100% Pass Analytics-Con-201 Reliable Dumps - Salesforce Certified CRM Analytics and Einstein Discovery Consultant Realistic Free Learning Cram

If you are worried for preparation of your Analytics-Con-201 exam, so stop distressing about it because you have reached to the reliable source of your success. VCETorrent is the ultimate solution to your all Salesforce Designing and Implementing Cloud Data Platform Solutions related problem. It provides you with a platform which enables you to clear your Analytics-Con-201 Exam. VCETorrent provides you Analytics-Con-201 exam questions which is reliable and offers you a gateway to your destination.

Salesforce Certified CRM Analytics and Einstein Discovery Consultant Sample Questions (Q31-Q36):

NEW QUESTION # 31
A user is able to access the dashboards, lenses, and datasets of a particular app but is unable to change the name of the specific app.
What is causing the issue?

- A. The app name cannot be changed once created.
- B. The user does not have Manager access for that app.
- C. The user does not have Editor access for that app.

Answer: B

Explanation:
In CRM Analytics, the ability to modify the name of an app or make other significant changes typically requires Manager access. This level of access is distinct from Editor or Viewer permissions, which may allow for modifications to contents within the app but not to the app's core properties like its name. Here's the reasoning:
* Access Restrictions: Manager access is specifically designed to control structural changes within the app, including renaming the app, which is considered a higher privilege operation.
* Role-Based Access Control: This ensures that only users with the necessary permissions can make significant changes, protecting the integrity and configuration of the app.
Ensuring users have the appropriate level of access based on their responsibilities is a fundamental aspect of managing security and functionality in CRM Analytics.

NEW QUESTION # 32
A project team member uploads a CSV file to CRM Analytics, and they notice a few records failed during the upload. The manager wants to view the error log generated so this can be fixed and uploaded again. The manager has the CRM Analytics administrator permissionbut is unable to download the error log details.
Why is the manager unable to download the log details?

- A. Only the user who uploaded the external data file can download the error log.
- B. They do not have the Download CRM Analytics Data permission enabled.
- C. They do not have the Upload External Data to CRM Analytics permission enabled.

Answer: A

Explanation:
In CRM Analytics, when a CSV file is uploaded and errors occur during the upload process, an error log is generated. However, only the user who uploaded the external data file can download the error log, even if other users have administrative permissions. This restriction ensures that only the user responsible for the data upload can access the details to resolve the issues.

NEW QUESTION # 33
A consultant wants to understand what the important predictors are in a model.
Where is this information found?

- A. Model Settings
- B. Einstein Recommendations
- C. Model Deployment Wizard

Answer: A

Explanation:
The important predictors of a model in CRM Analytics can typically be found under theModel Settings. This area provides detailed information about the configuration and the inputs (predictors) used to train the model.
Insights into which predictors have the most significant impact on the model's outcomes can be gleaned from this section, enabling a deeper understanding of the model's internal workings and the factors driving predictions.

NEW QUESTION # 34
A consultant sets up a Sales Analytics templated app that is very useful for sales operations at Universal Containers (UC). UC wants to make sure all of the data assets associated with the app, including:
recipes, dataflows, connectors, Einstein Discovery models, and prediction definitions are refreshedeveryday at
6:00 AM EST.
How should the consultant proceed?

- A. Use the Data Manager and schedule each item to run at 6:00 AM EST based on 'Time-based Scheduling'.

- B. Use the App Install History under Analytics Settings and schedule the app to run at 6:00 AM EST.
- C. Use the Data Manager and schedule the recipes/dataflows to run at 6:00 AM EST based on 'Time-based Scheduling'.

Answer: B

NEW QUESTION # 35

consultant is reviewing a model that is set to maximize the daily sales quantity of consumer products in stores, and they see this recommendation.
Which action should the consultant take?

- A. Remove the Store field from the model definition, because that is the recommended action.
- B. Ignore alert; the explanation of variation is only 35%, which is below 50%,
- C. Verifyclient expectations that Store is a strong predictor for daily sales quantity.

Answer: C

Explanation:
Upon reviewing the data model and noticing the high correlation alert between 'Store' and daily sales quantity, the appropriate action is to verify with the client their expectations regarding the influence of the Store field on daily sales. Here's the rationale:
* Understanding the Role of 'Store' in the Model: Before making any changes to the model, it's crucial to understand whether the 'Store' field is expected to be a strong predictor based on the business context. If the client expects that different stores inherently have different sales volumes due to factors like location, size, or customer base, this correlation may be both meaningful and desired.
* Potential Data Leakage: High correlation warnings can sometimes indicate data leakage, where a predictor (like 'Store') might inadvertently include information about the outcome variable (daily sales quantity). It's essential to verify whether this correlation makes sense logically or if it's skewing the model predictions.
* Client Consultation: Consulting with the client helps ensure that any modeling decisions align with their business knowledge and expectations. It's about validating the model against real-world expectations and ensuring it remains a useful tool for decision-making.
By taking these steps, the consultant not only adheres to best practices in data science by validating model inputs and their implications but also ensures that the model aligns with the client's business strategies and operational realities.

NEW QUESTION # 36

......

The trouble can test a person's character. A bad situation can show special integrity. When to face of a difficult time, only the bravest people could take it easy. Are you a brave person? If you did not do the best preparation for your IT certification exam, can you take it easy? Yes, of course. Because you have VCETorrent's Salesforce Analytics-Con-201 Exam Training materials. As long as you have it, any examination do not will knock you down.
