

2026 Latest Cisco 300-710 Actualtest

DOWNLOAD the newest PDFBraindumps 300-710 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1M3zqugqs9Y2JLuHDLOtLaBdEKPnuwB1Y>

We provide the Cisco 300-710 exam questions in a variety of formats, including a web-based practice test, desktop practice exam software, and downloadable PDF files. PDFBraindumps provides proprietary preparation guides for the certification exam offered by the 300-710 Exam Dumps. In addition to containing numerous questions similar to the 300-710 exam, the Securing Networks with Cisco Firepower (300-710) exam questions are a great way to prepare for the Cisco 300-710 exam dumps.

Cisco 300-710 is a certification exam that evaluates a candidate's skills and knowledge in implementing and configuring Cisco Firepower Threat Defense technology. 300-710 exam is designed to help individuals working in the networking and IT security field to enhance their skills in securing networks through the use of Cisco Firepower Threat Defense. The Cisco 300-710 exam is a vital certification that demonstrates an individual's expertise in network security and their ability to secure networks using the latest technologies.

Cisco 300-710 Exam covers various topics, including network security concepts, Firepower Threat Defense architecture, deployment, and management. 300-710 exam also covers topics such as network access control, Firepower Threat Defense policy configuration, intrusion prevention system, and advanced malware protection. With this certification, candidates can demonstrate their expertise in Cisco Firepower solutions and gain recognition for their skills.

300-710 Reliable Test Notes & 300-710 Exam Simulator Free

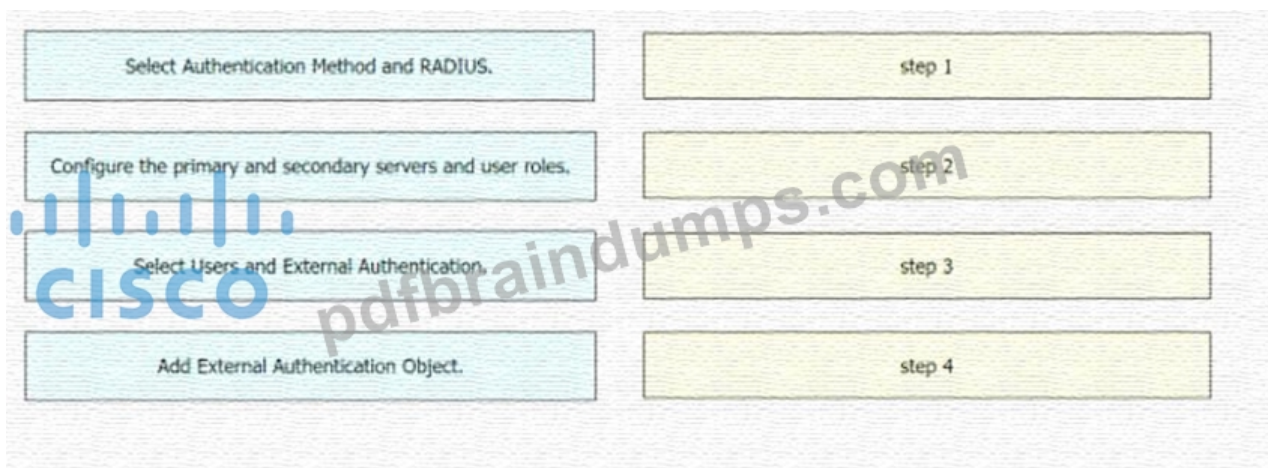

Our PDF version of 300-710 training materials is legible to read and remember, and support printing request. Software version of 300-710 practice materials supports simulation test system, and give times of setup has no restriction. Remember this version support Windows system users only. App online version of 300-710 Exam Questions is suitable to all kinds of equipment or digital devices and supportive to offline exercise on the condition that you practice it without mobile data.

Cisco 300-710 Certification Exam is intended for network security engineers, network designers, network administrators, and security analysts who are responsible for securing enterprise networks. 300-710 exam tests the candidates on various topics related to Cisco Firepower NGFW, including advanced threat protection, policy management, network analysis and visibility, and platform architecture.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q125-Q130):

