H12-891_V1.0 Reliable Exam Practice, Valid Braindumps H12-891_V1.0 Sheet

The only goal of all experts and professors in our company is to design the best and suitable H12-891_V1.0 study materials for all people. According to the different demands of many customers, they have designed the three different versions of the H12-891_V1.0 certification study guide materials for all customers: PDF, Soft and APP versions. They sincerely hope that all people who use H12-891_V1.0 Exam Questions from our company can pass the H12-891_V1.0 exam and get the related certification successfully. And our pass rate for H12-891_V1.0 exam questions is high as more than 98%.

Huawei H12-891_V1.0 (HCIE-Datacom V1.0) Certification Exam is a globally recognized certification program that validates the advanced-level networking skills of professionals in the field of data communication. HCIE-Datacom V1.0 certification program covers a wide range of topics and is designed to help professionals enhance their knowledge and skills in the field. HCIE-Datacom V1.0 certification exam is challenging, but individuals who pass it are recognized as experts in the field and are highly sought after by employers.

Huawei H12-891_V1.0 (HCIE-Datacom V1.0) Certification Exam is a globally recognized certification program that is designed to validate the skills and expertise of professionals in the field of Datacom. HCIE-Datacom V1.0 certification exam is conducted by Huawei, one of the leading providers of ICT solutions and services in the world. The HCIE-Datacom V1.0 Certification Exam is the highest level of certification in the Huawei Datacom certification track.

Huawei H12-891_V1.0 (HCIE-Datacom V1.0) Certification Exam is a highly sought-after certification for IT professionals who

want to specialize in data communication technologies. HCIE-Datacom V1.0 certification exam validates the skills and knowledge required to design, plan, and operate complex data communication networks using Huawei's advanced technologies. Candidates who pass H12-891_V1.0 exam will gain recognition as experts in the field of data communication and will have a competitive edge in the job market.

Valid Braindumps H12-891_V1.0 Sheet, Latest H12-891_V1.0 Demo

Huawei offers up-to-date Huawei H12-891_V1.0 practice material consisting of three formats that will prove to be vital for you. You can easily ace the H12-891_V1.0 exam on the first attempt if you prepare with this material. The Huawei H12-891_V1.0 Exam Dumps have been made under the expert advice of 90,000 highly experienced professionals from around the globe. They assure that anyone who prepares from it will get Huawei H12-891_V1.0 certified on the first attempt.

Huawei HCIE-Datacom V1.0 Sample Questions (Q54-Q59):

NEW QUESTION # 54
K company has two types of network services: UDP-based real-time video streaming services and TCP-based FTP download services. The company's network administrator often receives complaints that the FTP download speed is slow or unstable. What are the possible causes?

- A. The video service has a higher priority and preempts the bandwidth of the FTP service.
- B. The device uses the tail drop technology. As a result, global TCP synchronization affects the FTP rate.
- C. The device limits the FTP traffic rate to a small value.
- D. The device performs PQ scheduling for FTP services and WFQ scheduling for video services. As a result, the FTP service bandwidth is preempted.

Answer: A,B

Explanation:
Comprehensive and Detailed Explanation:
Key Factors Affecting FTP Performance:
* Tail Drop and TCP Synchronization (A) #
* Tail Drop causes TCP global synchronization, reducing FTP speeds drastically when congestion occurs.
* Since FTP is TCP-based, packet loss due to tail drop forces TCP retransmissions, further degrading performance.
* Priority Preemption by Video Traffic (D) #
* UDP-based real-time video traffic is often prioritized over TCP-based traffic to avoid jitter and packet loss.
* If video traffic has higher QoS priority, FTP bandwidth may be preempted, leading to slow speeds.
Incorrect Options:
Option B: PQ scheduling typically prioritizes latency-sensitive traffic (VoIP), but this scenario does not mention priority queuing for FTP.# Option C: No information about an explicit rate limit on FTP traffic.
Reference: Huawei HCIE Datacom - QoS and Congestion Control

NEW QUESTION # 55
In the laboratory network, the network is built according to the following topology diagram, SWI is the default configuration, and SW2 disables the switch STP function.

- A. No interface is backed up for blocking
- B. SG0/0/2 for WI enters the Discarding state
- C. SW2 G0/0/2 enters discarding state
- D. SWI's G0/0/1 enters the Discarding state
- E. SW2 and G0/0/1 enters the Discarding state

Answer: A

NEW QUESTION # 56

Which of the following statements about BGP EVPN principles are correct in a scenario where a VXLAN tunnel is dynamically established through BGP EVPN?

- A. MP_REACH_NLRI is used to carry the RT.
- B. Several BGP EVPN routes are defined through BGP extension.
- C. MP_REACH_NLRI is used to carry the RD.
- D. MP_REACH_NLRI is used to carry routing information.

Answer: A,B,D

Explanation:
BGP EVPN in VXLAN Tunneling
#A. MP_REACH_NLRI is used to carry routing information.
MP_REACH_NLRI (Multiprotocol Reachable Network Layer Reachability Information) is used in BGP update to carry VXLAN reachability information.
#B. Several BGP EVPN routes are defined through BGP extension.
BGP EVPN introduces multiple route types, such as Type 2 (MAC/IP Advertisement), Type 3 (Inclusive Multicast), and Type 5 (IP Prefix Advertisement).
#D. MP_REACH_NLRI is used to carry the RT.
RT (Route Target) defines route import/export policies in VPN environments.
MP_REACH_NLRI carries the RT attribute in BGP EVPN updates.
#C. MP_REACH_NLRI is used to carry the RD.
Wrong! The Route Distinguisher (RD) is carried inside BGP attributes, but not in MP_REACH_NLRI.

NEW QUESTION # 57

ISIS elects DIS in broadcast multiplexed access networks, and the following statement about DIS is correct?(Multiple choice)

- A. DIS supports preemption function, after the new DIS preemption is successful, there is no need to flood any LSP packet
- B. DIS guarantees database synchronization by periodically sending CSNP messages
- C. ISIS elects dis by comparing priorities, and mac addresses if the priorities are consistent
- D. In a broadcast multiple access network, DIS sends Hello PDUs at three times the frequency

Answer: B,C,D

NEW QUESTION # 58

What parameters can the DHCPv6 server assign to DHCPv6 clients?

- A. IPv6 address/prefix
- B. DNS server address
- C. SNTP server address
- D. Gateway address

Answer: A,B,C,D

NEW QUESTION # 59

......

We can confidently say that Our H12-891_V1.0 training quiz will help you. First of all, our company is constantly improving our products according to the needs of users. If you really want a learning product to help you, our H12-891_V1.0 study materials are definitely your best choice, you can't find a product more perfect than it. Second, our H12-891_V1.0 learning questions have really helped a lot of people. Looking at the experiences of these seniors, I believe that you will definitely be more determined to pass the H12-891_V1.0 exam.
