As long as you pay for the dumps you want to get, you will get it immediately. PDFVCE has the CCFH-202b exam materials that you most want to get and that best fit you. After you buy the dumps, you can get a year free updates. As

long as you want to update the CCFH-202b Dumps you have, you can get the latest updates within a year. PDFVCE does its best to provide you with the maximum convenience.

CrowdStrike Certified Falcon Hunter Sample Questions (Q59-Q64):

NEW QUESTION # 59

Lateral movement through a victim environment is an example of which stage of the Cyber Kill Chain?

- A. Command & Control
- B. Actions on Objectives
- C. Delivery
- D. Exploitation

Answer: A

Explanation:

Lateral movement through a victim environment is an example of the Command & Control stage of the Cyber Kill Chain. The Cyber Kill Chain is a model that describes the phases of a cyber attack, from reconnaissance to actions on objectives. The Command & Control stage is where the adversary establishes and maintains communication with the compromised systems and moves laterally to expand their access and control.

NEW QUESTION # 60

You need details about key data fields and sensor events which you may expect to find from Hosts running the Falcon sensor. Which documentation should you access?

- A. Streaming API Event Dictionary
- B. Events Data Dictionary
- C. Event stream APIs
- D. Hunting and Investigation

Answer: B

Explanation:

The Events Data Dictionary found in the Falcon documentation is useful for writing hunting queries because it provides a reference of information about the events found in the Investigate > Event Search page of the Falcon Console. The Events Data Dictionary describes each event type, field name, data type, description, and example value that can be used to query and analyze event data. The Streaming API Event Dictionary, Hunting and Investigation, and Event stream APIs are not documentation that provide details about key data fields and sensor events.

NEW QUESTION # 61

Which of the following is a suspicious process behavior?

- A. PowerShell launching a PowerShell script
- B. Non-network processes (eg. notepad.exe) making an outbound network connection
- C. An Internet browser (eg. Internet Explorer) performing multiple DNS requests
- D. PowerShell running an execution policy of RemoteSigned

Answer: B

Explanation:

Non-network processes are processes that are not expected to communicate over the network, such as notepad.exe. If they make an outbound network connection, it could indicate that they are compromised or maliciously used by an adversary. PowerShell running an execution policy of RemoteSigned is a default setting that allows local scripts to run without digital signatures. An Internet browser performing multiple DNS requests is a normal behavior for web browsing. PowerShell launching a PowerShell script is also a common behavior for legitimate tasks.

NEW QUESTION # 62

What Search page would help a threat hunter differentiate testing, DevOPs, or general user activity from adversary behavior?

- A. User Search
- B. IP Search
- C. Domain Search
- D. Hash Search

Answer: A

Explanation:

User Search is a search page that allows a threat hunter to search for user activity across endpoints and correlate it with other events. This can help differentiate testing, DevOPs, or general user activity from adversary behavior by identifying anomalous or suspicious user actions, such as logging into multiple systems, running unusual commands, or accessing sensitive files.

NEW QUESTION # 63

To view Files Written to Removable Media within a specified timeframe on a host within the Host Search page, expand and refer to the _____ dashboard panel.

- A. Suspicious File Activity
- B. Command Line and Admin Tools
- C. Processes and Services
- D. Registry, Tasks, and Firewall

Answer: A

Explanation:

To view Files Written to Removable Media within a specified timeframe on a host within the Host Search page, you need to expand and refer to the Suspicious File Activity dashboard panel. The Suspicious File Activity dashboard panel shows information such as files written to removable media, files written to system directories by non-system processes, files written to startup folders, etc. The other dashboard panels do not show files written to removable media.

NEW QUESTION # 64

.....

The whole world of CCFH-202b preparation materials has changed so fast in the recent years because of the development of internet technology. We have benefited a lot from those changes. In order to keep pace with the development of the society, we also need to widen our knowledge. If you are a diligent person, we strongly advise you to try our CCFH-202b real test. You will be attracted greatly by our CCFH-202b practice engine..
