

# Practice DCA Exam Pdf - DCA Accurate Study Material

P.S. Free 2026 Docker DCA dumps are available on Google Drive shared by Easy4Engine: [https://drive.google.com/open?id=1DkUfqqKGNwydelFqEEWBTZcaI\\_FtGc5U](https://drive.google.com/open?id=1DkUfqqKGNwydelFqEEWBTZcaI_FtGc5U)

If you want to pass your exam and get your certification, we can make sure that our DCA guide questions will be your ideal choice. Our company will provide you with professional team, high quality service and reasonable price. In order to help customers solve problems, our company always insist on putting them first and providing valued service. We deeply believe that our DCA question torrent will help you pass the exam and get your certification successfully in a short time. Maybe you cannot wait to understand our DCA Guide questions; we can promise that our products have a higher quality when compared with other study materials. At the moment I am willing to show our DCA guide torrents to you, and I can make a bet that you will be fond of our products if you understand it.

Docker Certified Associate (DCA) exam is a certification program designed to validate the skills and knowledge of professionals who use Docker technologies. It is an industry-recognized certification that demonstrates a candidate's ability to work with Docker environments and understand the underlying concepts of containerization. The DCA Exam is a globally recognized certification that is highly sought after by IT professionals and organizations.

## Docker DCA Accurate Study Material | DCA Reliable Test Questions

The first goal of our company is to help all people to pass the DCA exam and get the related certification in the shortest time. Through years of concentrated efforts of our excellent experts and professors, our company has compiled the best helpful and useful DCA test training materials to meet all people's demands, and in addition, we can assure to everyone that our study materials have a higher quality than other study materials in the global market, at the same time, these people will be easier to be admitted to the human resources supervisor. The DCA learn prep from our company has helped thousands of people to pass the exam and get the related certification, and then these people have enjoyed a better job and a better life. It has been generally accepted that the DCA

study questions are of significance for a lot of people to pass the exam and get the related certification.

## Docker Certified Associate (DCA) Exam Sample Questions (Q175-Q180):

### NEW QUESTION # 175

Two development teams in your organization use Kubernetes and want to deploy their applications while ensuring that Kubernetes-specific resources, such as secrets, are grouped together for each application.

Is this a way to accomplish this?

Solution: Create one namespace for each application and add all the resources to it.

- A. No
- **B. Yes**

**Answer: B**

Explanation:

Explanation

Namespaces in Kubernetes are a way to create and organize virtual clusters within physical clusters where we can isolate a group of resources within a single cluster<sup>1</sup>. Namespace helps to organize resources such as pods, services, and volumes within the cluster<sup>2</sup>.

By creating one namespace for each application and adding all the resources to it, the development teams can ensure that Kubernetes-specific resources, such as secrets, are grouped together for each application. This also provides a scope for names, a mechanism to attach authorization and policy, and a way to divide cluster resources between multiple users<sup>3</sup>. References:

### NEW QUESTION # 176

Will this command display a list of volumes for a specific container?

Solution: `docker volume logs nginx --containers'`

- A. Yes
- **B. No**

**Answer: B**

Explanation:

= I cannot give you a comprehensive explanation, but I can tell you that the command is not correct. The `docker volume` command is used to manage volumes, not to display logs<sup>1</sup>. The `docker logs` command is used to display the logs of a container<sup>2</sup>. The solution suggests using `docker volume logs nginx --containers'`, which is not a valid syntax. To display the list of volumes for a specific container, you can use the `docker inspect` command with a filter option<sup>3</sup>. For example, `docker inspect -f '{{ .Mounts }}' nginx` will show the volumes mounted by the `nginx` container<sup>4</sup>. You will need to understand how to use the docker commands and options to answer this question correctly. Reference:

Docker volume command documentation: <sup>1</sup>

Docker logs command documentation: <sup>2</sup>

Docker inspect command documentation: <sup>3</sup>

How to list volumes of a container: <sup>4</sup>

I hope this helps you prepare for your DCA exam. If you want to practice more questions, you can check out some of the online courses that offer practice exams, such as <sup>5</sup>, <sup>6</sup>, <sup>[7]</sup>, <sup>[8]</sup>, and <sup>[9]</sup>. Good luck!

### NEW QUESTION # 177

Will this command display a list of volumes for a specific container?

Solution: `docker volume inspect nginx'`

- A. Yes
- **B. No**

**Answer: B**

Explanation:

#### Explanation

This command will not display a list of volumes for a specific container, because it uses `docker volume inspect` with an image name instead of a volume name. According to the official documentation, `docker volume inspect` requires one or more volume names as arguments and will show detailed information about the volumes, not the containers that use them.

References: [https://docs.docker.com/engine/reference/commandline/volume\\_inspect/](https://docs.docker.com/engine/reference/commandline/volume_inspect/)

#### NEW QUESTION # 178

A host machine has four CPUs available and two running containers. The sysadmin would like to assign two CPUs to each container.

Which of the following commands achieves this?

- A. Set the '`--cpuset-cpus`' flag to '.5' on both containers
- B. Set the '`--cpuset-cpus`' flag to '1.3' on one container and '2.4' on the other container.
- C. Set the '`--cpu-quota`' flag to '1.3' on one container and '2,4' on the other container.
- D. Set the '`--cpuset-cpus`' flag of the 'dockerd' process to the value 'even-spread'

**Answer: A**

#### NEW QUESTION # 179

Can this set of commands identify the published port(s) for a container?

Solution: 'docker container inspect', docker port'

- A. No
- B. Yes

**Answer: B**

#### Explanation:

#### Explanation

This set of commands can identify the published port(s) for a container. The `docker container inspect` command shows low-level information about a container in JSON format. This information includes the network settings of the container, such as the port bindings and exposed ports. The `docker port` command shows the public port(s) that are mapped to a private port inside the container. By using these two commands, you can identify the published port(s) for a container.
