

# Snowflake GES-C01 Authentic Exam Hub | New GES-C01 Study Notes

BTW, DOWNLOAD part of BraindumpsVCE GES-C01 dumps from Cloud Storage: <https://drive.google.com/open?id=1kTl6nL6g1Psx2mYL0mo9KNzh8E6gXzT2>

When you decide to buy BraindumpsVCE actual Snowflake GES-C01 exam dumps, you automatically boost your chances of SnowPro® Specialty: Gen AI Certification Exam GES-C01 exam success. In Snowflake GES-C01 exam product, you can encounter Snowflake GES-C01 exam questions that are present in the Snowflake GES-C01 certification exam. This helps you memorize actual GES-C01 exam questions beforehand and clear the GES-C01 Certification test on the first attempt. We offer GES-C01 real questions in Snowflake GES-C01 PDF questions files, GES-C01 desktop practice test software, and web-based practice exam. Read on to learn more about the top features of our SnowPro® Specialty: Gen AI Certification Exam GES-C01 PDF dumps file, desktop Snowflake GES-C01 practice exam software, and a web-based GES-C01 practice test.

BraindumpsVCE provide training tools included Snowflake certification GES-C01 exam study materials and simulation training questions and more importantly, we will provide you practice questions and answers which are very close with real certification exam. Selecting BraindumpsVCE can guarantee that you can in a short period of time to learn and to strengthen the professional knowledge of IT and pass Snowflake Certification GES-C01 Exam with high score.

## Three Formats of BraindumpsVCE Snowflake GES-C01 Practice Test Questions

We can conclude this post with the fact that to clear the SnowPro® Specialty: Gen AI Certification Exam (GES-C01) certification exam, you need to be prepared before, study well, and practice. You cannot rely on your luck to score well in the GES-C01 exam. You have to prepare with BraindumpsVCE real Snowflake GES-C01 Exam Questions to clear the GES-C01 test in one go. You will also receive up to 365 days of free updates and GES-C01 dumps pdf demos. Purchase the SnowPro® Specialty: Gen AI Certification Exam (GES-C01) practice tests today and get these amazing offers.

## Snowflake SnowPro® Specialty: Gen AI Certification Exam Sample Questions (Q348-Q353):

### NEW QUESTION # 348

A data engineering team wants to deploy a proprietary PyCaret classification model, saved as pycaret\_best\_model.pkl, for inference within Snowpark Container Services (SPCS). They need to register this custom model in the Snowflake Model Registry. Which of the following is a correct and essential step in this process?

- A. Option D
- B. Option B

- C. Option C
- D. Option A
- E. Option E

**Answer: B**

Explanation:

**NEW QUESTION # 349**

A financial institution wants to leverage Snowflake Cortex Agents to build an AI application for complex financial analysis, requiring interaction with both their structured transaction databases and unstructured legal documents, while also ensuring intelligent decision-making throughout the process. Which of the following accurately describe the foundational capabilities of Snowflake Cortex Agents?

- A. They incorporate a 'Reflection' component, allowing the agent to evaluate results after each tool use and determine the next logical steps, including iterating or clarifying.
- B. Agents are designed to orchestrate tasks by planning execution steps, and utilizing tools such as Cortex Analyst for structured data and Cortex Search for unstructured data.
- C. Allows integration of custom logic and external services through user-defined functions (UDFs) and stored procedures as custom tools.
- D. Cortex Agents primarily focus on providing a low-latency, hybrid (vector and keyword) search engine over text data.
- E. Cortex Agents enable direct fine-tuning of base LLMs using private customer data, with the resulting models managed within the Snowflake Model Registry.

**Answer: A,B,C**

Explanation:

Option B is correct because Cortex Agents orchestrate across structured and unstructured data sources, planning tasks and using tools like Cortex Analyst for structured data and Cortex Search for unstructured data. Option C is correct as 'Reflection' is a key component where the agent evaluates results after each tool use to determine next steps. Option E is correct because Cortex Agents allow the implementation of custom tools using stored procedures and user-defined functions (UDFs). Option A is incorrect; this describes Cortex Search, which is a tool that Cortex Agents can utilize, but not the primary, overarching capability of the agent itself. Option D is incorrect as this describes Cortex Fine-tuning, a separate capability for customizing LLMs, while agents use LLMs for orchestration.

**NEW QUESTION # 350**

A financial institution uses Snowflake Cortex Analyst with strict role-based access control (RBAC) on their Snowflake-hosted LLMs. The security team has granted specific 'CORTEX-MODEL-ROLE' application roles to different analyst teams, ensuring they only access approved models. A new requirement arises to enable Azure OpenAI GPT models for Cortex Analyst to leverage a specific feature. An administrator proceeds to execute:

□ Which of the following statements accurately describe the implications of this change?

- A. Option D
- B. Option C
- C. Option B
- D. Option A
- E. Option E

**Answer: B,C**

Explanation:

Option B is correct because when is 'TRUE', cortex Analyst can use Azure OpenAI models, but this setting is incompatible with model-level RBAC, meaning RBAC is not available for any models used by Cortex Analyst when this parameter is enabled. Option C is correct because if Azure OpenAI models are opted in for Cortex Analyst, semantic model files (which are metadata) and user prompts will be processed by Microsoft Azure, a third party, thus transmitting them outside Snowflake's governance boundary. Customer data itself is not shared. Option A is incorrect because the parameter is incompatible with model-level RBAC for 'all' models used by Cortex Analyst. Option D is incorrect as the parameter specifically controls the use of Azure OpenAI models within Cortex Analyst. Option E is incorrect because this parameter can only be set by the 'ACCOUNTADMIN' role.

### NEW QUESTION # 351

A project team is preparing to deploy a Document AI solution to process scanned customer feedback forms. They have created a dedicated role, 'customer feedback \_ processor', and successfully granted it the SNOWFLAKE.

DOCUMENT\_INTELLIGENCE\_CREATOR database role. The environment consists of 'feedback database', 'forms schema' schema, and 'ai workload warehouse. However, when the attempts to prepare a Document AI model build in Snowsight, they encounter a 'permission denied' error. Which of the following missing 'USAGE' grants could be the direct cause of this error?

- A.
- B.
- C.
- D.
- E.

**Answer: C,D,E**

Explanation:

### NEW QUESTION # 352

A security-conscious data scientist in an Azure East US 2 (Virginia) account wants to fine-tune a mistral -7b model for a specific text summarization task and then deploy it for real-time inference using the Cortex REST API. The mistral-7b base model is natively available for fine-tuning in Azure East US 2 (Virginia). For subsequent inference using the fine-tuned model, they need to understand the regional and cross-region inference considerations. Which of the following statements are correct?

- A. Option E
- B. Option D
- C. Option B
- D. Option C
- E. Option A

**Answer: A,B,C,E**

Explanation:

### NEW QUESTION # 353

.....

Our GES-C01 prep material target all users and any learners, regardless of their age, gender and education background. We provide 3 versions of our GES-C01 learning prep for the clients to choose based on the consideration that all the users can choose the most suitable version to learn. The 3 versions each support different using method and equipment and the client can use the GES-C01 Exam study materials on the smart phones, laptops or the tablet computers. The clients can choose the version of our GES-C01 exam questions which supports their equipment on their hands to learn.
