# 800-150 Latest Exam Pass4sure | 800-150 New Guide Files

P.S. Free & New 800-150 dumps are available on Google Drive shared by DumpsValid: https://drive.google.com/open?id=1baFcJuaVm772HyVs3OfHv_pOKKH_nmDx

Time and tide wait for no man, if you want to save time, please try to use our 800-150 preparation exam, it will cherish every minute of you and it will help you to create your life value. With the high pass rate of our 800-150 exam questions as 98% to 100% which is unbeatable in the market, we are proud to say that we have helped tens of thousands of our customers achieve their dreams and got their 800-150 certifications. Join us and you will be one of them.

For years our team has built a top-ranking brand with mighty and main which bears a high reputation both at home and abroad. The sales volume of the 800-150 Test Practice guide we sell has far exceeded the same industry and favorable rate about our products is approximate to 100%. Why the clients speak highly of our 800-150 exam dump? Our dedicated service, high quality and passing rate and diversified functions contribute greatly to the high prestige of our products. We provide free trial service before the purchase, the consultation service online after the sale, free update service and the refund service in case the clients fail in the test.

Free PDF Quiz 2026 Professional Cisco 800-150 Latest Exam Pass4sure

There are many other advantages. To gain a full understanding of our product please firstly look at the introduction of the features and the functions of our 800-150 exam torrent. The page of our product provide the demo and the aim to provide the demo is to let the you understand part of our titles before their purchase and see what form the software is after the you open it. The client can visit the page of our product on the website. So the client can understand our 800-150 Quiz torrent well and decide whether to buy our product or not at their wishes. The client can see the forms of the answers and the titles.

Cisco 800-150 Exam Syllabus Topics:

Topic	Details

Topic 1	• Cisco Hardware Replacement: This section of the exam measures the skills of a Technical Support Engineer and teaches how to safely and correctly replace Cisco hardware. It explains safety procedures such as creating safe work zones and handling electrostatic discharge. Students learn the step-by-step processes to replace a wide range of Cisco devices, from switches and routers to firewalls, UCS servers, and collaboration endpoints. It also covers configuring Cisco NX-OS software, including understanding operating modes, boot procedures, and password recovery, and introduces Cisco collaboration endpoint solutions like IP phones and video systems.
Topic 2	• Cisco UCS and Data Center Architecture: This section of the exam measures the skills of a Data Center Engineer and introduces Cisco's UCS and data center solutions. It explains the devices found in a data center, including switches, UCS servers, and director switches, and describes different server deployment models. Students will also learn about virtualization components like virtual machines, hypervisors, cloud computing concepts, and deployment models. The section covers how Cisco UCS devices fit into campus networks, edge locations, and data centers, and explains the key components and connections used in UCS architecture.
Topic 3	• Cisco Software: This section of the exam measures the skills of a Network Engineer and discusses Cisco's software systems and licensing. It explains the difference between IOS install and bundle modes and gives an overview of different licensing models. Students learn how to manage Cisco software images, including backing up, transferring, and installing images via FTP, TFTP, or USB. It also covers how to handle configuration files to keep devices running properly and ensure smooth upgrades or replacements.

Cisco Supporting Cisco Devices for Field Technicians Sample Questions (Q32-Q37):

NEW QUESTION # 32
What is the primary purpose of backing up the endpoint configuration prior to replacing the device?

- A. To update the firmware of the device
- B. To troubleshoot network connectivity issues
- C. Torestore settings on the new device after replacement
- D. To generate a performance report for the old device

Answer: C

Explanation:
Backing up the configuration of a network device before replacement is a critical step to ensure business continuity and minimize downtime. The primary purpose of this backup is torestore the existing settings onto the new device, ensuring that it operates identically to the one being replaced.
This process includes preserving interface configurations, routing protocols, access control lists, and other essential parameters. By restoring the backed-up configuration to the new device, network administrators can quickly reintegrate it into the network infrastructure without the need for manual reconfiguration, thereby reducing the risk of errors and service disruptions.
Options A, B, and C do not align with the primary objective of configuration backups in the context of device replacement.

