## COF-C02 Exam Score | COF-C02 Real Exams

Three versions of COF-C02 exam guide are available on our test platform, including PDF version, PC version and APP online version. As a consequence, you are able to study the online test engine of study materials by your cellphone or computer, and you can even study COF-C02 actual exam at your home, company or on the subway whether you are a rookie or a veteran, you can make full use of your fragmentation time in a highly-efficient way. At the same time, we can guarantee that our COF-C02 practice materials are revised by many experts who can help you pass the COF-C02 exam.

Snowflake COF-C02: SnowPro Core Certification Exam is important because it demonstrates an individual's expertise in using Snowflake to manage data warehousing and related solutions. SnowPro Core Certification Exam certification is recognized by organizations worldwide, and it can help data professionals advance their careers by demonstrating their proficiency in using Snowflake to build, design, and manage data solutions.

Snowflake COF-C02 (SnowPro Core Certification) Certification Exam is designed to test and validate the skills and knowledge of professionals who work with Snowflake, a cloud-based data warehousing platform. COF-C02 Exam covers a range of topics including data loading and processing, user and security management, and SQL queries. SnowPro Core Certification Exam certification is a valuable asset for those interested in demonstrating their proficiency with Snowflake and differentiating themselves in the competitive job market.

## Snowflake SnowPro Core Certification Exam Sample Questions (Q96-Q101):

### NEW QUESTION # 96

The Snowflake Search Optimization Services supports improved performance of which kind of query?

- A. Queries against large tables where frequent DML occurs
- B. Queries against a subset of columns in a table
- C. Queries against tables larger than 1 TB
- **D. Selective point lookup queries**

**Answer: D**

Explanation:

Reference:

<https://docs.snowflake.com/en/user-guide/search-optimization-service.html#:~:text=The%20search%20optimiza%20point,OBJECT%2C%20and%20ARRAY%20columns>

### NEW QUESTION # 97

Which Snowflake object can be used to record DML changes made to a table?

- A. Snowpipe
- **B. Stream**
- C. Task
- D. Stage

**Answer: B**

Explanation:

Snowflake Streams are used to track and record Data Manipulation Language (DML) changes made to a table. Streams capture changes such as inserts, updates, and deletes, which can then be processed by other Snowflake objects or external applications.

\* Creating a Stream:

```
CREATE OR REPLACE STREAM my_stream ON TABLE my_table;
```

\* Using Streams: Streams provide a way to process changes incrementally, making it easier to build efficient data pipelines.

\* Consuming Stream Data: The captured changes can be consumed using SQL queries or Snowflake tasks.

\* Snowflake Documentation: Using Streams

\* Snowflake Documentation: Change Data Capture (CDC) with Streams

### NEW QUESTION # 98

A user is loading JSON documents composed of a huge array containing multiple records into Snowflake.

The user enables the `strip__outer_array` file format option

What does the `STRIP__OUTER_ARRAY` file format do?

- **A. It removes the outer array structure and loads the records into separate table rows,**
- B. It removes the NULL elements from the JSON object eliminating invalid data and enables the ability to load the records
- C. It removes the last element of the outer array.
- D. It removes the trailing spaces in the last element of the outer array and loads the records into separate table columns

**Answer: A**

Explanation:

The STRIP\_OUTER\_ARRAY file format option in Snowflake is used when loading JSON documents that are composed of a large array containing multiple records. When this option is enabled, it removes the outer array structure, which allows each record within the array to be loaded as a separate row in the table. This is particularly useful for efficiently loading JSON data that is structured as an array of records<sup>1</sup>.

#### NEW QUESTION # 99

Which parameter can be set at the account level to set the minimum number of days for which Snowflake retains historical data in Time Travel?

- A. MAX\_DATA\_EXTENSION\_TIME\_IN\_DAYS
- B. MIN\_DATA\_RETENTION\_TIME\_IN\_DAYS
- C. DATA\_RETENTION\_TIME\_IN\_DAYS
- D. MAX\_CONCURRENCY\_LEVEL

**Answer: C**

Explanation:

The parameter DATA\_RETENTION\_TIME\_IN\_DAYS can be set at the account level to define the minimum number of days Snowflake retains historical data for Time Travel.

#### NEW QUESTION # 100

Which of the following features, associated with Continuous Data Protection (CDP), require additional Snowflake-provided data storage? (Choose two.)

- A. Tri-Secret Secure
- B. External stages
- C. Fail-safe
- D. Time Travel
- E. Data encryption

**Answer: C,D**

Explanation:

The features associated with Continuous Data Protection (CDP) that require additional Snowflake-provided data storage are Time Travel and Fail-safe. Time Travel allows users to access historical data within a defined period, while Fail-safe provides an additional layer of data protection beyond the Time Travel period.
