

Test AZ-305 Centres & Exam AZ-305 Book

The image is a composite of two parts. On the left, there is a promotional banner for a practice test. The banner has a light grey background with the text 'PRACTICE TEST' in a blue box at the top, 'AZ-305' in large bold letters, and 'Microsoft 365 Certified Fundamentals' below it. At the bottom, there is a logo for 'measureup' with the text 'Powered By ezy pedago'. On the right, there is a portrait of a woman with blonde hair and glasses, wearing a blue blazer over a patterned top, with her arms crossed.

P.S. Free & New AZ-305 dumps are available on Google Drive shared by PDFTorrent: <https://drive.google.com/open?id=16rl2M3aG1tubODwgyVLs5JNiJYgyfOzN>

For this task, you need to update Microsoft AZ-305 preparation material to get success. If applicants fail to find reliable material, they fail the Microsoft AZ-305 examination. Failure leads to loss of money and time. You just need to rely on PDFTorrent to avoid these losses. PDFTorrent has launched three formats of real Microsoft AZ-305 Exam Dumps.

Microsoft AZ-305 Exam is based on the latest Azure platform and covers a range of topics, including Azure virtual machines, Azure storage, Azure virtual networking, Azure Active Directory, Azure policy, and Azure governance. AZ-305 exam is ideal for IT professionals who want to demonstrate their expertise in designing and implementing Azure solutions, and for those who want to advance their career in cloud computing. AZ-305 Exam is also suitable for developers, architects, and administrators who work with Azure and want to validate their skills and knowledge in the field. Candidates who pass the Microsoft AZ-305 Exam will earn the Microsoft Certified: Azure Solutions Architect Expert certification, which is a highly sought-after credential in the industry.

Microsoft AZ-305 Online Practice Test Engine Recommendation

Continuous improvement is a good thing. If you keep making progress and transcending yourself, you will harvest happiness and growth. The goal of our AZ-305 latest exam guide is prompting you to challenge your limitations. People always complain that they do nothing perfectly. The fact is that they never insist on one thing and give up quickly. Our AZ-305 Study Dumps will assist you to overcome your shortcomings and become a persistent person. Once you have made up your minds to change, come to purchase our AZ-305 training practice.

Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q12-Q17):

NEW QUESTION # 12

Your on-premises network contains a file server named Server1 that stores 500 GB of data. You need to use Azure Data Factory to copy the data from Server1 to Azure Storage. You add a new data factory.

What should you do next? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

From Server1:

Install an Azure File Sync agent
Install a self-hosted integration runtime
Install the File Server Resource Manager role service

From the data factory:

Create a pipeline
Create an import/export job
Provision an Azure-SQL Server Integration Services (SSIS) integration runtime

Answer:

Explanation:

From Server1:

Install an Azure File Sync agent
Install a self-hosted integration runtime
Install the File Server Resource Manager role service

From the data factory:

Create a pipeline
Create an import/export job
Provision an Azure-SQL Server Integration Services (SSIS) integration runtime

Explanation

Graphical user interface, text, application, email Description automatically generated

From Server1:

Install an Azure File Sync agent
Install a self-hosted integration runtime
Install the File Server Resource Manager role service

From the data factory:

Create a pipeline
Create an import/export job
Provision an Azure-SQL Server Integration Services (SSIS) integration runtime

Box 1: Install a self-hosted integration runtime

The Integration Runtime is a customer-managed data integration infrastructure used by Azure Data Factory to provide data integration capabilities across different network environments.

Box 2: Create a pipeline

With ADF, existing data processing services can be composed into data pipelines that are highly available and managed in the cloud. These data pipelines can be scheduled to ingest, prepare, transform, analyze, and publish data, and ADF manages and orchestrates the complex data and processing dependencies.

NEW QUESTION # 13

You have an on-premises network that uses an IP address space of 172.16.0.0/16. You plan to deploy 25 virtual machines to a new Azure subscription. You identify the following technical requirements:

- * All Azure virtual machines must be placed on the same subnet named Subnet1.
- * All the Azure virtual machines must be able to communicate with all on-premises servers.
- * The servers must be able to communicate between the on-premises network and Azure by using a site-to-site VPN.

You need to recommend a subnet design that meets the technical requirements.

What should you include in the recommendation? To answer, drag the appropriate network addresses to the correct subnets. Each network address may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Network Addresses

172.16.0.0/16

172.16.1.0/27

192.168.0.0/24

192.168.1.0/27

Answer Area

Subnet1: Network address

Gateway subnet: Network address

Answer:

Explanation:

Network Addresses

172.16.0.0/16

172.16.1.0/27

192.168.0.0/24

192.168.1.0/27

Answer Area

Subnet1: 192.168.0.0/24

Gateway subnet: 192.168.1.0/27

Explanation:
ANSWER AREA

NEW QUESTION # 14

You need to design a solution that will execute custom C# code in response to an event routed to Azure Event Grid. The solution must meet the following requirements:

* The executed code must be able to access the private IP address of a Microsoft SQL Server instance that runs on an Azure virtual machine.

Costs must be minimized.

What should you include in the solution?

