C1000-200 Reliable Braindumps Questions & Valid Dumps C1000-200 Ppt

Our C1000-200 guide torrent specially proposed different versions to allow you to learn not only on paper, but also to use mobile phones to learn. This greatly improves the students' availability of fragmented time. You can choose the version of C1000-200 learning materials according to your interests and habits. And if you buy the value pack, you have all of the three versions, the price is quite preferential and you can enjoy all of the study experiences. This means you can study C1000-200 Exam Engine anytime and anyplace for the convenience to help you pass the C1000-200 exam.

IBM MQ v9.4 Administrator - Professional Sample Questions (Q19-Q24):

NEW QUESTION # 19

When configuring IBM MQ for high availability, which approach allows two queue managers to work in active-passive mode so that if one fails, the other takes over with minimal downtime and message loss?

- A. Application-level retry mechanisms
- B. Single queue manager with multiple channels
- C. Clustered queue managers with load balancing
- **D. Multi-instance queue managers with shared storage**

Answer: D

Explanation:

Multi-instance queue managers use shared storage and failover configuration to achieve high availability with minimal downtime.

NEW QUESTION # 20

IBM MQ provides several methods to monitor and manage queues for optimal performance. Which combination of monitoring techniques is most effective for identifying bottlenecks, predicting message backlogs, and ensuring that high-priority messages are delivered without delay in a large-scale deployment?

- A. Using MQSC commands for manual queue checks and occasional log review
- B. Only monitoring CPU and memory usage on the queue manager server
- C. Implementing MQ Explorer for real-time monitoring, combining it with automated alerts, and prioritizing messages based on message class and depth
- D. Configuring application-side logging without using MQ-specific monitoring tools

Answer: C

Explanation:

MQ Explorer with automated alerts and prioritization provides proactive monitoring to detect bottlenecks, manage backlogs, and ensure high-priority message delivery efficiently.

NEW QUESTION # 21

A multinational bank needs to replicate messages between queue managers in different regions for disaster recovery, ensuring that if one site fails, another site has an identical set of messages for continuity. Which IBM MQ capability provides this synchronous or asynchronous message replication between queue managers?

- A. IBM MQ Replicated Data Queue Manager (RDQM)
- B. Dead-letter queues
- C. XA transaction rollback
- D. Publish/subscribe distribution

Answer: A

Explanation:

RDQM provides message replication for high availability and disaster recovery, ensuring that another site has a synchronized set of queues and messages.

NEW QUESTION # 22

In IBM MQ, when messages must be sent across different geographic regions with strict delivery guarantees, what feature ensures that messages are not only delivered once but also survive network outages and are recoverable even if queue managers restart unexpectedly?

- A. Persistent messaging combined with recovery logging
- B. Use of non-persistent queues with faster throughput
- C. Exclusive locks on remote queues during transfer
- D. Temporary dynamic queues with automatic cleanup

Answer: A

Explanation:

Persistent messaging with recovery logging ensures that critical data is not lost during outages or restarts, providing once-only delivery guarantees across regions.

NEW QUESTION # 23

In IBM MQ, when integrating multiple enterprise applications across different platforms, which configuration ensures that messages can be securely transmitted, automatically retried in case of temporary network failures, and logged for audit purposes without manual intervention by administrators?

- A. Using point-to-point queues without encryption but enabling application-level retries
- B. Configuring persistent messages with defined channels, SSL/TLS encryption, and built-in MQ logging mechanisms
- C. Implementing transient queues with in-memory storage and no logging
- D. Using non-persistent messages with default channels and manual retry scripts

Answer: B

Explanation:

Persistent messages with SSL/TLS-secured channels and MQ logging ensure reliability, security, and traceability, making it ideal for multi-platform enterprise integrations.

NEW QUESTION # 24

.....

Computer brings more convenience, online access to information, published an article, watch movies, online remote virtual learning and other benefits. IT workers are becoming high-salary field in all over the world. TestkingPass releases latest and valid C1000-200 Exam preparations to help candidates clear exams certainly as IBM certifications are outstanding and attractive. If you determine to take part in exams, our C1000-200 exam preparations will be a good helper.
