S4EWM-2023考試

NewDumps不僅可靠性強，而且服務也很好。如果你選擇了NewDumps但是C-S4EWM-2023考試沒有成功，我們會100%全額退款給您。NewDumps還會為你提供一年的免費更新服務。

最新的 SAP Certified Associate C-S4EWM-2023 免費考試真題 (Q77-Q82):

問題 #77

Which option do you have in the assignment of storage bin to an activity area?

- A. An activity area must be created automatically for a storage type
- B. Storage bins must be manually assigned to an activity area
- C. A storage bin can be assigned to only one activity area
- **D. Storage bins from different storage types can be assigned to the same activity area**

答案： D

解題說明：

Comprehensive and Detailed In-Depth Explanation:

Activity areas in SAP EWM group bins for specific activities (e.g., picking). Option B ("Storage bins from different storage types can be assigned to the same activity area") is correct because bins from multiple storage types (e.g., high rack, bulk) can share an activity area, configured in SPRO: SCM Extended Warehouse Management > Master Data > Activity Areas > Assign Storage Bins. Option C is incorrect as bins can belong to multiple activity areas for different activities. Options A and D are not mandatory requirements.

問題 #78

What is defined with the preparation time in the warehouse order creation rule?

- **A. The time required by an employee to prepare the processing of the warehouse order**
- B. The time required by the system for the picking strategy
- C. The time required by the resource until it reaches the storage type
- D. The time required by the wave for the creation process

答案： A

解題說明：

Preparation Time in Warehouse Order Creation Rule

* Employee Preparation Time (D): Reflects the time required for workers to get ready for processing the warehouse order, such as collecting tools or moving to the work area.

Excluded Options

* A (Resource Reach Time): Preparation time does not directly account for the time taken to reach storage types.

* B (System Picking Time): Picking strategy time is separate from preparation time.

* C (Wave Creation Time): Wave processing time is managed independently.

SAP S/4HANA Cloud Private Edition Reference

* Check Warehouse Order Creation Rules and Parameters in SAP EWM documentation.

問題 #79

An exception code can be triggered by the system or entered by a user. What must you assign to an external exception code? Note: There are 2 correct answers to this question.

- A. An execution step
- **B. An internal exception code**
- **C. A business context**
- D. A workflow as a follow-on action

答案： B,C

解題說明：

Comprehensive and Detailed In-Depth Explanation:

External exception codes in SAP EWM handle deviations. Option B ("A business context") is correct as it defines where the code applies (e.g., picking), and option C ("An internal exception code") is correct because it maps the external code to an internal action, both configured in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Exception Handling > Define Exception Codes. Option A (workflow) is optional, and option D (execution step) is not a standard assignment.

問題 #80

What are characteristics of the early capacity check? Note: There are 2 correct answers to this question.

- A. It is based on capacities of bin types
- B. It is done during the actual putaway process
- C. It happens during the warehouse task creation
- D. It is only available when working with mobile devices

答案： A,C

解題說明：

Comprehensive and Detailed In-Depth Explanation:

The early capacity check in SAP EWM ensures bins can accommodate stock before task execution. Option C ("It happens during the warehouse task creation") is correct as it occurs when tasks are generated, and option D ("It is based on capacities of bin types") is correct because it uses bin type capacity data, both configured in SPRO: SCM Extended Warehouse Management > Goods Receipt Process > Capacity Check. Option A (mobile devices) is incorrect as it's not device-specific, and option B (during putaway) is too late for an "early" check.

問題 #81

Which assignment do you make to create external process steps in process-oriented storage control?

- A. External process step to a work center
- B. External process step to a storage process
- C. External process step to a warehouse process type
- D. External process step to an SAP internal process step

答案： D

問題 #82
