

Quiz 2026 Updated HPE7-A06: HPE Campus Access Switching Expert Written Exam Trustworthy Exam Content

P.S. Free & New HPE7-A06 dumps are available on Google Drive shared by Pass4cram: <https://drive.google.com/open?id=12HHHamskTtnRuByfiWPWQDzAyINbWg>

In this knowledge-dominated world, the combination of the knowledge and the practical working competences has been paid high attention to is extremely important. If you want to improve your practical abilities you can attend the HPE7-A06 certificate examination. Passing the HPE7-A06 Certification can prove that you boost both the practical abilities and the knowledge and if you buy our HPE7-A06 latest question you will pass the HPE7-A06 exam smoothly.

It is time for you to plan your life carefully. After all, you have to make money by yourself. If you want to find a desirable job, you must rely on your ability to get the job. Now, our HPE7-A06 training materials will help you master the popular skills in the office. With our HPE7-A06 Exam Braindumps, you can not only learn the specialized knowledge of this subject to solve the problems on the work, but also you can get the HPE7-A06 certification to compete for a higher position.

HP HPE7-A06 Exam Blueprint, Download HPE7-A06 Pdf

It is apparent that a majority of people who are preparing for the HPE7-A06 exam would unavoidably feel nervous as the exam approaching. If you are still worried about the coming exam, since you have clicked into this website, you can just take it easy now, I can assure you that our company will present the antidote for you--our HPE7-A06 Learning Materials. Our company has spent more than 10 years on compiling study materials for the exam in this field, and now we are delighted to be here to share our study materials with all of the candidates for the exam in this field.

HPE Campus Access Switching Expert Written Exam Sample Questions (Q116-Q121):

NEW QUESTION # 116

You are configuring VSX active gateway on CX 8360 campus aggregation switches when the switch prompt returns the following error: "No more than 16 VMACs can be configured." What should be done to address this issue?

- A. Limit the number of SVIs with active-gateway to 16.
- B. Change the switch profile to "Leal" to increase the number of supported vMACs.
- C. Change the aggregation switch to a higher-end model, such as a CX 8400.
- D. As MAC addresses are link-local, use the same VMAC across SVIs.

Answer: D

Explanation:

The error "No more than 16 vMACs can be configured" occurs when trying to configure active-gateway on multiple SVIs on a CX 8360 VSX pair. This indicates a platform limit on the number of unique virtual MAC addresses has been reached.

* Active Gateway vMACs: Each SVI configured with Active Gateway requires a virtual MAC address (vMAC). While AOS-CX can auto-generate these, doing so consumes entries from a limited hardware pool (e.g., 16 on this platform/version).

* Best Practice & Solution: The recommended best practice to conserve these limited vMAC resources is to manually specify and reuse the same virtual MAC address across all SVIs configured with Active Gateway on that specific VSX pair. Since MAC addresses are Layer 2 local, using the same vMAC on different SVIs (different L3 subnets) does not cause conflicts within the VSX pair's operation.

* Analysis of Options:

- * A: Limiting the number of SVIs using Active Gateway is a workaround, not a solution.
- * B: Changing switch profiles doesn't typically alter hardware vMAC limits.
- * C: Changing to a higher-end switch model might increase limits but is not the first or standard solution.
- * D: Reusing the same vMAC across SVIs (active-gateway ip <vip> mac <SAME_VMAC>) avoids consuming a new vMAC entry for each SVI, thus staying within the platform limit. This is the standard, recommended solution.

* Conclusion: The correct approach to address the vMAC limit error is to explicitly configure the same virtual MAC address for all SVIs using the Active Gateway feature on the VSX pair.

References: AOS-CX VSX Guide (Active Gateway Configuration, Best Practices, vMAC considerations).
This relates to "Network Resiliency and virtualization" (8%) and "Routing" (16%).

NEW QUESTION # 117

What is the maximum number of interfaces that can be active in the same LACP link on AOS-CX access layer switches?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

On AOS-CX switches, an LACP (802.3ad) link aggregation group can include up to 16 active member interfaces. This allows higher bandwidth aggregation and redundancy at the access layer.

NEW QUESTION # 118

Drag and Drop Question

Match the network technology to the customer requirement.

□

Answer:

Explanation:

□

Explanation:

VSX enables active-active link aggregation across switches. VXLAN encapsulates Layer 2 traffic to extend it over Layer 3 networks across sites. VNI (VXLAN Network Identifier) distinguishes Layer 2 segments inside VXLAN overlays. EVPN simplifies configuration and automates control-plane signaling for VXLAN tunnels between sites.

NEW QUESTION # 119

A Python developer was able to read but could not modify the VLAN database on an AOS-CX switch through the REST API. Which settings should the developer check first? (Choose two.)

- **A. REST API settings**
- B. SSH settings
- C. cookie settings
- **D. HTTPS settings**
- E. SNMP settings

Answer: A,D

Explanation:

HTTPS settings → Required because the AOS-CX REST API runs over HTTPS. If HTTPS is not enabled, write operations will

fail.

REST API settings → Must be checked to ensure that the REST API write mode (read/write vs. read-only) is enabled.

NEW QUESTION # 120

A pair of CX 8325 series switches is configured in a VSX cluster. Which function is executed on both VSX members during normal operation?

- A. relays DHCP requests or servers DHCP offer
- B. periodically sends gratuitous ARP and broadcast hello packets
- C. routes PIM and PIM-DR
- D. replies to ARP requests with the cluster vMAC

Answer: C

Explanation:

In an AOS-CX VSX cluster, both members act as independent routing and multicast-capable devices. Each VSX node maintains its own control plane, so both members can independently perform functions like routing, running PIM, and acting as PIM Designated Router (PIM-DR).

Other functions, such as ARP replies with the cluster vMAC or gratuitous ARPs, are handled by the active gateway only, not both switches.

NEW QUESTION # 121

.....

We all need some professional certificates such as HPE7-A06 to prove ourselves in different working or learning condition. So making right decision of choosing useful practice materials is of vital importance. Here we would like to introduce our HPE7-A06 practice materials for you with our heartfelt sincerity. With passing rate more than 98 percent from exam candidates who chose our HPE7-A06 study guide, we have full confidence that your HPE7-A06 exam will be a piece of cake by them.

HPE7-A06 Exam Blueprint: https://www.pass4cram.com/HPE7-A06_free-download.html

So, start your journey by today, get the Pass4cram HPE Campus Access Switching Expert Written Exam (HPE7-A06) study material, and study well, The HP HPE7-A06 test materials are mainly through three learning modes, Pdf, Online and software respectively, HP HPE7-A06 Trustworthy Exam Content Thanks for your understanding, HP HPE7-A06 Trustworthy Exam Content By experts who diligently work to improve our practice materials over ten years, all content are precise and useful and we make necessary alternations at intervals, So your chance of getting success will be increased greatly by our HPE7-A06 study questions.

This trend can be problematic for those studying for an exam because it means HPE7-A06 that study materials can quickly become outdated, A lot of the same attributes of a good teacher are also the qualities that make a good writer.
