## Real SAP C\_TS470\_2412 Dumps Free, Reliable C\_TS470\_2412 Exam Testking

As is known to us, a suitable learning plan is very important for all people. For the sake of more competitive, it is very necessary for you to make a learning plan. We believe that the Software version of our C\_TS470\_2412 actual exam will help you make a good learning plan which is a model test in limited time simulating the Real C\_TS470\_2412 Exam, if you finish the model C\_TS470\_2412 test, our system will generate a report according to your performance.

## SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service Sample Questions (Q21-Q26):

### NEW QUESTION # 21

What can you use to speed up the creation of new service contracts by reusing existing information?

- A. Service order templates
- B. Product bundles
- C. Service contract templates
- D. Service contract quotations

Answer: C

Explanation:

Creating service contracts in SAP S/4HANA Cloud Private Edition, Service can be time-consuming if done from scratch. To streamline this process, SAP provides tools to reuse existing data. The correct answer is service contract templates (Option D). A service contract template is a predefined structure that includes standard data such as items, pricing conditions, billing plans, and service objects. When creating a new service contract, you can select a template and adapt it to the specific customer or scenario, significantly reducing manual entry and ensuring consistency.

\* Service contract quotations (A): These are preliminary documents used to propose a contract to a customer, but they are not designed for reuse as templates for contract creation.

\* Service order templates (B): These are used to standardize service orders, not service contracts, and thus do not apply here.

\* Product bundles (C): These group products or services together but are not templates for creating contracts; they are more relevant to sales or service items.

"Service contract templates enable the rapid creation of new contracts by providing reusable structures with predefined data, such as items and conditions, which can be adjusted as needed."

## NEW QUESTION # 22

What can you display in the app Find Technical Object? Note: There are 3 correct answers to this question.

- A. Installation information of the technical objects
- B. Measurement documents and measuring points of the technical objects
- C. System and user statuses of the technical objects
- D. Planned and call dates for recurring service activities
- E. Service costs of the technical objects

**Answer: A,B,C**

Explanation:

The Find Technical Object app in SAP S/4HANA Cloud Private Edition, Service provides details about technical objects (e.g., equipment, functional locations). The correct answers are A, B, C. Let's explore.

App Functionality:

This Fiori app allows users to search and view technical object data.

\* Installation information (A): Shows where the object is installed (e.g., functional location hierarchy).

\* Measurement documents and measuring points (B): Displays recorded measurements (e.g., temperature) and their points.

\* System and user statuses (C): Lists statuses (e.g., "INST" for installed, user status "In Repair").

Why Not the Others?

\* D: Service costs are in financial apps (e.g., Service Actuals), not this app.

\* E: Planned/call dates are in maintenance plan apps, not here.

Example:

Search equipment "E001" # See installation (FL-001), measuring point (Temp), status (INST).

"The Find Technical Object app displays installation information, measurement documents and points, and system/user statuses."

## NEW QUESTION # 23

How are the inspection and maintenance operations determined, that must be performed regularly when you are using the scenario Service with Advanced Execution?

- A. Using a service order template
- B. Using a maintenance task list
- C. Always manually
- D. Using a bill of material

**Answer: B**

Explanation:

In Service with Advanced Execution, recurring inspection and maintenance operations are systematically planned. The correct answer is using a maintenance task list (A). Let's dive in.

Advanced Execution Scenario:

This scenario enhances service processes with detailed execution, often using maintenance orders mapped to service orders.

Why Maintenance Task List?

A maintenance task list (e.g., IA05) defines standard operations (e.g., "Inspect bearings," "Replace oil") for recurring activities. In a maintenance plan (e.g., strategy plan), the task list is assigned, and its operations are triggered based on scheduling (e.g., every 6

months). These operations are then executed via service /maintenance orders in the advanced execution framework, ensuring consistency and automation.  
Why Not the Others?

- \* Bill of material (B):BOMs list components, not operations.
- \* Service order template (C):Templates structure orders, not recurring operations.
- \* Manually (D):Advanced execution automates via task lists, not manual entry.

Example:

Task list "TL001" with operations "Check pressure" (6M) and "Replace filter" (12M) drives a strategy plan's calls.  
"In Service with Advanced Execution, regular inspection and maintenance operations are determined using a maintenance task list."

## NEW QUESTION # 24

What are the prerequisites when creating a configurable product? Note: There are 2 correct answers to this question.

