Three User-Friendly Formats of TopExamCollection Microsoft PL-400 Updated Practice Materials

At this time, you will stand out in the interview among other candidates with the PL-400 certification. Constant improvement is significant to your career development. Your current achievements cannot represent your future success. Never stop advancing. Come to study our PL-400 Learning Materials. Stick to the end, victory is at hand. Action always speaks louder than words. With the help of our PL-400 study questions, you can reach your dream in the least time.

Microsoft Power Platform Developer Sample Questions (Q266-Q271):

NEW QUESTION # 266

A school district wants to standardize student information and student performance records. Students in the district are assigned to a specific school. Students are evaluated using class records.

When students move between schools in the middle of a school year, the student's current class history must be available to the administrators at the new school.

You need to configure Microsoft Dataverse tables to connect the class history records to their respective class records.

How should you configure the table? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-entity-relationships#types-of-table-relationships>

NEW QUESTION # 267

You are developing a Power Platform solution.

You must add a custom control slider to a specific step in a business process flow.

You need to add the custom control.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Here are the steps you must follow to add custom controls to a business process flow:

Step 1: Configure custom controls on a related entity.

Step 2: Generate and exporting the business process flow form.

Step 3: Copy custom control configurations to the FormXML for the business process flow.

Step 4: Import customizations into the Microsoft Dataverse environment.

Note:

* Configure custom controls on a related table form.

* Generate and exporting the business process flow form.

* Copy custom control configurations to the business process flow form from the related table form.

* Import the customizations back into Microsoft Dataverse.