NEW QUESTION # 33
Which component serves as the central management and communication core and provides a single point of management via Cisco UCS Manager in a Cisco UCS environment?

- A. UCS Fabric Interconnect
- B. Nexus 9000 Series Switch
- C. MDS 9000 Series SAN Switch
- D. UCS E-Series server in ISR platforms

Answer: A

Explanation:

TheUCS Fabric Interconnectis the central management and communication hub of theCisco UCS (Unified Computing System)environment. It integrates compute, network, and storage access into a unified system.
Fabric Interconnects:
* Manage all servers and I/O modules connected to the UCS domain
* Provide connectivity and are the point of integration with the Cisco UCSManager
* Offer high-availability and centralized policy management
Other options like the Nexus or MDS switches do not serve this unified management function in a UCS deployment.
Reference:Supporting Cisco Devices for Field Technicians (FLDTEC) -Cisco Equipment and Related Hardware Explanation:
The UCS Fabric interconnect serves as the central management and communication core in a Cisco UCS environment, providing a single point of management via Cisco UCS Manager for the entire UCS system, including servers, networking, and storage components.
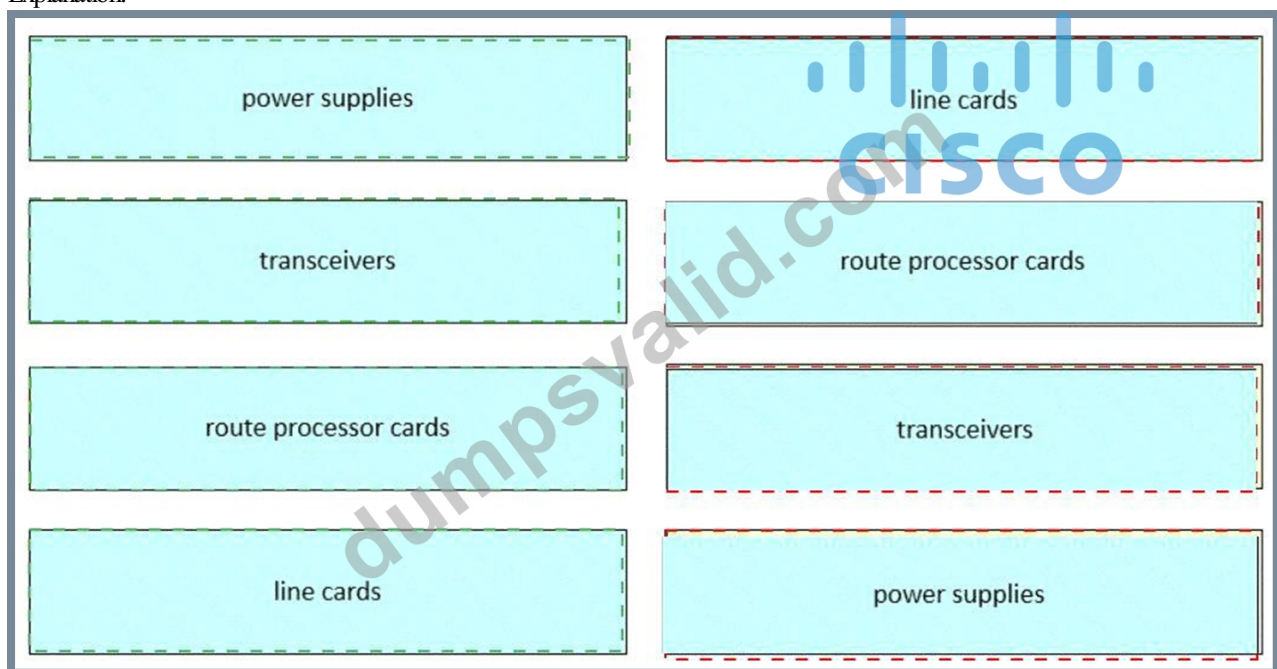

NEW QUESTION # 34

Refer to the exhibit. Drag and drop the names of the field-replaceable units from the left onto the corresponding letters on the image of the Cisco NCS 5500 Series modular router.

