GH-100 Reliable Exam Preparation - GH-100 Test Simulator Online

As mentioned earlier, ITexamReview solves all problems that you face while locating updated GitHub Administration (GH-100) exam questions. We know that as an applicant for the test, you have excessive pressure to pass the Microsoft Certification Exam. ITexamReview is here to help you earn the highly sought-after GitHub Administration (GH-100) certification on the first attempt. Don't wait to get help from our Microsoft GH-100 real exam dumps to crack the test quickly. You can better comprehend ITexamReview's GitHub Administration (GH-100) exam questions if you know about the three formats described here.

Microsoft GitHub Administration Sample Questions (Q27-Q32):

NEW QUESTION # 27

When comparing a partner identity provider integration with a non-partner identity management solution for GitHub Enterprise Managed Users, which statement is Correct?

- A. The partner identity provider integrations rely on the partner to support the application on the partner IdP.
- B. The partner identity provider integrations support fewer GitHub-supported authentication methods.
- **C. The non-partner identity provider integrations require manual configuration of SAML 2.0 details.**
- D. The non-partner identity provider integrations can utilize OIDC for authentication.

Answer: C

Explanation:

Non-partner identity provider integrations require you to enter SAML2.0 configuration details by hand - such as the Sign-on URL, Issuer, and X.509 certificate - whereas partner IdPs supply a pre-configured application integration.

NEW QUESTION # 28

What is the potential consequence of enabling multiple rulesets that apply to the same branch in a repository?

- **A. All applicable rulesets will be evaluated, and their combined rules enforced**
- B. Only organization-level rulesets are enforced over repository-level ones
- C. Only the most recently created ruleset will be enforced
- D. Rulesets will override each other, leading to unpredictable behavior

Answer: A

Explanation:

If you enable multiple rulesets that target the same branch, GitHub will evaluate every matching ruleset and enforce the aggregate of their rules - so all constraints from all applicable rulesets apply.

NEW QUESTION # 29

Which of the following is the responsibility of a Team Maintainer in a GitHub organization? (Choose two.)

- **A. Managing nested sub-teams.**
- B. Deleting repositories assigned to the team.
- **C. Adding or removing team members.**
- D. Modifying organization-wide settings.

Answer: A,C

Explanation:

Team maintainers can manage nested sub-teams - requesting to add or change parent/child teams within the organization's hierarchy. Team maintainers have permission to add and remove members from their team, controlling day-to-day team membership.

NEW QUESTION # 30

Why would someone choose to configure a security policy?

- A. To communicate corporate security and compliance policies for end users on a private repository.
- B. To define which open source packages are permitted for use as part of that repository.
- C. To prevent anyone from pushing to the repository without approval.
- **D. To provide information on an open source repository for open source collaborators and researchers that may need to report and disclose sensitive security findings to maintainers securely.**

Answer: D

Explanation:

A security policy (the SECURITY.md file) lets maintainers of an open source repository provide clear, private instructions for collaborators and external researchers on how to report and disclose security vulnerabilities responsibly.

NEW QUESTION # 31

When comparing fine-grained Personal Access Tokens (PATs) with classic PATs, which of the following statements is accurate?

- A. Classic PATs can be restricted to specific organizations, but fine-grained PATs cannot.
- **B. Fine-grained PATs permissions can be scoped to specific repositories.**
- C. Classic PATs offer more permission controls than fine-grained PATs.
- D. Fine-grained PATs automatically renew while classic PATs require manual renewal.

Answer: B

Explanation:

Fine-grained personal access tokens let you scope permissions down to individual repositories, whereas classic PATs grant access across every repo the user can reach.

NEW QUESTION # 32

.....

The desktop-based practice exam is customizable, tracks your progress, and creates a real GitHub Administration (GH-100) exam environment. This software works offline on Windows computers. The web-based practice exam is similar to the desktop-based practice exam and can be taken on any browser without needing to install separate software. Moreover, the web-based GitHub Administration (GH-100) practice exam is also compatible with all operating systems.
