Pass Guaranteed High Hit-Rate Microsoft - PL-200 - Microsoft Power Platform Functional Consultant Pass4sure Pass Guide

Students are worried about whether the PL-200 practice materials they have purchased can help them pass the exam and obtain a certificate. They often encounter situations in which the materials do not match the contents of the exam that make them waste a lot of time and effort. But with PL-200 exam dump, you do not need to worry about similar problems. Because our study material is prepared strictly according to the exam outline by industry experts, whose purpose is to help students pass the exam smoothly. As the authoritative provider of PL-200 Test Guide, we always pursue high passing rates compared with our peers to gain more attention from potential customers. In order to gain the trust of new customers, PL-200 practice materials provide 100% pass rate guarantee for all purchasers. We have full confidence that you can successfully pass the exam as long as you practice according to the content provided by PL-200 exam dump. Of course, if you fail to pass the exam, we will give you a 100% full refund.

Target Audience + Requirements

The intended candidates for this Microsoft test are Power Platform Functional Consultants. These professionals partner with the quality assurance team to guarantee that defined solutions fulfill both functional and non-functional prerequisites. They also have the relevant skills in identifying, delivering, and generating artifacts for deployment and packaging to the DevOps Engineers, as well as offer maintenance & operations training and mentoring to the Power Platform Administrators.

The students for the Microsoft PL-200 certification exam should have the capacity to create application enhancements, system integrations, custom visualization, custom user experiences, custom process automation, and data conversions. It is recommended that they familiarize themselves with Dynamics 365 model-driven apps. They should also have practical experience in the use of

Power Platform elements to customize and extend Dynamics 365 model-driven apps.

Microsoft PL-200 Exam is a valuable certification for anyone who wants to demonstrate their expertise in Microsoft Power Platform. It provides a recognized standard of excellence in the industry and can help individuals advance their careers and stand out in the job market.

Microsoft Power Platform Functional Consultant Sample Questions (Q62-Q67):

NEW QUESTION # 62
A company has employees in France, Mexico, and the United States. You are creating a Power Apps app to allow users to add client records to Microsoft Dataverse. The default language for the company is English.
The company wants the app to display each local language.
You need to add the Spanish and French languages.
Which four actions should you perform in sequence for each language? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Import the solution.	
Export translations.	
Replace the language code column and translated wording in the CrmTranslations.xml file.	
Select an unmanaged solution.	
Select a managed solution.	
Add a language code column and translated wording in the CrmTranslations.xml file.	
Import translations.	
Export the solution.	

Answer:

Explanation:

Actions	Answer Area
Import the solution.	Select an unmanaged solution.
Export translations.	Export translations.
Replace the language code column and translated wording in the CrmTranslations.xml file.	Add a language code column and translated wording in the CrmTranslations.xml file.
Select an unmanaged solution.	Import translations.
Select a managed solution.	
Add a language code column and translated wording in the CrmTranslations.xml file.	
Import translations.	
Export the solution.	

Explanation
Step 1: Select an unmanaged solution.
Export the localizable text
The scope of the localizable text that will be exported is the unmanaged solution that contains the localizable text.

From Power Apps, select Solutions.

In the All Solutions list, select the unmanaged solution that contains the localizable text you want.

On the command bar, select Translations > Export Translations.

Step 2: Export translations.

Step 3: Add a language code column and a translated wording in the CrmTranslations.xml file.

Get the localizable text translated

You can send this file to a linguistic expert, translation agency, or localization firm.

If you have the knowledge to translate the text, or if you just want to see the format, you can extract the zip file that you exported you will see that it contains two XML files.
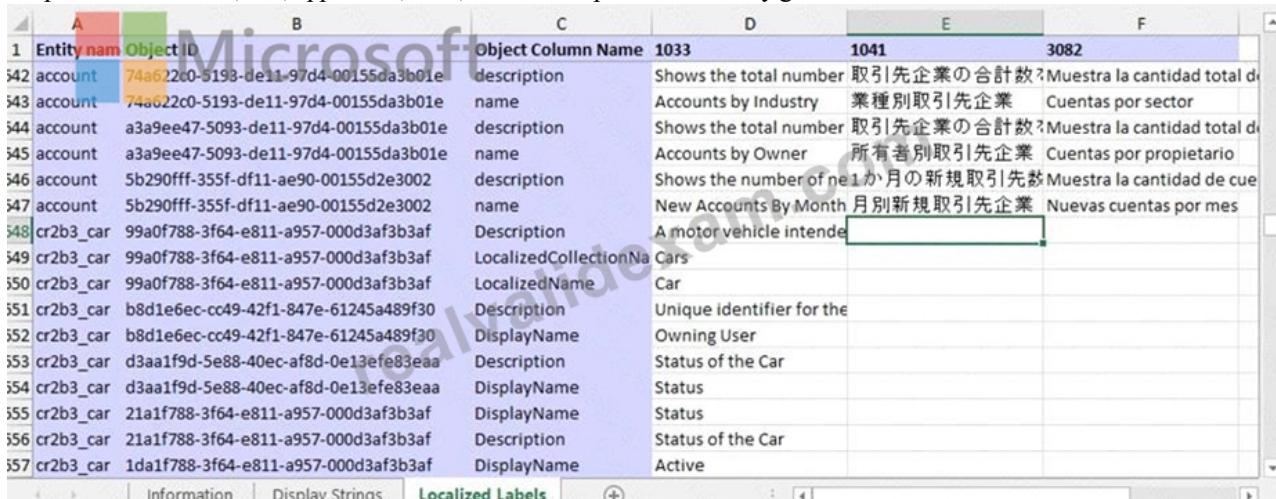

[Content_Types].xml

CrmTranslations.xml

You can open the CrmTranslations.xml file with Microsoft Office Excel.