power supplies	A
transceivers	B
route processor cards	C
line cards	D

Answer:

Explanation:

| power supplies | line cards |
transceivers	route processor cards
route processor cards	transceivers
line cards	power supplies

Explanation:

A # Line cards
Provide the physical interfaces for network connectivity.
B # Route processor cards
Manage routing functions and system control.
C # Transceivers
Installed in the ports of line cards for optical/electrical signal transmission.
D # Power supplies
Provide power to the modular system and are hot-swappable.
Cisco's NCS 5500 Series is designed for service provider and data center deployments. The FLDTEC course outlines the layout of FRUs in modular platforms like this one:
A - Line Cards: Located in the upper slots, these modules handle the bulk of switching and forwarding functions.
B - Route Processor Cards (RP Cards): Positioned centrally, these provide management and control plane services for the router.
C - Transceivers: Installed into the line cards, transceivers provide physical connectivity through optical or copper interfaces.
D - Power Supplies: Located in the bottom rear section, these modules provide redundant and hot-swappable power to the chassis.
Recognizing each FRU visually and functionally is critical when performing RMA procedures, component diagnostics, or hardware upgrades in the field.

NEW QUESTION # 35
Which step must be taken to minimize data traffic impact when replacing a fabric interconnect?

- A. Power down both fabric interconnects simultaneously.
- B. Remove all cable connections at once.
- C. Use the fabric evacuation procedure on the subordinate fabric interconnect.
- D. Disable high availability before replacement.

Answer: C

Explanation:
When replacing a fabric interconnect in a Cisco Unified Computing System (UCS), the recommended procedure to minimize traffic disruption is to use the fabric evacuation procedure on the subordinate fabric interconnect. This ensures that traffic is redirected to the other (active) fabric interconnect, allowing the system to maintain connectivity while one interconnect is replaced.
* High availability should remain enabled to preserve redundancy.
* Powering down both interconnects would cause a complete outage.
* Disconnecting cables without graceful evacuation can result in traffic loss.

NEW QUESTION # 36

Cisco Room Navigator

Cisco Board Pro

Cisco Quad Camera

Cisco PTZ 4K Camera

Refer to the exhibit. Drag and drop the functions from the left onto the corresponding devices on the right.

provides 4K resolution and zoom capabilities	Cisco Room Navigator
supports video conferencing and content sharing	Cisco PTZ 4K Camera
creates panoramic views of meeting participants	Cisco Quad Camera
controls room environment and scheduling	Cisco Webex Board Pro

Answer:

Explanation:

|	
provides 4K resolution and zoom capabilities	controls room environment and scheduling
supports video conferencing and content sharing	provides 4K resolution and zoom capabilities
creates panoramic views of meeting participants	creates panoramic views of meeting participants
controls room environment and scheduling	supports video conferencing and content sharing

Explanation:

provides 4K resolution and zoom capabilities	controls room environment and scheduling
supports video conferencing and content sharing	provides 4K resolution and zoom capabilities
creates panoramic views of meeting participants	creates panoramic views of meeting participants
controls room environment and scheduling	supports video conferencing and content sharing

According to theCisco FLDTEC training and product documentation:

* Cisco PTZ 4K Camera: Offers high-definition video capture with pan-tilt-zoom features and 4K resolution - ideal for large conference spaces.
* Cisco Webex Board Pro: Interactive collaboration device that combines video conferencing, whiteboarding, and wireless content sharing.
* Cisco Quad Camera: Features multiple cameras for wide-angle views, speaker tracking, and automatic framing - great for medium to large meeting rooms.
* Cisco Room Navigator: A touchscreen device that provides intuitive control for room settings, scheduling, and call management.

NEW QUESTION # 37

Our 800-150 learning guide allows you to study anytime, anywhere. If you are concerned that your study time cannot be guaranteed, then our 800-150 learning guide is your best choice because it allows you to learn from time to time and make full use of all the time available for learning. Our online version of 800-150 learning guide does not restrict the use of the device. You can use the computer or you can use the mobile phone. You can choose the device you feel convenient at any time.
