Palo Alto Networks System Engineer - Cortex Professional Sample Questions (Q13-Q18):

NEW QUESTION # 13

What is a benefit offered by Cortex XSOAR?

- A. It provides holistic protection across hosts and containers throughout the application lifecycle.
- B. It has the ability to customize the extensible platform to scale to business needs.
- C. It allows the consolidation of multiple point products into a single integrated service.
- D. It enables an end-to-end view of everything in the customer environment that affects digital employee productivity.

Answer: C

NEW QUESTION # 14

A Cortex XSOAR customer wants to send a survey to users asking them to input their manager's email for a training use case so the manager can receive status reports on the employee's training. However, the customer is concerned users will provide incorrect information to avoid sending status updates to their manager.

How can Cortex XSOAR most efficiently sanitize user input prior to using the responses in the playbook?

- A. Create a sub-playbook and import a list of manager emails into XSOAR. Use a conditional task comparison to check if the response matches an email on the list. If no matches are found, loop the sub-playbook and send the survey back to the user until a match is found.
- B. Create a conditional task comparison to check if the response contains a valid email address.
- C. Create a manual task to ask the analyst to validate the survey response in the platform.
- D. Create a task that sends the survey responses to the analyst via email. If the responses are incorrect, the analyst fills out the correct response in the survey.

Answer: A

NEW QUESTION # 15

Which two troubleshooting steps should be taken when an integration is failing to connect? (Choose two.)

- A. Confirm there are no dashboards or reports configured to use that integration instance.
- B. Confirm the integration credentials or API keys are valid.
- C. Ensure the playbook is set to run in quiet mode to minimize CPU usage and suppress errors
- D. Check the integration logs and enable a higher logging level, if needed, view the specific error.

Answer: B,D

Explanation:

Confirm the integration credentials or API keys are valid, as incorrect or expired credentials are a common cause of connection issues.

Check the integration logs and enable a higher logging level if needed, to view more detailed error information. This can help identify the root cause of the failure and guide further troubleshooting.

NEW QUESTION # 16

What is the primary function of an engine in Cortex XSOAR?

- A. To store and manage incident data, remediation plans, and documentation
- B. To provide a user interface for security analysts
- C. To manage multiple Cortex XSOAR tenants
- **D. To execute playbooks, scripts, commands, and integrations**

Answer: D

Explanation:

The primary function of an engine in Cortex XSOAR is to execute playbooks, scripts, commands, and integrations. This allows the platform to automate and orchestrate security operations tasks, helping security teams respond to incidents more efficiently.
