New 1Z0-1114-25 Dumps Ppt & 1Z0-1114-25 Authentic Exam Hub

The former customers who bought Oracle 1Z0-1114-25 training materials in our company all are impressed by the help as well as our after-sales services. That is true. We offer the most considerate after-sales services on our Oracle 1Z0-1114-25 Exam Questions for you 24/7 with the help of patient staff and employees. They are all professional and enthusiastic to offer help.

Oracle Redwood Application 2025 Developer Associate Sample Questions

(Q22-Q27):

NEW QUESTION # 22
You are designing the UI to display information about a product and are asked to use the card layout, such that:
* The card layout summarizes the available information about a product in a visually compact manner.
* The card layout is used as an entry point from where users can access additional details.
Which card layout is suitable for the above requirements?

- A. Object Card
- B. Image Card
- C. Scoreboard
- D. Mini Card

Answer: A

Explanation:
Full Detailed in Depth Explanatio n:
Redwood offers various card layouts, each with specific use cases. The Object Card (Option A) is designed to summarize key information about an entity (e.g., a product) in a compact, visually appealing way while serving as an entry point to detailed views-perfectly matching the requirements. Mini Card (B) is too minimal for summarization, focusing on quick glances. Image Card (C) prioritizes visuals over data summary, and Scoreboard (D) is for metrics/KPIs, not product details.

NEW QUESTION # 23
Which is the correct sequence of steps in the Design process?

- A. Understand the problem, articulate the vision, identify the Redwood Page templates to use, add the detail and refine the design, specify the design for development, and monitor engagement in the real world
- B. Articulate the vision, understand the problem, identify the Redwood Page templates to use, add the detail and refine the design, specify the design for development, and monitor engagement in the real world
- C. Articulate the vision, identify the Redwood Page templates, understand the problem, add the detail and refine the design, specify the design for development, and monitor engagement in the real world
- D. Understand the statement, articulate the problem, identify the Redwood Page templates to use, add the detail and refine the design, specify the design for development, and monitor engagement in the real world

Answer: A

Explanation:
Full Detailed in Depth Explanatio n:
The Redwood design process, as outlined in Oracle's Redwood documentation, follows a structured approach to ensure a user-centered and iterative design. The correct sequence starts with "Understand the problem" (to define the challenge), followed by "Articulate the vision" (to set goals), "Identify the Redwood Page templates to use" (to select appropriate patterns), "Add the detail and refine the design" (to iterate), "Specify the design for development" (to hand off to developers), and "Monitor engagement in the real world" (to evaluate post-launch). Option D reflects this logical flow. Option A reverses the initial steps, Option B uses incorrect terminology ("Understand the statement"), and Option C misorders understanding the problem after template selection, which disrupts the process.

NEW QUESTION # 24
What roles does the visual development environment play in Visual Builder Studio for Fusion Apps?

- A. It offers a user-friendly interface for designing and developing applications
- B. It automatically generates applications without user involvement
- C. It restricts the types of applications that can be created
- D. It's only used for testing applications

Answer: A

Explanation:
Full Detailed in Depth Explanatio n:
VBS's visual environment provides a drag-and-drop interface for designing Fusion Apps extensions (A). It doesn't auto-generate

apps (B), isn't just for testing (C), and doesn't restrict app types (D).

NEW QUESTION # 25

What is the correct way to access data from Fusion Apps in your AppUI extension?

- **A. Use a service from the service catalog**
- B. Establish a JDBC connection to the Oracle Fusion Apps database
- C. Define a new service endpoint providing the direct service URL

Answer: A

Explanation:
Full Detailed in Depth Explanatio n:
AppUI extensions use predefined services from the Fusion Apps service catalog (A) for secure data access. Direct URLs (B) and JDBC (C) bypass Oracle's standards.

NEW QUESTION # 26

What is the function of the Publish button in the Visual Builder Studio workspace editor?

- A. To deploy the sandbox that your AppUI extension is associated with
- **B. To push changes to Git, and also start a merge request**
- C. To deploy a test version of your AppUI extension
- D. To start the CI/CD package and deploy pipeline for the current extension

Answer: B

Explanation:
Full Detailed in Depth Explanatio n:
The Publish button in VBS commits changes to the Git repository and initiates a merge request, enabling collaboration and version control. It doesn't deploy (A or C) or start a CI/CD pipeline (D)-those are separate steps in the Environment or Pipeline tabs.

NEW QUESTION # 27
