Salesforce Certified B2C Commerce Architect Sample Questions (Q58-Q63):

NEW QUESTION # 58
A company manages its regional operations as separate businesses. The regional sites (Site A and Site B) operate with:
* Separate realms
* Deferent code bates
* Different category navigation menus
* Frequent updates on category structure
The requirement from the business is to provide hreflang link tags on category pages pointing to the same category on the other regional site. Example MTML for one of these links as displayed on Site A is:

```
<link rel="alternate" href="https://www.siteB.com/en_US/womens-new-arrivals"
hreflang="en_US" />
```

Which solution should the Architect choose while keeping performance in mind?

- A. Create a new custom object type Populate the hreflang mapping for each category and locale in this custom object. Use the custom object to display the hreflang link tag.
- B. Create a custom Business Manager module. Ask the business to maintain the hreflang link tags for each regional site in this Business Manager module.
- C. Create a new custom attribute on the Category. Populate the attribute with the other entire site URLs corresponding to locales In JSON Format. Use the attribute to display the hreflang link tag.
- D. Create additional locales in al realms create a new custom attribute on the category that is localized.
  Populate the attribute with the other site URLs and use it to display the hreflang tag.

Answer: C

NEW QUESTION # 59
A B2C Commerce Developer has just finished implementing a new promotion code form on checkout. During review, an Architect notes that the form it not using CSRF validation correctly.

```
<form action="${URLUtils.continueURL()}" method="GET">
        <!-- ... the form input elements ... -->
        <input type="hidden"
            name="${dw.web.CSRFProtection.getTokenName()}"
            value="${dw.web.CSRFProtection.generateToken()}"/>
        <input type="submit" value="Apply Promotion Code" />
</form>

formResult = cartForm.handleAction({
        'addPromoCode': function (formgroup) {
            var CSRFProtection = require('dw/web/CSRFProtection');

            var status;
            var result = {
                cart: cart,
                EnableCheckout: true,
                dontRedirect: true
            };
            status = cart.addCoupon(formgroup.couponCode.htmlValue);
            /* ... some error handling code, based on the returned status ... */
            return result;
        }
});
```
