

HPE7-A02시험준비공부, HPE7-A02인기자격증

참고: DumpTOP에서 Google Drive로 공유하는 무료 2026 HP HPE7-A02 시험 문제집이 있습니다:
https://drive.google.com/open?id=1SHS01Crw7ORnXzQ_8_TSTrjQhFWfYz47

DumpTOP의 제품을 구매하시면 우리는 일년무료업데이트 서비스를 제공함으로 여러분을 인증시험을 패스하게 도와줍니다. 만약 인증시험내용이 변경이 되면 우리는 바로 여러분들에게 알려드립니다. 그리고 최신버전이 있다면 바로 여러분들한테 보내드립니다. DumpTOP는 한번에HP HPE7-A02인증시험을 패스를 보장합니다.

HP HPE7-A02 시험은 진료 시험으로, 이는 후보자가 시험 기간 동안 모니터링 될 것임을 의미합니다. 시험은 60 개의 객관식 질문으로 구성되며 응시자는 이를 완료하는 데 90 분이 걸립니다. 시험에 합격하려면 응시자는 70%이상을 기록해야 합니다.

HPE7-A02 시험은 Aruba 제품을 사용하며 네트워크 보안에 전문화하고자 하는 IT 전문가들을 대상으로 합니다. 이 시험을 준비하는 지원자들은 Aruba ClearPass Policy Manager 및 Aruba Mobility Controllers에 익숙하며, 네트워크 보안 개념과 실무에 대한 이해가 필요합니다. 이 자격증은 네트워크 보안 분야에서 경력 기회를 향상시키고 Aruba 제품 사용에 대한 전문성을 입증하고자 하는 전문가들에게 이상적입니다.

HPE7-A02인기자격증, HPE7-A02시험대비 최신버전 공부자료

IT업계에 종사하고 계신 분은HP HPE7-A02 시험을 패스하여 자격증을 취득하려고 검색하다 저희 블로그를 보게 되시고 저희 사이트까지 방문하게 될것입니다. 방문하는 순간 HP HPE7-A02시험에 대한 두려움이 사라질것입니다. 완벽한 구매후 서비스까지 견비하고 있어 자격증을 취득하는데서의 믿음직스러운 동반자로 되어드릴게요.

최신 HP ACNSP HPE7-A02 무료샘플문제 (Q75-Q80):

질문 # 75

You need to set up an HPE Aruba Networking VIA solution for a customer who needs to support 2100 remote employees. The customer wants employees to download their VIA connection profile from the VPNC. Only employees who authenticate with their domain credentials to HPE Aruba Networking ClearPass Policy Manager (CPPM) should be able to download the profile. (A RADIUS server group for CPPM is already set up on the VPNC.) How do you configure the VPNC to enforce that requirement?

- A. Set up a VIA Authentication Profile that uses CPPM's server group; reference that profile in the VIA Connection Profile.
- B. Reference CPPM's server group in an AAA profile; then, apply that profile to the VPNC's Internet-facing ports.
- C. Create a new VPN Authentication Profile and then reference CPPM's default server group in that profile.
- D. Set up a VIA Authentication Profile that uses CPPM's server group; reference that profile in the VIA Web Authentication Profile.

정답: D

설명:

To configure the HPE Aruba Networking VIA solution for remote employees who need to download their VIA connection profile from the VPN Concentrator (VPNC) and ensure that only those who authenticate with their domain credentials through ClearPass Policy Manager (CPPM) can do so, you need to set up a VIA Authentication Profile. This profile should use the CPPM's RADIUS server group. Once the VIA Authentication Profile is created, you need to reference this profile in the VIA Web Authentication Profile.

This configuration ensures that the authentication process requires employees to validate their credentials via CPPM before they can download the VIA connection profile.

질문 # 76

You have downloaded a packet capture that you generated on HPE Aruba Networking Central. When you open the capture in Wireshark, you see the output shown in the exhibit.

What should you do in Wireshark so that you can better interpret the packets?

- A. Edit preferences for IEEE 802.11 and chose to ignore the Protection bit with IV.
- B. Edit the Enabled Protocols and make sure that 802.11, GRE, and Aruba_ERM are enabled.
- **C. Choose to decode UDP port 5555 packets as ARUBA_ERM and set the Aruba ERM Type to 0.**
- D. Apply the following display filter: wlan.fc.type == 1.

정답: C

설명:

To better interpret the packets shown in the Wireshark capture, you should choose to decode UDP port 5555 packets as ARUBA_ERM and set the Aruba ERM Type to 0. This configuration will allow Wireshark to properly decode and display the Aruba-specific encapsulated remote mirroring (ERM) packets, providing a clearer understanding of the traffic.

