Hence one can see that the Salesforce Certified B2C Commerce Architect learn tool compiled by our company are definitely the best choice for you.

Salesforce Certified B2C Commerce Architect Sample Questions (Q12-Q17):

NEW QUESTION # 12

A new project for a Client will involve a few different Integrations to their middleware system resulting in four different web services. All will use the same credentials to the middleware. Each will have the same timeout, but will require a separate log file prefix. How should the Architect set this up with the Service framework using a minimal set of configuration?

- A. Four Service Configurations, One Service Profile, One Service Credential.
- B. Four Service Configurations, Four Service Profiles, One Service Credential
- C. One Service Configuration, Four Service Profiles, One Service Credential.
- D. Four Service Configurations, Four Service Profiles, Four Service Credentials

Answer: A

Explanation:

For setting up multiple integrations that require the same credentials and timeout settings but need separate log file prefixes: Four Service Configurations are needed to specify the unique endpoint and other specifics for each of the four web services. One Service Profile can be used for all these configurations because they share the same timeout and other settings, optimizing the configuration process. One Service Credential is sufficient since all services authenticate with the same credentials, simplifying credential management and security handling. This setup reduces redundancy and complexity in the service framework, ensuring a streamlined and efficient integration process while meeting all specified requirements.

NEW QUESTION # 13

The developer has been given the following business requirement: The shipping method, "Free Standard Ground Shipping" has an exclusion for products with 'category equals or is child of electronics-televisions.' The marketing department has scheduled a sale offering a "Free Standard Ground Shipping" method for brand XyzTv televisions for the next 3 months. What method accomplishes this while following best practices'

- A. Create a new shipping method and label it "Free Standard Ground Shipping". Give it the qualifier 'brand equals XyzTv', and add it to the checkout options.
- B. Create an allow list for the existing shipping method by adding a product exclusion for 'brand equals XyzTv' to the exclusion list fo<" "Free Standard Ground Shipping "
- C. Extend the CheckoutShippingServices controller using module.superModule and add an exception for the specified brand.
- D. Extend the code in cartridge/models/shipping/shippingMethod.js using module.superModule and add an exception for the specified brand.

Answer: C

NEW QUESTION # 14

During implementation, the team found that there is a notification controller exposed for an external service that marks the order as paid when notification is received. The notification URL is sent to the service together with the payment request and contains only the URL with orderID as the parameter. What should the Architect recommend to the team in order to prevent the unauthorized usage of the controller to mark the orders as paid?

- A. Add HTTPS restriction to the controller start node.
- B. Add a customer number in the callback URL and match the customer number against the one stored on the order.
- C. Add a session attribute and validate it on the callback.
- D. Add an order token in the callback URL and match the token against the one stored on the order.

Answer: D

NEW QUESTION # 15

During a load test the storefront shows steady but slow performance on all the paces being tested. The Architect opens Pipeline Profiler and sorts the data by *total time" column. The following come as the top Ave items:

Controller Name	Function Name	Hits	Total Time	Average Time	Minimum Time	Maximum Time
Product	Detail	28,880	23,606,640	807	29	2,311
Search	Show	32,400	1,030,860	464	107	1,143
Home	IncludeHeaderMenu	5,184	10,776,564	2,079	2,056	
Product	HitTile	239,760	7,944,480	33	10	245
Product	ShowInCategory	38,880	2,663,280	69	33	100

Which controller should the Architect focus on to further investigate the performance issue?

- A. Search Show as this Is one of the key controllers that the customer uses

- B. Home-IncludeHeaderMenu as It has highest average time.
- C. Product-Detail as It has the highest total time and highest maximum time.
- D. Product-HitTile as it has the highest hits during the load test.

Answer: B

NEW QUESTION # 16

The Client has just acquired a new brand and wants to integrate the new brand's current e-commerce site into a current realm as a new site. The acquisition has its own Enterprise Resource Planning (ERP) system for product data and inventory. The new site will use the existing realm's Order Management System (OMS) and Customer Relationship Management (CRM) system. What two requirements does the Architect need to keep in mind when creating the technical specification document? Choose 2 answers

- A. A new order export job must be created to export orders.
- B. A new inventory import job must be created to manage inventory.
- C. A new product import job must be created to manage products.
- D. A new customer export job must be created to export customers.

Answer: B,C

Explanation:

When integrating a new brand's e-commerce site into an existing realm, the architect needs to ensure that product data and inventory from the new brand's Enterprise Resource Planning (ERP) system are correctly managed within the realm. Therefore, creating new import jobs for products (Answer B) and inventory (Answer C) is essential. These import jobs will facilitate the synchronization of the new brand's product catalog and inventory levels with the existing Order Management System (OMS) and Customer Relationship Management (CRM) systems of the realm. Such integration is crucial for maintaining up-to-date product and inventory information across the systems, ensuring seamless operations and data consistency.

NEW QUESTION # 17

.....