- A. Defining configurable characteristics
- **B. Assigning a variant class to a product**
- C. Assigning a characteristic to a serial number
- **D. Creating a configuration profile**

**Answer: B,D**

Explanation:

A configurable product in SAP S/4HANA Cloud Private Edition, Service allows customization via variant configuration. The prerequisites are:

- \* Assigning a variant class to a product (A):A variant class defines the configurable characteristics (e.g., size, color) and is assigned to the product master.
  - \* Creating a configuration profile (D):The configuration profile links the product to its variant class and defines the configuration logic (e.g., dependencies).
  - \* B:Characteristics are defined separately and linked via the variant class, not directly as a prerequisite.
  - \* C:Characteristics are not assigned to serial numbers; serial numbers track instances, not configurations.
- "Creating a configurable product requires assigning a variant class to the product and creating a configuration profile to enable variant configuration."

## NEW QUESTION # 25

What can you assign in a task list header? Note: There are 2 correct answers to this question.

- A. Production resources and tools
- B. Components
- **C. Planner group**
- **D. Maintenance strategy**

**Answer: C,D**

Explanation:

A task list in SAP S/4HANA Cloud Private Edition, Service defines standard maintenance or service procedures. The header contains general data applicable to the entire task list. The correct answers are planner group (B) and maintenance strategy (C). Let's explore this in detail.

Task List Header Overview:

The header (e.g., in transaction IA05/IA06) includes fields like task list type, group, and planning data, setting the context for all operations.

\* Planner group (B):The planner group (e.g., "PLG1") is assigned in the header to indicate the team responsible for planning the task list's use (e.g., in maintenance plans). It's entered in the "Planner Group" field and links to organizational data (e.g., Plant Maintenance structure). For example, "PLG1" might be the North Region planners.

\* Maintenance strategy (C):The maintenance strategy (e.g., "STR1") is assigned in the header for strategy-based task lists. It defines the packages (e.g., 3M, 6M) that operations will follow when the task list is used in a strategy plan. This is set in the "Strategy" field and ties the task list to scheduling logic.

Why Not the Others?

- \* Production resources and tools (A):PRTs (e.g., tools) are assigned to individual operations, not the header, in the operation details tab.
- \* Components (D):Components (e.g., spare parts) are also assigned at the operation level, not the header, via the components tab.

Practical Example:

Task list "TL001": Header assigns Planner Group "PLG1" and Strategy "STR1" (3M, 6M). Operations then specify tasks and resources.

Additional Insight:

The header data ensures consistency across all operations and integrates with maintenance plans for scheduling.

"In a task list header, you can assign a planner group and maintenance strategy to define planning and scheduling parameters."

## NEW QUESTION # 26

.....

Being different from the other C\_TS470\_2412 Exam Questions in the market, our C\_TS470\_2412 practice materials have reasonable ruling price and satisfactory results of passing rate up to 98 to 100 percent. So our C\_TS470\_2412 guide prep is perfect paragon in this industry full of elucidating content for exam candidates of various degrees to use for reference. It contains not only the newest questions appeared in real exams in these years, but the most classic knowledge to master.

**Real C\_TS470\_2412 Dumps Free:** [https://www.itcertking.com/C\\_TS470\\_2412\\_exam.html](https://www.itcertking.com/C_TS470_2412_exam.html)

SAP C\_TS470\_2412 Reliable Exam Sample We have great relationship with most of largest companies, SAP C\_TS470\_2412 Reliable Exam Sample There are 24/7 customer assisting support you, It is acknowledged that SAP certificate exams are difficult to pass for workers in the industry, but you need not to worry about that at all because our company is determined to solve this problem, and after 10 years development, we have made great progress in compiling the C\_TS470\_2412 actual lab questions, With respect to your worries about the practice exam, we recommend our C\_TS470\_2412 preparation materials which have a strong bearing on the outcomes dramatically.

Integration with OnStar, Siri Eyes Free, and BringGo are already available in some C\_TS470\_2412 new GM vehicles, but that's just the beginning. These days, no matter what industry you're in, there never seems to be enough time to work at your own pace.

## SAP C\_TS470\_2412 Exam Questions in Convenient PDF Format

We have great relationship with most of largest companies, There are 24/7 C\_TS470\_2412 Reliable Dumps Pdf customer assisting support you, It is acknowledged that SAP certificate exams are difficult to pass for workers in the industry, but you need not to worry about that at all because our company is determined to solve this problem, and after 10 years development, we have made great progress in compiling the C\_TS470\_2412 actual lab questions.

With respect to your worries about the practice exam, we recommend our C\_TS470\_2412 preparation materials which have a strong bearing on the outcomes dramatically.