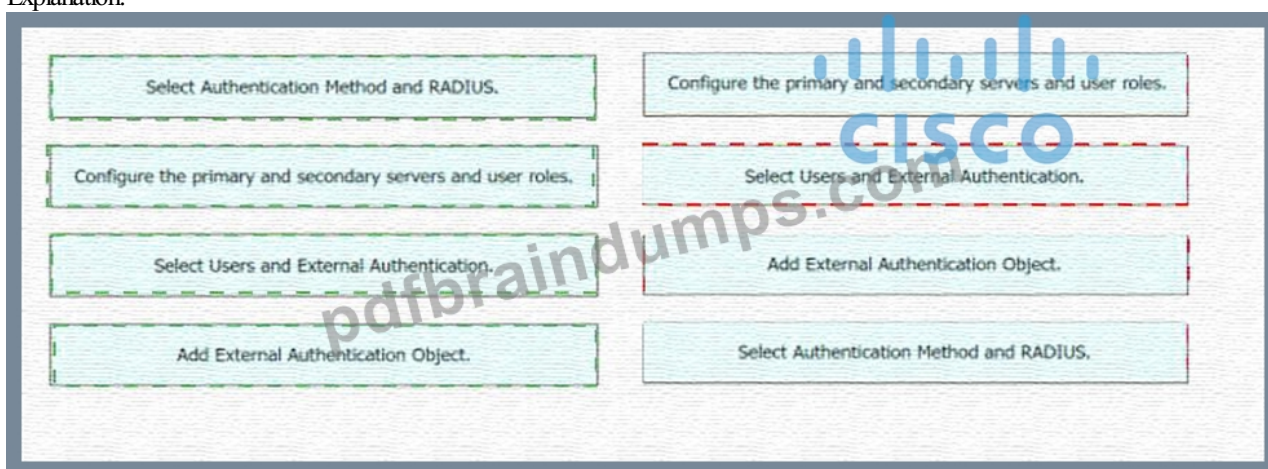

NEW QUESTION # 125

Drag and drop the configuration steps from the left into the sequence on the right to enable external authentication on Cisco FMC to a RADIUS server.

Answer:

Explanation:

Explanation:

4, 1, 2, 3

NEW QUESTION # 126

Refer to the exhibit. A Cisco Secure Firewall Management Center, 7.0 device fails to receive intelligence feed updates. The Cisco Secure Firewall Management Center is configured to use a proxy server that performs SSL inspection. Which action allows the Cisco Secure Firewall Management Center device to download the intelligence feed updates?

```
admin@Sourcefire3D:~$ cat /var/log/messages
Sourcefire3D SF-IMS[2004]: [2011] CloudAgent:IPReputation [WARN] Cannot download
Sourcefire_Intelligence_Feed

Sourcefire3D SF-IMS[24085]: [24090] CloudAgent:IPReputation [WARN] Download
unsuccessful: Failure when receiving data from the peer
```

- A. Install a self-signed certificate on the proxy server for intelligence.sourcefire.com.
- B. Verify that the proxy server can use HTTPS to communicate to the internet.
- C. Ensure that proxy authentication is disabled for the Cisco Secure Firewall Management Center device.
- **D. Bypass the proxy server for intelligence.sourcefire.com.**

Answer: D

Explanation:

Bypassing the proxy for the Cisco threat-intelligence endpoint ensures the FMC connects directly using a trusted certificate chain, avoiding SSL-inspection breaks that prevent feed downloads.

NEW QUESTION # 127

Which two OSPF routing features are configured in Cisco FMC and propagated to Cisco FTD? (Choose two.)

- A. MD5 authentication to OSPF packets
- B. virtual links
- C. area boundary router type 1 LSA filtering
- D. SHA authentication to OSPF packets
- E. OSPFv2 with IPv6 capabilities

Answer: A,B

Explanation:

Reference: https://www.cisco.com/c/en/us/td/docs/security/firepower/620/configuration/guide/fpmc-config_guide-v62/ospf_for_firepower_threat_defense.html

NEW QUESTION # 128

What is an attribute of the risk reporting capability in Cisco Secure Firewall Management Center?

- A. Includes the current domain in a multidomain system
- B. Uses the same templates available to standard reports
- C. Includes all domains in a multidomain system
- D. Uses the XML format to export all reporting

Answer: A

Explanation:

Risk reports in FMC are generated per domain context and only cover the objects and events within the active (current) domain, not the entire multidomain hierarchy.

NEW QUESTION # 129

A security engineer manages a firewall console and an endpoint console and finds it challenging and time consuming to review events and modify blocking of specific files in both consoles. Which action must the engineer take to streamline this process?

- A. Within the Cisco Secure Endpoint console, copy the connector GUID and paste into the Cisco Secure Firewall Management Center (FMC) AMP tab.
- B. From the Cisco Secure Endpoint console, create and copy an API key and paste into the Cisco Secure AMP tab.
- C. From the Secure FMC, create a Cisco Secure Endpoint object and reference the object in the Cisco Secure Endpoint console.
- D. Initiate the integration between Secure FMC and Cisco Secure Endpoint from the Secure FMC using the AMP tab.

Answer: D

Explanation:

To streamline the process of reviewing events and modifying blocking of specific files across both the firewall console and the endpoint console, the security engineer should initiate the integration between Secure FMC and Cisco Secure Endpoint (formerly AMP for Endpoints) from the Secure FMC using the AMP tab.

Steps:

In the FMC, navigate to Devices > Device Management.

Select the device and go to the AMP tab.

Initiate the integration by configuring the necessary API credentials and linking the FMC to the Cisco Secure Endpoint console.

This integration allows the security engineer to view endpoint events and apply blocking actions directly from the FMC, consolidating the management tasks. This approach simplifies the workflow by providing a single interface to manage both network and endpoint security, reducing the time and effort required to maintain security across the organization.
