

# NCP-DB Online Exam - NCP-DB New Question

NCP-DB Database Automation Certification Details	
Exam Code	NCP-DB
Full Exam Name	Nutanix Certified Professional - Database Automation
No. of Questions	75
Online Practice Exam	<a href="#">Nutanix Certified Professional - Database Automation (NCP-DB) Practice Test</a>
Sample Questions	<a href="#">Nutanix NCP-DB Sample Questions</a>
Passing Score	3000/1000-6000
Time Limit	120 minutes
Exam Fees	199 USD
Become successful with VMExam.com	

2025 Latest Prep4sureExam NCP-DB PDF Dumps and NCP-DB Exam Engine Free Share: [https://drive.google.com/open?id=1V4FrNcliz9Go9Pv\\_TbDTpS0S2JISJf8L](https://drive.google.com/open?id=1V4FrNcliz9Go9Pv_TbDTpS0S2JISJf8L)

For added reassurance, we also provide you with up to 1 year of free Nutanix Dumps updates and a free demo version of the actual product so that you can verify its validity before purchasing. The key to passing the Nutanix NCP-DB exam on the first try is vigorous NCP-DB practice. And that's exactly what you'll get when you prepare from our Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 (NCP-DB) practice material. Each format of our NCP-DB study material excels in its own way and serves to improve your skills and gives you an inside-out understanding of each exam topic.

## Nutanix NCP-DB Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Deploy and Configure an NDB Solution: This topic discusses how to deploy, configure, and NDB Instance.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Monitor Alerts and Storage Usage Within an NDB Implementation: It is all about monitoring alerts and management of storage usage.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Protect NDB-managed Databases Using Time Machine: SLA retention policies, source databases, clones, protection of databases, and Data Access Management (DAM) policies are discussed in this topic.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Describe NDB Concepts: It defines database and NDB terminology. The topic also explains benefits and features of NDB.</li></ul>

## NCP-DB – 100% Free Online Exam | Updated Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 New Question

Prep4sureExam Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 (NCP-DB) web-based practice exam software also works without installation. It is browser-based; therefore no need to install it, and you can start practicing for the Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 (NCP-DB) exam by creating the Nutanix NCP-DB practice test. You don't need to install any separate software or plugin to use it on your system to practice for your actual Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 (NCP-DB) exam. Prep4sureExam Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 (NCP-DB) web-based practice software is supported by all well-known browsers like Chrome, Firefox, Opera, Internet Explorer, etc.

## Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 Sample

## Questions (Q20-Q25):

### NEW QUESTION # 20

A database administrator logged into their NDB dashboard notices the Savings over traditional cloning metric in the Data Usage widget.

What does this number represent?

- A. The amount of disk space saved with near-zero byte clones
- B. The amount of disk space saved from compression
- C. The amount of disk space saved with shadow clones
- D. The amount of disk space saved from deduplication

**Answer: A**

Explanation:

The "Savings over traditional cloning" metric in the Data Usage widget on the NDB dashboard reflects the efficiency of NDB's cloning technology compared to traditional full-copy cloning methods. NDB leverages Nutanix's near-zero byte cloning capability, which creates lightweight clones by sharing base data and only storing changes (deltas). This metric specifically quantifies the disk space saved by using these efficient clones instead of duplicating entire datasets, as would occur in traditional cloning. It highlights NDB's storage optimization for database provisioning and management.

\* Option A is correct as it directly ties to NDB's near-zero byte cloning technology, a core feature for space efficiency.

\* Option B (Compression) is incorrect because compression is a separate storage optimization technique not specifically tied to cloning savings.

\* Option C (Shadow clones) is incorrect because shadow clones are a Nutanix feature for caching, not the cloning mechanism used by NDB Time Machines.

\* Option D (Deduplication) is incorrect as deduplication, while related to storage savings, is not the primary mechanism reflected in this cloning-specific metric.

This metric helps administrators quantify the benefits of NDB's cloning approach in terms of storage utilization.

### NEW QUESTION # 21

An administrator needs to work with databases and time machines, but not database parameter profiles.

Which role satisfies this requirement?