When you view the data in Excel, look at the Localized Labels tab.

Graphical user interface, text, application, table, Excel Description automatically generated

Information | Display Strings | **Localized Labels** | (+)

Any custom tables or columns will have empty cells for the localizable text. Add the localized values for those items.

Step 4: Import translations.

Import the localized text

Importing the text requires compressing the files and importing them into the system.

Import the files

From the same unmanaged solution that you exported the translations from, in the menu choose Translations > Import Translations.

Note: If you have customized table or column text, such as column labels or drop-down list values, you can provide the users in your environment who are not working with the base language version of your environment with this customized text in their preferred languages.

The process has the following steps:

Enable other languages for your environment

Export the localizable text

Get the localizable text translated

Import the localized text

NEW QUESTION # 63

You create a desktop flow to interact with a certification authority's website.

You need to get data in and out of the desktop flow.

How should you set up the input and output parameters? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Parameter direction	Configuration
Inbound	⌄
	Copy and paste qualification data into the desktop flow.
	Run a cloud flow from the Dataverse qualification record to send data to the desktop flow.
	Connect by using the Dataverse connector from the desktop flow and retrieve the qualification data.
Outbound	⌄
	Copy and paste the verification data into the qualification record.
	Send data from the desktop flow to a cloud flow to update the qualification record.
	Connect by using the Dataverse connector from the desktop flow and the qualification record

Answer:

Explanation:

Parameter direction	Configuration
Inbound	⌄
	Copy and paste qualification data into the desktop flow.
	Run a cloud flow from the Dataverse qualification record to send data to the desktop flow.
	Connect by using the Dataverse connector from the desktop flow and retrieve the qualification data.
Outbound	⌄
	Copy and paste the verification data into the qualification record.
	Send data from the desktop flow to a cloud flow to update the qualification record.
	Connect by using the Dataverse connector from the desktop flow and the qualification record

Explanation

Box 1: Connect by using the Dataverse connector from the desktop flow and retrieve the qualification data.

All information sent by clients for services is stored in Microsoft Dataverse with a model-driven app as the interface.

Qualification verification

The qualification table contains details about an individual school degree, professional qualifications, and other qualifications that must be verified.

A service request can have one or more Qualification records associated with it.

Record status is pending verification until the initial team member finishes, at which point the member changes the status to Complete.

When all qualification records related to a service request are verified either by manual or automated processes, the results are made available to ADatum Corporation's client.

In the rare event that results are questioned, a new service request is created and verified independently of the previous work that took place.

Box 2: Send data from the desktop flow to a cloud flow to update the qualification record.

To complete a service request, users perform the following actions:

Send a templated email by using Microsoft Outlook to the client after all qualifications for a service request are checked.

Change the service request status to Completed. Currently, service requests do not indicate when all Qualification records are addressed.

NEW QUESTION # 64

You create a canvas app.

The app requires access to data that is stored in collections. The app must provide the following actions:

* Create a new collection variable.

* Remove table values from a collection.

You need to configure functions for the app.

Which functions should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Action	Function
Create a new collection variable.	Collect ⌄
	Set
	Select
	Collect
	AddColumns
Remove table values from a collection.	Clear ⌄
	Clear
	Reset
	Revert
	DropColumns

Answer:

Explanation:

Answer Area

Action	Function
Create a new collection variable.	Collect
	Set
	Select
	Collect
	AddColumns
Remove table values from a collection.	Clear
	Clear
	Reset
	Revert
	DropColumns

Explanation

Answer Area

Action	Function
Create a new collection variable.	Collect
Remove table values from a collection.	Clear

NEW QUESTION # 65
You implement an editable grid for the Account entity.
The business team provides the following list of features that they would like you to implement:
Group by or sort columns in the current view.
Configure a business rule to show an error message.
Edit values in calculated fields.
Edit the Address composite field.
Use the editable grid on mobile phones.
Which actions can you perform? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Action	Can be performed?
Group by or sort columns in the current view.	Yes / No
Configure a business rule to show an error message.	Yes / No
Edit values in calculated fields.	Yes / No
Edit the Address composite field.	Yes / No
Use the editable grid on mobile phones.	Yes / No

Answer:

Explanation:

Action	Can be performed?
Group by or sort columns in the current view.	**Yes** / No
Configure a business rule to show an error message.	**Yes** / No
Edit values in calculated fields.	**Yes** / No
Edit the Address composite field.	Yes / **No**
Use the editable grid on mobile phones.	Yes / **No**

NEW QUESTION # 66

You need to manage contact duplicates for the administrative staff.
What should you do?

- A. Create two duplicate detection rules and two duplicate detection jobs, and update duplicate detection settings.
- B. Create two duplicate detection rules and one duplicate detection job.
- C. Create one duplicate detection rule and one duplicate detection job, and update duplicate detection settings.

Answer: C
