First-Grade Information-Technology-Management Minimum Pass Score & Valid WGU Certification Training - Practical WGU WGU Information

Technology Management QGC1

As a matter of fact, long-time study isn't a necessity, but learning with high quality and high efficient is the key method to assist you to succeed. We provide several sets of Information-Technology-Management test torrent with complicated knowledge simplified and with the study content easy to master, thus limiting your precious time but gaining more important knowledge. Our WGU Information Technology Management QGC1 guide torrent is equipped with time-keeping and simulation test functions, it's of great use to set up a time keeper to help adjust the speed and stay alert to improve efficiency. Our expert team has designed a high efficient training process that you only need 20-30 hours to prepare the exam with our Information-Technology-Management Certification Training. With an overall 20-30 hours' training plan, you can also make a small to-do list to remind yourself of how much time you plan to spend in a day with Information-Technology-Management test torrent.

WGU Information Technology Management QGC1 Sample Questions (Q179-Q184):

NEW QUESTION # 179
Which staffing issue can occur with offshore outsourcing?

- A. High turnover with less consistency
- B. Longer onboarding timelines
- C. Increased time spent on coordination
- D. Limited visibility into daily work

Answer: A

Explanation:
A significant staffing issue in offshore outsourcing is high employee turnover, which leads to inconsistent performance, knowledge loss, and increased training costs. Retention challenges in offshore teams can disrupt long-term projects and service consistency.
Option B: Coordination time is a project management challenge, not specifically staffing.
Option C: Limited visibility is a management oversight issue, not staffing.
Option D: Onboarding timelines may vary but are not a primary staffing concern.
Thus, the staffing issue is high turnover with less consistency.
Reference:
WGU Information Technology Management - IT Outsourcing, section on Staffing and Retention Challenges.

NEW QUESTION # 180
What is the purpose of the Information Technology Infrastructure Library (ITIL)?

- A. To develop a universal coding language for IT professionals
- B. To guide software development methodologies for managing development lifecycles
- C. To set standards for hardware manufacturing processes
- D. To align IT services with business needs through detailed practices

Answer: D

Explanation:
The Information Technology Infrastructure Library (ITIL) is a framework of best practices for IT service management. Its core purpose is to align IT services with the strategic and operational needs of the business. ITIL provides structured processes, practices, and guidelines for managing the IT service lifecycle, including service strategy, design, transition, operation, and continual improvement.
Option A: Incorrect, ITIL is not a software development lifecycle framework (e.g., that would be Agile, Scrum, or SDLC).
Option C: Incorrect, ITIL is not a programming language.
Option D: Incorrect, ITIL does not address hardware manufacturing.
Thus, ITIL's purpose is to align IT services with business needs.

WGU Information Technology Management - IT Service Management, section on ITIL Framework.

NEW QUESTION # 181
What is part of an effective IT ethics policy?

- A. Ethical scenarios for training purposes relevant to IT roles
- B. Guidelines for responsible technology use and consequences for misuse
- C. Password requirements for company-managed systems and mobile access
- D. Standards for security practices without mention of user conduct

Answer: B

Explanation:
An effective IT ethics policy establishes guidelines for responsible technology use (such as acceptable use of systems, data privacy, and confidentiality) and specifies consequences for unethical or inappropriate behavior.
This ensures accountability, transparency, and consistency in IT-related decision-making and actions.
Option B: Too narrow-security practices are part of IT policies, but ethics policies emphasize conduct and decision-making.
Option C: While training scenarios are useful, they are supplemental, not the foundation of an ethics policy.
Option D: Password requirements are part of security policies, not ethics policies.
Thus, an effective IT ethics policy must include guidelines for responsible technology use and consequences for misuse.
Reference:
WGU Information Technology Management - IT Governance and Ethics, section on Developing an IT Ethics Policy.

NEW QUESTION # 182
Which cybersecurity method prevents unauthorized users from accessing readable data?

- A. Encryption
- B. Data masking
- C. Access control lists
- D. Steganography

Answer: A

Explanation:
Encryption is the process of converting data into an unreadable format (ciphertext) that can only be accessed or decrypted by authorized users with the proper key. This ensures that even if unauthorized individuals access the data, they cannot interpret or misuse it.
Option A: Steganography hides data but does not inherently protect access.
Option B: Data masking obfuscates data for testing or limited use but is not a comprehensive security method.
Option C: Access control lists restrict access but do not make data unreadable.
Therefore, the cybersecurity method that prevents unauthorized users from accessing readable data is Encryption.
Reference:
WGU Information Technology Management - Cybersecurity Fundamentals, section on Encryption and Data Protection.

NEW QUESTION # 183
What starts systems development life cycle (SDLC)?

- A. Planning
- B. Stakeholder buy-in
- C. Business needs
- D. Budget approval

Answer: C

Explanation:
The SDLC begins with identifying business needs, which define why a new system or software is required.
These needs are analyzed to determine requirements and ensure that the system aligns with organizational goals.
Option A: Budget approval comes later in project initiation.
Option B: Stakeholder buy-in is important but occurs after business needs are defined.
Option C: Planning is the second step, following the identification of needs.
Thus, the SDLC starts with Business needs.
