

Veeam Certified Engineer v12 cexamkiller Praxis Dumps & VMCE_v12 Test Training Überprüfungen

Übrigens, Sie können die vollständige Version der DeutschPrüfung VMCE_v12 Prüfungsfragen aus dem Cloud-Speicher herunterladen: https://drive.google.com/open?id=1w0BV_VfwczW0rsVDW3Oau5--OrPgjMhV

Mit der Veeam VMCE_v12 Zertifizierungsprüfung werden Sie sicher bessere Berufsaussichten haben. Die Veeam VMCE_v12 Zertifizierungsprüfung kann nicht nur Ihre Fertigkeiten, sondern auch Ihre Zertifikate und Fachkenntnisse beweisen. Die den Schulungsunterlagen zur Veeam VMCE_v12 Zertifizierungsprüfung von DeutschPrüfung sind eine von der Praxis bewährte Software. Mit ihr können Sie eine bessere Theorie bekommen. Vorm Kauf können Sie eine kostenlose Probeversion bekommen. So kennen Sie die Qualität unserer Prüfungsmaterialien. DeutschPrüfung ist Ihnen die beste Wahl.

Veeam VMCE_v12 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Backup data optimizations: This section covers the need for object storage to be backed up and the supported object storage solutions while utilizing repositories.
Thema 2	Enacting a recovery: This section is about getting practice in recovering various recoveries with diverse data.
Thema 3	Data protection strategies: This section of the exam covers an overview of data protection strategies.
Thema 4	Incident Response Planning: This section of the exam covers integrating Veeam Backup and Replication into the incident response strategy.
Thema 5	Veeam Backup Enterprise Manager: The section describes the use cases for Veeam Backup Enterprise Manager.
Thema 6	Unstructured data backup: This section is about highlighting vital features required to protect unstructured data.

Thema 7	Core components: This section of the exam covers exploring the functionality of Veeam Backup & Replication and system requirements.
Thema 8	Veeam Data Platform: This section deals with the identification and description of the goal of each major product in the Veeam Data Platform.
Thema 9	Agent backup: This section of the exam covers the identification of protection groups for automating the installation of Veeam Agents.
Thema 10	Virtual machine backup: This section of the exam covers protecting the VMware and Hyper V to safeguard VMware that follows SLAs.
Thema 11	Backup copies: This section ensures the process of recoverability and adheres to the 3-2-1 Rule with backup copy processes.
Thema 12	Transport modes: This section aims to analyze different methods to collect and read data from the production environment.

VMCE_v12 Praxisprüfung - VMCE_v12 Testing Engine

Die angemessene Bildung ist die Garantie des Erfolgs. Deshalb ist es sehr wichtig, diese Prüfung auszuwählen. Wir bieten Ihnen die neuesten und effektivsten Prüfungsfragen und Testantworten zur Veeam VMCE_v12 Zertifizierung. Und Wir DeutschPrüfung garantieren 100% Erfolg. Und der Preis ist auch günstig. Die Bezahlung bei Paypal kann Ihre Sicherheit garantieren. Wir DeutschPrüfung bieten die besten Lernhilfe für Veeam VMCE_v12 Prüfungen und auch aktualisieren immer die Prüfungsunterlagen.

Veeam Certified Engineer v12 VMCE_v12 Prüfungsfragen mit Lösungen (Q46-Q51):

46. Frage

Which two service offerings can a Veeam Cloud Service Provider provide to Veeam's customers?
(Choose two.)

- **A. Backup as a Service**
- B. Physical site security as a Service
- **C. Disaster Recovery as a Service**
- D. Application Development as a Service
- E. On premise tape

Antwort: A,C

Begründung:

Veeam Cloud Service Providers (VCSPs) are equipped to offer a range of services designed to extend Veeam's data protection capabilities to the cloud, enhancing the flexibility and reliability of backup and disaster recovery strategies for Veeam's customers.

The two service offerings that align with VCSP capabilities are:

A) Backup as a Service (BaaS) - This service allows Veeam customers to offload their on- premises backup operations to the cloud, leveraging cloud resources for storage and management of backups. BaaS simplifies backup processes, reduces the need for extensive on- premises infrastructure, and provides an added layer of data protection and accessibility.

E) Disaster Recovery as a Service (DRaaS) - DRaaS extends beyond basic backup services to offer a more comprehensive disaster recovery solution. It ensures not only the availability of backups but also the capability to rapidly restore and run critical workloads in the cloud in the event of a disaster, minimizing downtime and ensuring business continuity.

These services leverage the robust capabilities of Veeam Backup & Replication, tailored for cloud environments, to offer scalable, efficient, and secure data protection solutions.

47. Frage

For Veeam agent backup jobs, what feature is only available with Veeam Agent for Microsoft Windows?

- A. Volume backup
- **B. Backup from storage snapshots**
- C. File-level backup
- D. Application-aware processing of PostgreSQL

Antwort: B

48. Frage

A backup administrator is called in to review a new Veeam deployment created by a coworker. The backup administrator takes the following notes:

* 12 backup jobs

* 1 SOBR configured with AWS S3 Performance Tier

* 1 Repository configured on Hardened Immutable Repository

The administrator also notes that six jobs are configured to use the SOBR and six jobs are configured to use the Hardened Immutable Repository.

What should the backup administrator report to the other coworker regarding the 3-2-1 backup strategy?

- A. This needs the Hardened Immutable Repository added to the capacity tier.
- B. This meets the 3-2-1 best practices requirements.
- **C. This only has 1 copy of the backup data.**
- D. This will save costs with the Archive Tier in the SOBR.

Antwort: C

Begründung:

The 3-2-1 backup strategy is a best practice that suggests having three total copies of your data, two of which are local but on different devices or media, and one copy offsite. In the described scenario, although there is an offsite component (SOBR with AWS S3 Performance Tier), and a local hardened immutable repository, there is no indication of a second local copy on a different device or media. This means that there is only one local copy of the backup data and one offsite copy. Therefore, the setup does not meet the 3-2-1 best practices requirement, which would involve having at least one more local copy on different media or device.

49. Frage

A company has an RPO set at 4 hours and values data protection and disaster recovery. A disaster occurs on June 12, 2023 at 10:00 AM.

Which restore point gives the company the best RPO?

- **A. June 12, 2023, 9:30 AM**
- B. June 12, 2023, 5:00 AM
- C. June 12, 2023, 8:00 AM
- D. June 12, 2023, 1:00 PM

Antwort: A

Begründung:

Given the company has an RPO set at 4 hours, the restore point that gives the best RPO is the one closest to the time of the disaster without going over the disaster's timestamp. Since the disaster occurred on June 12, 2023, at 10:00 AM, the restore point at June 12, 2023, 9:30 AM would be the most recent one within the RPO threshold. This restore point minimizes data loss and provides the most current data before the disaster.