- A. Azure Logic Apps in the Consumption plan
- **B. Azure Functions in the Consumption plan**
- C. Azure Logic Apps in the integrated service environment
- D. Azure Functions in the Dedicated plan and the Basic Azure App Service plan

Answer: B

Explanation:

Explanation

When you create a function app in Azure, you must choose a hosting plan for your app. There are three basic hosting plans available for Azure Functions: Consumption plan, Premium plan, and Dedicated (App Service) plan.

For the Consumption plan, you don't have to pay for idle VMs or reserve capacity in advance.

Connect to private endpoints with Azure Functions

As enterprises continue to adopt serverless (and Platform-as-a-Service, or PaaS) solutions, they often need a way to integrate with existing resources on a virtual network. These existing resources could be databases, file storage, message queues or event streams, or REST APIs.

Reference:

<https://docs.microsoft.com/en-us/azure/azure-functions/functions-scale>

<https://techcommunity.microsoft.com/t5/azure-functions/connect-to-private-endpoints-with-azure-functions/ba-p>

NEW QUESTION # 15

You manage a database environment for a Microsoft Volume Licensing customer named Contoso, Ltd.

Contoso uses License Mobility through Software Assurance.

You need to deploy 50 databases. The solution must meet the following requirements:

Support automatic scaling.

Minimize Microsoft SQL Server licensing costs.

What should you include in the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Purchase model:

DTU
vCore
Azure reserved virtual machine instances

Deployment option:

An Azure SQL managed instance
An Azure SQL Database elastic pool
A SQL Server Always On availability group

Answer:

Explanation:

Purchase model:

DTU
vCore
Azure reserved virtual machine instances

Deployment option:

An Azure SQL managed instance
An Azure SQL Database elastic pool
A SQL Server Always On availability group

Explanation

Text, table Description automatically generated

Purchase model:

DTU
vCore
Azure reserved virtual machine instances

Deployment option:

An Azure SQL managed instance
An Azure SQL Database elastic pool
A SQL Server Always On availability group

Box 1: vCore

Virtual core (vCore)-based purchasing model (recommended). This purchasing model provides a choice between a provisioned compute tier and a serverless compute tier. With the provisioned compute tier, you choose the exact amount of compute resources that are always provisioned for your workload. With the serverless compute tier, you specify the autoscaling of the compute resources over a configurable compute range

Box 2: An Azure SQL Database Elastic pool

Azure SQL Database provides the following deployment options for a database:

Single database represents a fully managed, isolated database.

Elastic pool is a collection of single databases with a shared set of resources, such as CPU or memory.

Single databases can be moved into and out of an elastic pool.

Reference:

<https://docs.microsoft.com/en-us/azure/azure-sql/database/purchasing-models>

NEW QUESTION # 16

You plan to use Azure Storage to store data assets.

You need to identify the procedure to fail over a general-put pose v2 account as part of a disaster recovery plan. The solution must meet the following requirements:

- * Apps must be able to access the storage account after a failover.
- * You must be able to fail back the storage account to the original location.
- * Downtime must be minimized.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

The screenshot shows a 'Actions' list on the left and an 'Answer Area' on the right. The 'Actions' list contains the following items:

- After a failover, configure zone-redundant storage (ZRS) replication for the storage account.
- Before a failover, configure geo-redundant storage (GRS) replication for the storage account.
- Before a failover, configure zone-redundant storage (ZRS) replication for the storage account.
- Initiate a failover.
- After a failover, configure geo-redundant storage (GRS) replication for the storage account.

On the right, the 'Answer Area' contains:

- Before a failover, configure zone-redundant storage (ZRS) replication for the storage account.
- Initiate a failover.
- After a failover, configure geo-redundant storage (GRS) replication for the storage account.

Each item in the 'Answer Area' has a circular arrow icon to its right, indicating it can be moved.

Answer:

Explanation:

The screenshot shows a 'Actions' list on the left and an 'Answer Area' on the right. The 'Actions' list contains the same five items as the previous screenshot. The 'Answer Area' contains:

- Before a failover, configure zone-redundant storage (ZRS) replication for the storage account.
- Initiate a failover.
- After a failover, configure geo-redundant storage (GRS) replication for the storage account.

Each item in the 'Answer Area' has a circular arrow icon to its right. The first two items are enclosed in a dashed red box, and the third item is enclosed in a dashed green box.

Explanation:

The screenshot shows a 'Actions' list on the left and an 'Answer Area' on the right. The 'Actions' list contains the same five items. The 'Answer Area' contains:

- 1 Before a failover, configure zone-redundant storage (ZRS) replication for the storage account.
- 2 Initiate a failover.
- 3 After a failover, configure geo-redundant storage (GRS) replication for the storage account.

Each item in the 'Answer Area' has a circular arrow icon to its right. The first two items are enclosed in a dashed red box, and the third item is enclosed in a dashed green box.

NEW QUESTION # 17

If you are overwhelmed with the job at hand, and struggle to figure out how to prioritize your efforts, these would be the basic problem of low efficiency and production. You will never doubt anymore with our AZ-305 test prep. With our AZ-305 exam questions, you will not only get the AZ-305 Certification quickly, but also you can get the best and helpful knowledge. And that when you make a payment for our AZ-305 quiz torrent, you will possess this product in 5-10 minutes and enjoy the pleasure and satisfaction of your study time.
