Salesforce is a cloud-based software company that provides a range of customer relationship management (CRM) solutions. The Salesforce Certified Administrator certification is designed to test the knowledge and skills of individuals who work with Salesforce CRM. Salesforce Certified Administrator certification is offered by Salesforce and is recognized worldwide as a standard for measuring the competence of Salesforce administrators.

Salesforce Certified Administrator Sample Questions (Q30-Q35):

NEW QUESTION # 30
Universal Containers introduced a new product and wants to track all associated cases that get logged. They are looking for an automated solution that would give the product's two lead engineers read/write access to all new cases that reference the new product.
What should an administrator do to satisfy this requirement?

- A. Create a predefined case team and an assignment rule.
- B. Create a user-based sharing rule and an ad-hoc case team.
- C. Create an auto-response rule and a public group.
- D. Create a queue and a criteria-based sharing rule.

Answer: A

NEW QUESTION # 31
An administrator at Ursa Major Solar just learned about the AppExchange and how helpful it can be to the company's business.
Which two actions can be accomplished via the AppExchange?
'Choose 2 answers

- A. Download standard Lightning components.
- B. Download the Dataloader data tool.
- C. Install industry-specific solution templates.
- D. Find certified developers and consultants.

Answer: C,D

Explanation:
Explanation
The AppExchange is an online marketplace where customers can find apps, components, consultants, developers, and more to extend Salesforce functionality or solve specific business challenges. Some of the actions that can be accomplished via AppExchange are finding certified developers and consultants who can help with custom development or implementation projects; installing industry-specific solution templates that provide preconfigured apps, dashboards, reports etc., for various industries such as manufacturing or healthcare; downloading free tools or components that enhance productivity or user experience; browsing reviews or ratings from other customers who have used certain products or services; etc. References:

NEW QUESTION # 32
administrator at Northern Trail Outfitters is unable to add a new user in Salesforce.
What could cause this issue?

- A. The username is restricted to a domain specific to my domain.
- B. The email used for the username is not a corporate email address.
- C. The email address used for the username has a contact record.
- D. The username is already in use another organization.

Answer: D

NEW QUESTION # 33
Northern Trail Outfitters (NTO) has deployed my domain. The Chief Marketing Officer wants to make sure that all of the Salesforce users log in using the branded login URL. There needs to be a grace period for the user's bookmarks to be updated.
How should the administrator configure the policies in my domain settings?

- A. Set the login policy to prevent login from https://login.salesforce.com
- B. Set the login policy to require login from https://nto.my.salesforce.com
- C. Set the redirect policy to Redirect with a warning to the same page within the domain.
- D. Set the Redirect policy to Do Not redirect.

Answer: C

Explanation:
Explanation
To make sure that all of the Salesforce users log in using the branded login URL after deploying my domain, and give them a grace period for updating their bookmarks, the administrator should set the Redirect policy to Redirect with a warning to the same page within the domain. This will redirect users who try to log in from
https://login.salesforce.com or another domain to https://nto.my.salesforce.com, and show them a warning message that they need to update their bookmarks. Setting the Login policy or preventing login from
https://login.salesforce.com will not redirect users or give them a warning. Filtering with Form Factor will not affect login URL.

NEW QUESTION # 34
The administrator at Northern TrailOutfitters has been using a spreadsheet to track assigned licenses and permission sets.
What feature can be used to track this in Salesforce?

- A. Login History
- B. User Report
- C. Lightning Usage App
- D. Permission Set Groups

Answer: B

Explanation:
Explanation
To track assigned licenses and permission sets in Salesforce instead of using a spreadsheet, an administrator should use User Report type on Report object. User Report type allows creating reports that show information about users such as their profile, role, license type, active status, login history etc. It also allows adding fields related to permission sets such as Permission Set Assignments or Permission Set License Assignments. For example, an administrator can create a User Report that shows user name, profile name, user license name, permission set assignments count etc. Login History, Lightning Usage App, or Permission Set Groups are not features that can be used to track assigned licenses and permission sets in Salesforce.