- A. super Administrator
- B. Database Infrastructure Administrator
- C. Infrastructure Administrator
- D. Database Administrator (DBA)

**Answer: D**

Explanation:

In the Nutanix Database Automation (NCP-DB) framework, the role that allows an administrator to work with databases and time machines, but not database parameter profiles, is the Database Administrator (DBA)

123. This role provides the necessary permissions to manage databases and time machines, which are essential components of the Nutanix Era solution. However, it does not grant access to database parameter profiles, which are typically managed by other roles<sup>45</sup>.

### NEW QUESTION # 22

Era allows custom metadata to be assigned to entities (clones, time machines, databases, and database servers) by using which component?

- A. Index
- B. Tags
- C. Text

- D. Notes

**Answer: B**

Explanation:

Nutanix Era allows custom metadata to be assigned to entities (clones, time machines, databases, and database servers) by using Tags. Tags are a component of Nutanix Era that allows users to assign custom metadata to various entities, enhancing the ability to organize, search, and manage these entities within the Era platform.

### NEW QUESTION # 23

When an administrator no longer wants to use a software profile version, what happens when it is deprecated?

- A. It can no longer be used for provisioning.
- B. Any database server using that software profile can no longer be patched.
- C. It can be used in provisioning.
- D. Any database server using that profile will be updated to the latest software profile.

**Answer: A**

Explanation:

In Nutanix Database Service (NDB), when an administrator deprecates a software profile version, it is marked as obsolete and restricted from certain operations. Specifically, a deprecated software profile version can no longer be used for provisioning new database instances or VMs. This ensures that only current, supported versions are utilized for new deployments, maintaining consistency and security. Existing database servers using the deprecated profile can continue to operate and may still be patched (if updates are compatible), but the profile itself is excluded from future provisioning tasks.

\* Option A is correct because deprecation explicitly prevents the profile version from being selected for new provisioning, aligning with NDB's lifecycle management.

\* Option B (It can be used in provisioning) is incorrect as this contradicts the purpose of deprecation.

\* Option C (Any database server using that profile will be updated to the latest software profile) is incorrect because deprecation does not automatically update existing servers; it only affects new provisioning.

\* Option D (Any database server using that software profile can no longer be patched) is incorrect because patching existing servers is still possible if compatible updates exist, independent of the profile's deprecated status.

Deprecation is a deliberate administrative action to phase out outdated profiles while preserving existing deployments.

### NEW QUESTION # 24

The screenshot shows the 'Configure Active Directory Access' window in the Nutanix interface. It contains the following fields and controls:

- Configuration Name:** A text input field.
- Domain:** A text input field.
- Primary URL:** A dropdown menu set to 'ldap' followed by a text input field.
- Secondary URL:** A dropdown menu set to 'ldap' followed by a text input field with a placeholder 'IP Address - x.x.x.x'.
- Service Account Username:** A text input field containing 'administrator'.
- Service Account Password:** A password input field with masked characters.
- Buttons:** 'Verify' (with a checkmark icon), 'Cancel', and 'Save'.

An administrator has configured unencrypted Active Directory access as shown in the exhibit.

Which port should be allowed through the firewall to ensure NDB can communicate with Active Directory?

- A. 0

- B. 1
- **C. 2**
- D. 3

**Answer: C**

Explanation:

The exhibit shows the configuration of unencrypted Active Directory (AD) access in NDB, with the "Primary URL" set to ldap:// (indicating LDAP rather than LDAPS). Unencrypted LDAP communication uses port 389 by default. For NDB to communicate with Active Directory, this port must be allowed through the firewall to enable the NDB server to perform authentication and directory lookups using the specified service account (e.g., administrator).

Other options are incorrect in this context:

\* B. 636: This is the default port for LDAPS (LDAP over SSL/TLS), which is encrypted and not applicable since the configuration uses unencrypted LDAP.

\* C. 2009: This is not a standard port for LDAP or AD communication and is unrelated to NDB's AD integration.

\* D. 9440: This is associated with Prism Element's HTTPS management interface, not AD access.

Thus, the verified answer is A. 389, ensuring unencrypted LDAP communication between NDB and Active Directory.

## NEW QUESTION # 25

.....

There are Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 (NCP-DB) exam questions provided in Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 (NCP-DB) PDF questions format which can be viewed on smartphones, laptops, and tablets. So, you can easily study and prepare for your Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 (NCP-DB) exam anywhere and anytime. You can also take a printout of these Nutanix PDF Questions for off-screen study.
