We offer you free update for 365 days after purchasing, and the update version will be sent to your email address automatically.

Salesforce Order Management Administrator Accredited Professional Sample Questions (Q38-Q43):

NEW QUESTION # 38

What does a summary object represent?

- A. A change to an underlying record.
- B. A dynamic view of underlying data
- C. An individual change to financial data
- D. A discount to underlying data

Answer: B

Explanation:

A summary object represents a dynamic view of underlying data. A summary object is a type of object that aggregates data from related records and displays it in a single record. For example, an Order Summary object represents the financial summary of an order that is received from an external system, such as B2C Commerce or B2B Commerce. An Order Summary object aggregates data from related Order Item Summary records and displays it in fields such as total amount, tax amount, discount amount, etc. Verified Reference: https://help.salesforce.com/s/articleView?id=sf.order_management_order_summary.htm&type=5

NEW QUESTION # 39

An administrator has created a new currency field on the Fulfillment Order object and wants to roll up the total to the Order Summary object. When creating a rollup field on the Order Summary object, Fulfillment Order does not appear as an option. Why is this?

- A. Rollup Fields cannot sum Currency Fields

- B. The Rollup Summary field must be created on the Fulfillment Order object with the Order Summary object as the parent
- C. The Order Summary object has reached the limit of Rollup Summary fields
- D. The Order Summary field on the Fulfillment Order object is a Lookup

Answer: D

Explanation:

The reason why Fulfillment Order does not appear as an option when creating a rollup field on the Order Summary object is that the Order Summary field on the Fulfillment Order object is a Lookup. A Lookup field is a type of custom field that creates a relationship between two objects, but does not support rollup summary fields. To create a rollup summary field, the relationship between the objects must be master-detail, which means that the child record cannot exist without its parent record. Verified Reference: https://help.salesforce.com/s/articleView?id=sf.custom_field_types.htm&type=5https://help.salesforce.com/s/articleView?id=sf.fields_about_roll_up_summary_fields.htm&type=5

NEW QUESTION # 40

Which two practices are needed for a custom attribute to map into Order Management assuming the attribute has been created on the necessary objects?

- A. The types must match within reason
- B. The types must be an exact match (i.e. String to String)
- C. The names must only contain letters and underscores
- D. The names must be an exact match

Answer: A,D

Explanation:

Two practices that are needed for a custom attribute to map into Order Management assuming the attribute has been created on the necessary objects are: The types must match within reason. The data type of the custom attribute in Order Management must match or be compatible with the data type of the corresponding attribute in the external system, such as B2C Commerce or B2B Commerce. For example, if the attribute is a string in B2C Commerce, it must also be a string in Order Management.

The names must be an exact match. The name of the custom attribute in Order Management must be exactly the same as the name of the corresponding attribute in the external system, including capitalization and punctuation. For example, if the attribute is named "kitItem" in B2C Commerce, it must also be named "kitItem" in Order Management.

NEW QUESTION # 41

Which set of conditions is required for an Order Summary object to be created?

- A. An Order is created, its status is set to Activated. Create OrderSummary Flow is installed and Create OrderSummary Flow is activated.
- B. An Order is created, the Create Order Summary Process is installed and the Create Order Summary Process is active
- C. An Order is created, its status is set to Draft, Create OrderSummaryFlow is installed and Create OrderSummary Flow is activated.
- D. An Order is created, its status is set to Activated. Create OrderSummary Flow is installed and the Create OrderSummary Process is installed.

Answer: B

Explanation:

The Order Summary object is a custom object that stores information about an order, such as the total amount, the number of items, and the fulfillment status. The Order Summary object is created by a process called Create Order Summary Process, which runs whenever an order is created or updated. The process calls a flow called Create OrderSummary Flow, which calculates the order summary fields and creates or updates the order summary record. The process and the flow are part of the Order Management package and must be installed and activated for the order summary object to be created. NEW QUESTION # 42

How can an administrator synchronize licenses from the production org when preparing a sandbox for development?

- A. Run the Match Production Licenses to Sandbox without a Refresh tool in Setup
- B. Import a Change Set
- C. Use a custom shell script
- D. Export a Change Set

Answer: A

Explanation:

The best way for an administrator to synchronize licenses from the production org when preparing a sandbox for development is to run the Match Production Licenses to Sandbox without a Refresh tool in Setup. This tool allows administrators to match their sandbox licenses with their production licenses without refreshing their sandbox. This way, the administrator can ensure that the sandbox has the same number and type of licenses as the production org, and avoid any license-related issues when developing or testing in the sandbox.
