DOWNLOAD the newest CramPDF 1z0-1093-25 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1RKlgWKThxKtWKZm9d5vgvJJZ4R\\_y2bS](https://drive.google.com/open?id=1RKlgWKThxKtWKZm9d5vgvJJZ4R_y2bS)

We hope you can find the information you need at any time while using our 1z0-1093-25 study materials. In addition to the content updates, our system will also be updated for the 1z0-1093-25 training materials. If you have any opinions, you can tell us that our common goal is to create a product that users are satisfied with. We have three different 1z0-1093-25 Exam Braindumps for you to choose: the PDF, Software and APP online. And the varied displays can help you study at any time and condition.

In this cut-throat competitive world of Oracle, the Oracle 1z0-1093-25 certification is the most desired one. But what creates an obstacle in the way of the aspirants of the Oracle Cloud Database Services 2025 Professional (1z0-1093-25) certificate is their failure to find up-to-date, unique, and reliable Oracle Cloud Database Services 2025 Professional (1z0-1093-25) practice material to succeed in passing the Oracle 1z0-1093-25 certification exam.

## 1z0-1093-25 New Test Bootcamp & 1z0-1093-25 Vce Torrent

Our company is trying to satisfy every customer's demand. Of course, we also attach great importance on the quality of our 1z0-1093-25 real test. Every product will undergo a strict inspection process. In addition, there will have random check among different

kinds of 1z0-1093-25 Study Materials. The quality of our 1z0-1093-25 exam quiz deserves your trust. Most of our customers are willing to introduce their friends to purchase our 1z0-1093-25 learning dumps.

## Oracle 1z0-1093-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle's high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle's NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle's Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle's Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure.</li></ul>

## Oracle Cloud Database Services 2025 Professional Sample Questions (Q29-Q34):

### NEW QUESTION # 29

Which two statements are true about the Oracle Cloud Infrastructure (OCI) Monitoring tools available for Base Database Service Virtual Machine DB Systems?

- A. Customer-installed monitoring agents are strictly prohibited on Base Database Service Virtual Machine DB Systems to maintain security compliance.
- B. Oracle Cloud Agent collects OS, VM, and Database metrics, which are reported to the OCI Monitoring service and can be visualized via charts or dashboards.
- C. The OCI Monitoring service allows users to define alarms based on metric thresholds, triggering notifications via OCI Notifications service.
- D. DB system performance events are only accessible via the Oracle Database Enterprise Manager interface, and these events cannot be integrated with OCI monitoring tools.
- E. Only Oracle Cloud Agent metrics can be used for metric data charting, alarming, and notifications. OS metrics can only be collected.

**Answer: B,C**

Explanation:

Oracle Cloud Agent Capabilities (C):

The Oracle Cloud Agent collects a wide range of metrics, including OS-level, VM, and database performance metrics. These metrics are integrated with the OCI Monitoring service, where users can view them in customizable charts and dashboards.

Alarms and Notifications (D):

The OCI Monitoring service enables users to set alarms that trigger when certain thresholds are exceeded.

Notifications are sent via the OCI Notifications service, providing proactive monitoring and alerting.

Why the other options are incorrect:

- \* A: Users can use custom metrics alongside Oracle Cloud Agent metrics.
- \* B: Customers are allowed to install additional monitoring agents if needed.
- \* E: Performance data can be integrated with OCI monitoring tools, not limited to Enterprise Manager.

### NEW QUESTION # 30

Which of the following characteristics is most indicative of a NoSQL database's focus on scalability and availability over strict consistency?

- A. Reliance on a centralized, single-instance architecture.
- B. Support for complex joins and transactions across multiple tables.
- C. Partitioning and replication of data across multiple nodes.
- D. Enforcement of strict referential integrity constraints.

**Answer: C**

Explanation:

C: Partitioning and replication of data across multiple nodes:

- \* NoSQL databases typically prioritize horizontal scalability by distributing data across multiple nodes.
- \* Replication ensures data availability even if one node fails.
- \* This approach leads to eventual consistency rather than strict ACID compliance.
- \* The system can continue to operate despite some nodes being offline, maintaining high availability.

