many people struggle because they rely on the wrong study materials. That's why it's crucial to prepare for the Talend-Core-Developer Exam using the right Talend-Core-Developer Exam Questions learning material. Look no further than UpdateDumps, where we take responsibility for providing accurate and reliable Talend Talend-Core-Developer questions prepared by our team of experts.

## Talend Core Certified Developer Exam Sample Questions (Q16-Q21):

### NEW QUESTION # 16

You have a MySQL table named customers with columns named id, name, address, and country. You need to retrieve records that have a specific country based on a variable. Which steps should you use to achieve this?

- A. Use a tDBInput component and link it to a tFilterColumns component.
- B. Use a tDBInput component and link it to a tMatchGroup component.
- C. Use a tDBInput component with a Run if trigger.
- D. Use a tDBInput component with a context variable in the SQL query.

#### Answer: D

Explanation:

Comprehensive and Detailed Explanation:

To filter records based on a specific country dynamically, the best approach is using a tDBInput component with a context variable in the SQL query (Option A).

Step-by-Step Process:

\* Define a Context Variable:

\* In the Context Variables section of Talend Studio, create a new variable (context.country) and set its value dynamically.

\* Configure tDBInput:

\* Drag and drop the tDBInput component onto the Designer.

\* Set up the database connection using either Built-in or Repository mode.

\* In the Query field, write:

SELECT id, name, address, country FROM customers WHERE country = "" + context.country + "

\* Execute the Job:

\* The Job will retrieve only those records where the country column matches the value of the context variable.

\* The value of context.country can be modified at runtime, making the query dynamic.

Why not other options?

\* tMatchGroup (Option B): Used for record deduplication, not filtering.

\* Run if Trigger (Option C): Controls execution flow but does not filter records inside tDBInput.

\* tFilterColumns (Option D): Removes unwanted columns but does not filter records based on conditions.

### NEW QUESTION # 17

You need a list of all customers whose first name contains 'Tom' and who are older than 18. Which processor should be used?

- A. Filter
- B. Join
- C. Aggregate
- D. Data sampling

#### Answer: A

Explanation:

Comprehensive and Detailed Explanation:

To filter customer records based on first name containing 'Tom' and age greater than 18, the Filter processor is the correct choice.

\* The Filter processor allows users to set conditional rules to extract only the required data.

\* Users can specify conditions such as:

first\_name CONTAINS 'Tom'

AND

age > 18

\* This ensures that only relevant records are included in the output.

Why not other options?

\* Option A (Join): Used to combine data from multiple datasets based on a key field, not for filtering.

- \* Option B (Aggregate):Used for summarizing data, such as calculating counts, sums, or averages.
- \* Option D (Data Sampling):Used to select a random subset of data, not for filtering based on conditions.

### NEW QUESTION # 18

Which type of task can be added to a plan in Talend Management Console?

- A. Data services
- B. Big Data tasks
- C. Routes
- D. Jobs

#### Answer: D

Explanation:

Comprehensive and Detailed Explanation:

In Talend Management Console (TMC), a plan is a sequence of tasks executed in a defined order. The types of tasks that can be added to a plan include:

\* Jobs (Option D):Standard data integration tasks designed in Talend Studio.

\* Big Data tasks (Option B):Tasks involving big data processing.

\* Routes (Option C):Tasks related to messaging routes.

However, Data services (Option A) refer to web services and are not typically added as tasks within a plan.

### NEW QUESTION # 19

A colleague has exported a Data Integration Job to run outside Talend Studio.

How do you run the Job?

- A. Extract the files from the archive and run the JAR file.
- B. Install the Job and start the resulting service.
- C. Extract the content of the archive and run the batch file or the shell script.
- D. Extract the contents of the archive and run the batch file and shell script.

#### Answer: C

Explanation:

To run a job that has been exported by a colleague to run outside Talend Studio, you need to extract the content of the archive and run the batch file or the shell script. The archive file contains all the files and libraries required to run the job independently from Talend Studio on any platform that supports Java. The archive file also contains two executable files: a batch file (.bat) for Windows platforms and a shell script (.sh) for Linux platforms. You need to run the appropriate file for your platform by double-clicking on it or using a command line tool. This will launch the job and display its output in a console window.

You do not need to extract the contents of the archive and run both the batch file and shell script, install the job and start the resulting service, or extract the files from the archive and run the JAR file. These methods are not correct or available in Talend Studio and may cause errors or unexpected results. ### NEW QUESTION # 20

Which component can be used to read a CSV file in an ESB Route?

- A. cFile
- B. cFileInputDelimited
- C. tFileInputDelimited
- D. tMap
- E. cMap

#### Answer: B

Explanation:

Comprehensive and Detailed Explanation:

In Talend's Enterprise Service Bus (ESB) routes, the appropriate component to read a CSV file is cFileInputDelimited. This

component is specifically designed for Camel routes to handle delimited files like CSVs.

## NEW QUESTION # 21

.....

As everybody knows, competitions appear ubiquitously in current society. In order to live a better live, people improve themselves by furthering their study, as well as increase their professional Talend-Core-Developer skills. With so many methods can boost individual competitiveness, people may be confused, which can really bring them a glamorous work or brighter future? We are here to tell you that a Talend-Core-Developer Certification definitively has everything to gain and nothing to lose for everyone. And our Talend-Core-Developer exam questions are the best choice to help you pass the Talend-Core-Developer exam and get the certification.
