Exam AZ-400 Fee, Exam AZ-400 Registration

Our study material is a high-quality product launched by the TestInsides platform. And the purpose of our study material is to allow students to pass the professional qualification exams that they hope to see with the least amount of time and effort. If you are a child's

mother, with AZ-400 Test Answers, you will have more time to stay with your child; if you are a student, with AZ-400 exam torrent, you will have more time to travel to comprehend the wonders of the world.

Microsoft AZ-400 Certification Exam is designed for IT professionals who want to become experts in designing and implementing DevOps solutions using Microsoft technologies. AZ-400 exam measures the candidate's ability to design and implement DevOps practices for continuous delivery, automation, testing, and monitoring of software applications. Designing and Implementing Microsoft DevOps Solutions certification exam is ideal for developers, DevOps engineers, and IT professionals who want to enhance their skills and knowledge in the DevOps domain.

Microsoft AZ-400 exam is an important certification for IT professionals who are interested in DevOps. It validates an individual's ability to design and implement DevOps solutions using Microsoft Azure technologies. Candidates who pass the exam will earn the Microsoft Certified: DevOps Engineer Expert certification, which is highly valued in the IT industry. To prepare for the exam, candidates should have a strong understanding of DevOps concepts and experience using Microsoft Azure technologies, and they should take advantage of the many resources available to help them prepare for the exam.

Microsoft Designing and Implementing Microsoft DevOps Solutions Sample Questions (Q563-Q568):

NEW QUESTION # 563

You need to recommend project metrics for dashboards in Azure DevOps.

Which chart widgets should you recommend for each metric? To answer, drag the appropriate chart widgets to the correct metrics. Each chart widget may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: Lead time

Lead time measures the total time elapsed from the creation of work items to their completion.

Box 2: Cycle time

Cycle time measures the time it takes for your team to complete work items once they begin actively working on them.

Box 3: Burndown

Burndown charts focus on remaining work within a specific time period.

NEW QUESTION # 564

Your company develops a client banking application that processes a large volume of data.

Code quality is an ongoing issue for the company. Recently, the code quality has deteriorated because of an increase in time pressure on the development team.

You need to implement static code analysis.

During which phase should you use static code analysis?

- A. build
- B. production release
- C. integration testing
- D. staging

Answer: C

Explanation:

The Secure Development Lifecycle (SDL) Guidelines recommend that teams perform static analysis during the implementation phase of their development cycle.

Note: The company should focus in particular on the implementation of DevOps tests to assess the quality of the software from the planning stage to the implementation phase of the project.

NEW QUESTION # 565

During a code review, you discover quality issues in a Java application.

You need to recommend a solution to detect quality issues including unused variables and empty catch blocks.

What should you recommend?

- A. In a Gulp build task, specify a custom condition expression.
- B. In an Xcode build task, select Use xcpretty from Advanced.
- C. In a Grunt build task, select Enabled from Control Options.
- **D. In a Maven build task, select Run PMD.**

Answer: D

Explanation:

PMD is a source code analyzer. It finds common programming flaws like unused variables, empty catch blocks, unnecessary object creation, and so forth.

There is an Apache Maven PMD Plugin which allows you to automatically run the PMD code analysis tool on your project's source code and generate a site report with its results.

NEW QUESTION # 566

You have a virtual machine that runs Windows Server 2019 and is managed by using Desired State Configuration (DSC).

You have the following DSC configuration.

You have the following Local Configuration Manager (LCM) configuration.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Yes "DependsOn are defined"

Yes "Mode is Apply and Monitor"

No "Configuration Mode FreqMin : 60 "

Configuration Mode Freq Min:How often, in minutes, the current configuration is checked and applied. This property is ignored if the Configuration Mode property is set to Apply Only.

NEW QUESTION # 567

You have an Azure subscription that uses Azure Automation State Configuration to manage the configuration of virtual machines.

You need to identify which nodes are noncompliant.

How should you complete the query? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.