Why the other options are incorrect:

- \* A. Complex joins and transactions: Typical of relational databases prioritizing consistency.
- \* B. Strict referential integrity: More common in SQL databases requiring ACID transactions.
- \* D. Centralized architecture: Opposite of scalable, distributed NoSQL models.

### NEW QUESTION # 31

Which two are valid storage options you must select when provisioning Exadata Database Service using the Oracle Cloud Infrastructure (OCI) Console?

- A. The database name and version.
- B. Data disk group encryption using Oracle Cloud Infrastructure Vault.
- C. The size of the DATA disk group and RECO disk group.
- D. Data disk group compression and deduplication algorithm.
- E. The number of CPUs required for the Exadata Database Service Instance.

**Answer: B,C**

Explanation:

A: Data disk group encryption using OCI Vault provides enhanced security for sensitive data by encrypting data stored within the Exadata storage cells.

B: During provisioning, the size of the DATA and RECO disk groups must be specified. The DATA disk group is used for primary database files, while the RECO disk group is used for recovery-related files.

Why the other options are incorrect:

- \* C: CPU count is part of the compute configuration, not storage.
- \* D: Compression and deduplication settings are managed at the database level, not during storage configuration.
- \* E: Database name and version are part of the database configuration, not storage settings.

### NEW QUESTION # 32

Which two prerequisites are required before you can provision a MySQL HeatWave DB system?

- A. A MySQL Enterprise Edition license.
- B. A Virtual Cloud Network (VCN) with appropriately configured subnets.
- C. A configured OCI Vault with encryption keys for database security.
- D. A pre-configured MySQL database dump for initial data loading.
- E. An OCI Compute instance to act as a client for the MySQL DB system.

**Answer: A,B**

Explanation:

VCN Requirement (B):

A Virtual Cloud Network (VCN) with appropriate subnets is essential to provide network connectivity and isolation for the HeatWave DB system. It ensures secure data flow within the Oracle Cloud Infrastructure.

License Requirement (E):

Since HeatWave is an enterprise feature, it requires a MySQL Enterprise Edition license. Without this license, the HeatWave functionalities cannot be utilized.

Why the other options are incorrect:

- \* A: Data loading can be performed post-provisioning.
- \* C: While encryption can be configured, it is not a prerequisite.
- \* D: An OCI Compute instance may be used as a client but is not mandatory for provisioning.

### NEW QUESTION # 33

When deploying Exadata Database Service, what is the PRIMARY benefit of using the "Cloud Tooling" deployment option versus manually configuring an on-premises Exadata system?

- A. "Cloud Tooling" automates the provisioning, patching, and lifecycle management of the Exadata infrastructure.
- B. "Cloud Tooling" completely eliminates the need for any database administrator intervention.
- C. "Cloud Tooling" allows using older versions of Oracle Database that are no longer supported on-premises.
- D. "Cloud Tooling" offers significantly more granular control over the underlying hardware configuration.

**Answer: A**

Explanation:

B: Automation of provisioning and management:

- \* Cloud Tooling automates key tasks such as provisioning, patching, scaling, and maintenance.
- \* Reduces manual configuration errors and saves time.
- \* Ensures consistency in setup and updates, minimizing downtime.
- \* Greatly simplifies lifecycle management, making cloud deployments more efficient than on-premises.

Why the other options are incorrect:

- \* A. More granular hardware control: Cloud tooling abstracts low-level hardware management.
- \* C. No DBA intervention: While reduced, DBAs still handle application-specific configurations and performance tuning.
- \* D. Using older database versions: Exadata Cloud Service supports only supported versions, not deprecated ones.

### NEW QUESTION # 34

.....

Our 1z0-1093-25 exam braindumps have become a brand that is good enough to stand out in the market. The high quality product like our 1z0-1093-25 study quiz has no need to advertise everywhere, and exerts influential effects which are obvious and everlasting during your preparation. The exam candidates of our 1z0-1093-25 Study Materials are the best living and breathing ads. Just look at the comments on the 1z0-1093-25 training guide, you will know that how popular they are among the candidates.