1. Decoding Protocols: Selecting the correct protocol decoding in Wireshark ensures that the captured packets are interpreted correctly, displaying the relevant information.

2. Aruba ERM: The packets in the capture are likely encapsulated remote mirroring (ERM) packets specific to Aruba, which require proper decoding settings in Wireshark.

3. Clear Interpretation: By setting the Aruba ERM Type to 0 and decoding the packets as ARUBA_ERM, you can view the encapsulated data accurately.

Reference: Wireshark documentation and Aruba network packet analysis guides provide instructions on setting protocol decoding options to accurately interpret specific types of network traffic, such as Aruba ERM packets.

질문 # 77

A company is using HPE Aruba Networking ClearPass Device Insight (CPDI) (the standalone application). In the CPDI security settings, Security Analysis is On, the Data Source is ClearPass Devices Insight, and Enable Posture Assessment is On. You see that device has a Risk Score of 90.

What can you know from this information?

- **A. The posture is unhealthy, and CPDI has also detected at least one vulnerability on the device.**
- B. The posture is healthy, but CPDI has detected multiple vulnerabilities on the device.
- C. The posture is unknown, and CPDI has detected exactly four vulnerabilities on the device.
- D. The posture is unhealthy, but CPDI has not detected any vulnerabilities on the device.

정답: A

설명:

In HPE Aruba Networking ClearPass Device Insight (CPDI), a device with a Risk Score of 90 indicates that the posture is unhealthy, and CPDI has detected at least one vulnerability on the device. The risk score is a reflection of the device's security posture and detected vulnerabilities. A high risk score, such as 90, typically signifies significant security concerns, including the presence of vulnerabilities that could be exploited, thereby categorizing the device as a high-risk asset within the network.

Reference: ClearPass Device Insight documentation and security settings guides explain how risk scores are calculated and interpreted, including the impact of posture assessment and vulnerability detection on overall device risk ratings.

질문 # 78

What is a benefit of Online Certificate Status Protocol (OCSP)?

- A. It lets a device determine whether to trust a certificate without needing any root certificates installed.
- B. It lets a device download all the serial numbers for certificates revoked by a CA at once.
- C. It lets a device dynamically renew its certificate before the certificate expires.
- **D. It lets a device query whether a single certificate is revoked or not.**

정답: D

설명:

* OCSP (Online Certificate Status Protocol):

* OCSP allows a device to check the revocation status of a specific certificate in real-time by querying the Certificate Authority (CA).

* This is more efficient than downloading an entire Certificate Revocation List (CRL), as it only checks the status of one certificate.

* Option Analysis:

* Option A: Incorrect. Root certificates are still required to validate the CA issuing the certificate.

* Option B: Correct. OCSP checks the status of a single certificate for revocation.

* Option C: Incorrect. Downloading all serial numbers is a function of a CRL, not OCSP.

* Option D: Incorrect. OCSP does not handle certificate renewal; it only checks for revocation.

질문 # 79

A company wants you to create a custom device fingerprint on CPPM with rules for profiling a group of specialized devices. What is one requirement?

- A. Enabling HPE Aruba Networking ClearPass Device Insight integration with the correct Data Collector token.
- B. Pre-defining the desired attributes and rules in an XML format file.
- C. Disabling the "Automatically download Endpoint Profiler Fingerprints" feature in cluster-wide parameters.
- **D. Connecting a known device of this type and getting it discovered in CPPM's Endpoints Repository.**

정답: D

설명:

* Custom Device Fingerprinting on CPPM:

* To create a custom fingerprint, you first need to connect a known device of that type to the network.

* CPPM will discover the device in its Endpoints Repository, allowing you to analyze its attributes (e.g., MAC OUI, DHCP options) and create custom profiling rules.

* Option Analysis:

* Option A: Correct. Discovering a known device in the Endpoints Repository is a prerequisite for creating accurate custom fingerprint rules.

* Option B: Incorrect. CPDI integration is not required for custom fingerprints on CPPM.

* Option C: Incorrect. XML rules are not pre-defined; they are created dynamically based on observed attributes.

* Option D: Incorrect. The "Automatically download Endpoint Profiler Fingerprints" setting is unrelated to custom profiling.

질문 # 80

.....

여러분은 HP HPE7-A02 인증시험을 패스함으로 IT 업계 관련 직업을 찾고자 하는 분들에게는 아주 큰 가산점이 될 수 있으며, 성당한 IT 업계 사업자와 한 걸음 가까와 집니다.
